

Aims

Objective: The investment strategy of the fund is to purchase units in the M&G PP North America Equity Index Fund - the underlying fund.

Underlying fund objective: The fund aims to have similar risk-return characteristics as the FTSE North America Index. The fund gains its exposure via the M&G (ACS) BlackRock US Equity Fund and the M&G (ACS) BlackRock Canada Equity Fund. The underlying funds aim to be fully invested in the equity securities and equity related securities of companies that are constituents of the S&P 500 Index and the FTSE Canada Index respectively.

Within the index-relative limits, the Investment Manager uses a structured and systematic, bottom up stock selection process to build a portfolio with similar risk-return characteristics as the index in order to meet the fund's investment objectives. In addition to the fund's objective, the Investment Manager aims to maximise the fund's ESG characteristics by overweighting its investments in securities which score well against the Investment Manager's ESG research framework and underweighting the securities which score less well.

Performance Objective: The funds aim to provide a total return (i.e. capital growth plus income), gross of the Ongoing Charges Figure, over any three year period.

Prudential Risk Rating

**Higher Risk**

These are specialist equity funds that focus on set geographical regions or a particular type of share e.g. shares of smaller companies or those that conform to certain criteria.

These risk ratings have been developed by Prudential to help provide an indication of a fund's potential level of risk and reward based on the type of assets which may be held by the fund. Other companies may use different descriptions and as such these risk ratings should not be considered as generic across the fund management industry.

We regularly review our fund risk ratings, so they may change in the future. If, in our view, there is a material change in the fund's level of risk, for example due to a significant change to the assets held by the fund or in the way the fund is managed, we will provide information on the new risk rating. We recommend that you make sure you understand the risk rating of any fund before you invest.

You should also consider discussing your decision and the appropriateness of a fund's risk rating with an adviser.

Fund Managers

Name: Richard O'Connor  
Manager of the underlying fund for: 18 years, 9 months

Important Information

- Because of changes in exchange rates the value of your investment, as well as any money you take from it, can go down as well as up.
- Some funds may invest in 'underlying' funds or other investment vehicles. The performance of our fund, compared to what it's invested in won't be exactly the same. That can be due to additional charges, cash management (needed to help people to enter and leave our fund when they want), tax and the timing of investments (this is known as a fund's dealing cycle, it varies between managers and can be several days).

- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with gross income reinvested. The value of your investment can go down as well as up so you might get back less than you put in.
- This factsheet is intended for the trustees, sponsors, advisers and members of occupational pension schemes using Prudential group pension contracts and Prudential grouped personal pensions and Stakeholder pension contracts. Its purpose is to provide an insight into how investment markets and funds have performed over the period and is provided for information only. If you are not familiar with any of the investment terminology included, then please contact an adviser. Investors should refer to their scheme documentation (e.g. Fund Guide) for fund availability, investment strategy, any scheme information and charges. Every care has been taken in populating this output, however it must be appreciated that neither Broadridge, Prudential nor their sources guarantee the accuracy, adequacy or completeness of this information or make any warranties regarding results from its usage.

- The Industry Classification Benchmark is a product of FTSE International Limited and has been licensed for use.
- Prudential is a trading name of Prudential Pensions Limited. Prudential Pensions Limited is registered in England and Wales. Registered office at 10 Fenchurch Avenue, London EC3M 5AG. Registered number 992726. Authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

## Commentary

Performance as at Q4 2023 - US equities rounded off the year with a powerful rally in the fourth quarter of 2023. After declines in October, share prices then soared as investors become increasingly optimistic that the Federal Reserve had ended its interest rate hiking cycle. With annual inflation falling to 3.1% in November and the economy remaining resilient, hopes of rate cuts in 2024 helped the S&P 500 Index climb towards all-time highs. Information technology was one of the best-performing sectors, adding to its gains in previous quarters. Real estate, a sector that is perceived as being sensitive to interest rates, rallied, along with financials and industrials. In contrast, energy stocks fell heavily, while more defensive areas, notably consumer staples and healthcare, lagged the broader market.
