Number of holdings	3,008
Fund Management Charge (FMC)	1.52%
Additional expenses	included in FMC
Performance fee	No
Legal & General fund code	0666

USING THIS FUND FACTSHEET

When you invest in a pension, your money buys units in one or more funds. These funds pool together money from other investors and a fund manager uses this money to invest in a number of different investments. This **Fund Factsheet** gives you detailed information about a particular fund to help you decide if it's right for you. It's important that you read this together with **Investor's Guide, Portfolio Plus SIPP (ESF/BPWM) Key Features, Terms Sheet, Selected Funds Guide for Insured Funds** and **Illustration(s)** before investing in the pension.

FUND MANAGEMENT COMPANY

FIDELITY INTERNATIONAL

This is basic background information about the company whose fund manager selects the investments that make up the fund.

Fidelity is one of the UK's largest investment fund managers and are dedicated to achieving the best possible returns for investors.

FUND MANAGERS

The fund manager is professionally qualified to manage funds. It's their job to seek out the best investment opportunities, based on the fund's aim. They often have access to a team of experts to help them decide where to invest.

FUND AIM

This is a general description of what the fund aims to achieve, as stated by the fund management company. For a detailed description of what the fund invests in, please see the fund characteristics on page 2.

To provide long-term capital growth through global exposure to a balance of lower and higher risk assets. The fund will primarily invest in funds (including funds managed by Fidelity). The fund may also invest directly into transferable securities, other collective investment schemes, money market instruments, cash and deposits and is also able to use derivatives for efficient portfolio management and investment purposes. Asset allocation exposure of the fund will be actively managed and typical allocation will be as follows: 50% lower risk assets (such as debt instruments e.g. bonds and cash) and 50% higher risk assets (including equities, commodities and property securities). However, the fund's allocation between lower risk and higher risk assets can be tactically adjusted within the following range in order to preserve capital or take advantage of market opportunities: 30-70% lower risk assets and 30-70% higher risk assets.

ABI SECTOR

ABI UK - MIXED INVESTMENT 20%-60% SHARES-PEN

This is the ABI sector the fund falls into. ABI sectors are defined by the Association of British Insurers (ABI). The sectors are a way of grouping funds with similar characteristics, so they're easier to compare.

Funds in this sector are required to have a range of different investments. The fund must have between 20% and 60% invested in company shares (equities). At least 30% of the fund must be in fixed income investments (for example, corporate and Government bonds) and/or "cash" investments "Cash" can include investments such as current account cash, short-term fixed income investments and certificates of deposit.

- Maximum 60% equity exposure (including convertibles)
- Minimum 20% equity exposure
- Minimum 30% fixed income and cash
- Minimum 60% investment in established market currencies (US Dollar, Sterling & Euro) of which 30% must be Sterling
- Sterling requirement includes assets hedged back to Sterling

FUND CHARACTERISTICS

This fund is overseen by an experienced fund manager who makes informed decisions on where to invest your money. The fund manager constantly monitors companies, economic conditions and markets to select and change a portfolio of investments that offers the best opportunities to meet the fund's aim.

The fund generally invests in the following:

Equities. To provide the potential for overall returns the fund invests in equities, also known as company shares. This is achieved by receiving a share of companies' profits as dividends, and benefiting from increases in share prices. Equities generally have a higher potential for returns than other investments, which also means a higher risk of loss especially in the short term. It's worth noting that if the shares in the companies chosen perform worse than expected or a major event impacts the shares, the returns on your investment could fall.

Bonds. To provide the potential for overall returns the fund invests in bonds, also known as fixed interest securities. This is achieved by receiving regular interest on loans to companies or governments. There is a chance the bond issuer could fall into financial difficulty and will not be able to pay the interest or the loan back, which could result in a fall in your investment returns. Bonds can also be sensitive to trends in interest rate movements and if interest rates go up, the returns on your investment are likely to fall as bonds can become less attractive. On the other hand, if interest rates fall, bonds are likely to become more attractive and your investment returns increase.

Some specific characteristics of the assets held in this fund include:

Emerging markets. The fund includes investments in emerging markets, taking advantage of the fast-growing economies in the developing world. These markets can provide higher returns, as well as a higher chance of the returns on your investment either rising or falling than if it invested in more developed markets. Greater risk is taken as it can be harder to buy and sell shares in these countries and the countries themselves are more exposed to political uncertainties. Emerging markets are also not as well regulated and have less protection in place for investments than the UK.

