

Rathbone Income Fund

Investment objective

The objective of the fund is to achieve above average and maintainable income but without neglecting capital security and growth. The Manager intends to achieve the objective primarily through the purchase of ordinary shares with an above average yield. There is no restriction on the economic sectors or geographic areas in which the fund may invest. However, investments will always be predominantly in the ordinary shares of UK companies.

Fund snapshot

The fund invests in small, mid and large-sized UK equities with a focus on dividend-paying stocks trading at a discount to fair value. There is also the flexibility to invest up to 20% in foreign equities. To control risk, we believe capital protection is key. The manager's style is to have long-term conviction to step beyond benchmarks and short-term trends. Portfolio turnover is low due to a 'buy and hold' strategy for rolling-up income and capital returns. The fund holds a concentrated portfolio of 30 to 50 companies, as we believe adding further holdings to try spread risk is only distracting.

Important information

Copies of the Prospectus, the Key Investor Information Document (KIID), the Supplementary Information Document (SID), and application forms may be obtained, free of charge, from Rathbone Unit Trust Management Limited.

Emerging markets are volatile and may suffer from liquidity problems. Changes in rates of exchange between currencies may cause the value of investments to decrease or increase.

Details of tax levels and reliefs may change in the future. The value of any tax relief depends on individual circumstances. If you have doubts about your tax position, or the suitability of this investment, you should seek professional advice.

To meet the investment objective, the fund may also invest, at the Manager's discretion, in other transferable securities, money market instruments, warrants, cash and near cash, deposits and units in collective investment schemes. Use may be made of stocklending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA Rules.

As the Manager's annual fee is taken from capital, this will mean that capital may be eroded or growth restricted to the extent of the charge and that, while there may as a result be a reduction in liability for Capital Gains Tax, there will be some increase in Income Tax liability for tax paying unitholders. All other income expenses are paid out of the fund's income.

***On 3 April 2017 the fund moved from IA All Companies to IA UK Equity Income sector.
