## USING THIS FUND FACTSHEET

When you invest in a pension, your money buys units in one or more funds. These funds pool together money from other investors and a fund manager uses this money to invest in a number of different investments. This **Fund Factsheet** gives you detailed information about a particular fund to help you decide if it's right for you. It's important that you read this together with **Investor's Guide, Portfolio Plus SIPP (ESF/BPWM) Key Features, Terms Sheet, Selected Funds Guide for Insured Funds** and **Illustration(s)** before investing in the pension.

## FUND MANAGEMENT COMPANY

## LEGAL & GENERAL

This is basic background information about the company whose fund manager selects the investments that make up the fund.

Legal & General Investment Management (LGIM) is one of Europe's largest institutional asset managers and a major global investor. Throughout the past 40 years they have built their business through understanding what matters most to their clients and transforming this insight into valuable, accessible investment products and solutions. They provide investment expertise across a full spectrum of asset classes including equities, fixed income, commercial property and cash.

## FUND MANAGER

## JASON FORSTER

The fund manager is professionally qualified to manage funds. It's their job to seek out the best investment opportunities, based on the fund's aim. They often have access to a team of experts to help them decide where to invest.

Jason is a Fund Manager, Index Funds specialising in the Pacific and UK funds from 2002 onwards. Prior to 2002, Jason was primarily responsible for the development of the in-house index fund management system. Before joining LGIM in 1999, Jason worked for Hermes Fund Management and was involved in portfolio performance measurement. Prior to Hermes, Jason worked for FTSE International for over two years as an indices analyst. He began his career in 1992, working for the Financial Times. Jason completed Business Studies at Southampton Higher Institute and is a member of the FTSE EMEA Regional Committee and the LPX Committee.

## FUND AIM

This is a general description of what the fund aims to achieve, as stated by the fund management company. For a detailed description of what the fund invests in, please see the fund characteristics on page 2.

To track the sterling total returns of the FTSE All-Share Index (including re-invested income).

## ABI SECTOR

## ABI UK - UK ALL COMPANIES-PEN

This is the ABI sector the fund falls into. ABI sectors are defined by the Association of British Insurers (ABI). The sectors are a way of grouping funds with similar characteristics, so they're easier to compare.

- Funds which invest at least 80% of their assets in equities quoted on the UK stock market.
- Funds have the primary objective of achieving capital growth or total return.

## FUND CHARACTERISTICS

This fund tracks an index to give you a return that closely follows the performance of the market or sector outlined in the fund's aim. This means you can invest without relying on a fund manager's expertise to select the right individual investments. Index-tracking funds need less hands-on management than active funds, which means they can offer lower charges and more of your money remains invested.

The fund generally invests in the following:

**Equities.** To provide the potential for overall returns the fund invests in equities, also known as company shares. This is achieved by receiving a share of companies' profits as dividends, and benefiting from increases in share prices. Equities generally have a higher potential for returns than other investments, which also means a higher risk of loss especially in the short term. It's worth noting that if the shares in the companies chosen perform worse than expected or a major event impacts the shares, the returns on your investment could fall.

**Cash.** To provide the potential for overall returns the fund invests in cash. This is where money is lent to banks and similar organisations who repay the deposit, plus interest, after a set period of time. Cash is seen as one of the safest investments, but it also has the lowest potential for returns. It offers stability and when other investments are falling, cash will be best positioned to secure your money. However, the returns on your investment could fall if any of the financial institutes suffer financial difficulty or become insolvent and cannot pay back some or all the amount held with them.

## FUND PERFORMANCE AS AT 30 JUNE 2017

The graph opposite shows how the fund has performed over the last five years (or since the fund launched) compared with the fund's ABI sector average. The first table shows the total percentage change, over one, three and five years. The second table shows performance for 12-month periods over the last five years, to the end of the last quarter.

**NOTES:** Please bear in mind that past performance is not a guide to future returns. The value of your investment and any income taken from it is not guaranteed and may go up and down. You could get back less than you invest.

**The performance provided for the fund is:**

- Is after all fund charges have been taken, and
- assumes all income generated by the investments remains in the fund.

**Also:**

- The sector values are based on the selling price of units published by all the funds in that ABI sector.
- The values do not take account of any product charges. You can find more information about our charges in the Members' Policy Booklet.
