Aims

The investment strategy of the fund is to purchase units in the LF Prudential Dynamic 20-55 Portfolio. That portfolio aims to achieve long-term total return (the combination of income and growth of capital). It is an actively managed portfolio investing mainly in collective investment schemes in order to provide a well-diversified exposure to global fixed income and variable rate assets, cash, deposits, warrants, money market instruments, equities and/or immovable property. From time to time, however, the portfolio may have a high exposure to equities and/or fixed assets, with between 20% and 55% of the portfolio being invested in schemes whose predominant exposure is to equities.
