To maximise returns by investing in UK Government stocks and other readily marketable fixed interest securities. The fund may also include stocks of overseas governments and companies.

## ABI SECTOR

## ABI UK - UK GILT-PEN

This is the ABI sector the fund falls into. ABI sectors are defined by the Association of British Insurers (ABI). The sectors are a way of grouping funds with similar characteristics, so they're easier to compare.

- Funds invest at least 95% of their assets in:
  - UK Government securities (Gilts),
  - UK Government backed securities,
  - Sterling denominated (or hedged back to Sterling) AAA rated, overseas government backed securities.
- At least 80% of the fund must be invested in UK Government securities (Gilts).

## FUND CHARACTERISTICS

This fund is overseen by an experienced fund manager who makes informed decisions on where to invest your money. The fund manager constantly monitors companies, economic conditions and markets to select and change a portfolio of investments that offers the best opportunities to meet the fund's aim.

The fund generally invests in the following:

**Bonds.** To provide the potential for overall returns the fund invests in bonds, also known as fixed interest securities. This is achieved by receiving regular interest on loans to companies or governments. There is a chance the bond issuer could fall into financial difficulty and will not be able to pay the interest or the loan back, which could result in a fall in your investment returns. Bonds can also be sensitive to trends in interest rate movements and if interest rates go up, the returns on your investment are likely to fall as bonds can become less attractive. On the other hand, if interest rates fall, bonds are likely to become more attractive and your investment returns increase.
