Aims

The investment strategy of the fund is to purchase units in the CF Prudential Dynamic 10-40 Portfolio. That portfolio aims to achieve long-term total return (the combination of income and growth of capital). It is an actively managed portfolio investing mainly in collective investment schemes in order to provide a well diversified exposure to global fixed income and variable rate assets, cash, deposits, warrants, money market instruments, equities and/or immovable property. Typically the portfolio will have a bias towards lower risk assets such as fixed income assets, cash, deposits, warrants and money market instruments but will always have some exposure to equities, with between 10% and 40% of the portfolio being invested in schemes whose predominant exposure is to equities.
