Commentary

31 December 2023

Alongside falling bond yields, equities also began to climb from late October as investor risk appetite improved. The FTSE World Index advanced 6.9% in the fourth quarter (in sterling), taking the annual return for 2023 to 17.2%. The US was one of the best-performing markets – the S&P 500 Index gained 11.7% (in US dollars) to end the year up 26.3%. European stockmarkets registered healthy gains, amid excitement about potential rate cuts. However, the UK trailed the broader global market. Share prices in Asia Pacific ex Japan and emerging markets also underperformed, mainly on account of weakness in China. From a sector perspective, real estate was one of the best performers, along with information technology, while energy stocks had the weakest performance. The US dollar weakened against major currencies including sterling after the Federal Reserve signalled it would start to cut rates this year. Oil prices fell 22% despite production cuts and concerns about potential supply disruptions resulting from the conflict in the Middle East.

The M&G Treasury & Investment Office (T&IO) outlook is cautious as much uncertainty remains.