Overseas. The fund includes investments outside the UK to try to benefit from the greater range of investment opportunities other countries offer. The potentially high rewards of investing overseas are balanced by risks and therefore the returns on your investment could rise and fall more than if it only invested in the UK. This is because some of the investments are held in currencies other than the Pound and their value will change in line with exchange rates. If the Pound strengthens against another currency, the value of the investments held in that currency is likely to fall. However, if the Pound weakens against that currency, their value is likely to rise.

Derivatives. The fund includes derivatives, which are contracts between two parties whose value is determined by the price of the investment it's linked to, such as equities, bonds or other types of investments. They can be used to try to improve overall investment returns, manage risk or to help protect returns from market falls. This includes investing in types of derivatives where the value rises when the market falls, although the opposite could also be true, meaning that your investment returns could fall even if the market is rising. The use of derivatives can reduce the cost of investing directly in an investment. However, extra risk is taken as the companies providing the derivatives could experience financial difficulties, making it difficult to value or sell the derivative. If this happens it may reduce your investment returns.

FUND PERFORMANCE AS AT 30 JUNE 2017

The graph opposite shows how the fund has performed over the last five years (or since the fund launched) compared with the fund's ABI sector average. The first table shows the total percentage change, over one, three and five years. The second table shows performance for 12-month periods over the last five years, to the end of the last quarter.

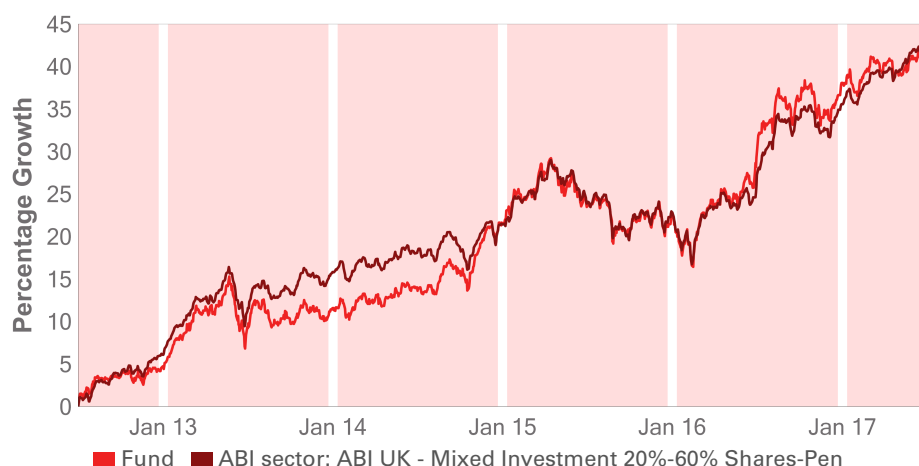

NOTES: Please bear in mind that past performance is not a guide to future returns. The value of your investment and any income taken from it is not guaranteed and may go up and down. You could get back less than you invest.

The performance provided for the fund is:

- Is after all fund charges have been taken, and
- assumes all income generated by the investments remains in the fund.

Also:

- The sector values are based on the selling price of units published by all the funds in that ABI sector.
- The values do not take account of any product charges. You can find more information about our charges in the Members' Policy Booklet.

	1 year	3 years	5 years

GLOSSARY

Explanations of some of the words used in this Fund Factsheet.

Additional Expenses	This is the charge that covers various fees and expenses that fund managers may have to pay, such as auditors, trustees, custodian, registrar and regulator fees.
Cash and equivalents	Some funds keep part of your money in cash to add flexibility and aid stability. This includes bank deposits and other investments that can be easily converted into cash.
Fund characteristics	Specific characteristics unique to the type of investments this fund may hold, which may affect your investment return.
Fund Management Charge	This is the charge that covers the costs of managing the fund and is taken out as a percentage of the fund's value.
Fund size	The total value of all investments held in all Legal & General pension versions of the fund.
Launch date	The date the first Legal & General pension version of the fund opened for new business.
Legal & General fund code	Each fund has a unique four digit reference code. You'll need to use this code on your application form when you tell us where you would like to invest.
Lipper	A Thomson Reuters company that supplies fund information, analytical tools, and commentary. We use Lipper to provide past performance data on our fund factsheets.
Overall fund size	The total value of all investments held in the underlying fund.
Performance fee	A performance fee is charged to a fund if it performs better than a pre-agreed target. If it applies, your adviser can give you more information or further details are available on request.

WHAT TO DO NEXT

If you would like to invest in this fund, or have any questions, please speak to your adviser. Remember you must read the **Investor's Guide, Portfolio Plus SIPP (ESF/BPWM) Key Features, Terms Sheet, Selected Funds Guide for Insured Funds** and **Illustration(s)** before investing in the pension.
