

Investment objective

The objective of the fund is to provide long term growth by investing in a portfolio of other authorised funds, worldwide equities, fixed interest stocks, cash and money market instruments.

The investment manager will take a fundamental and value driven approach to portfolio allocation, dependent on the relevant attractions of the world equity, fixed interest and currency markets. The fund will take an aggressive view of the stock market weightings in the portfolio, when compared to a neutral world market capitalisation.

Fund Launch Date	31 December 1997

Important information

The information on this factsheet is as at 31.07.2014 and refers to the A Accumulation share class unless stated otherwise. Past performance is not a guide to future returns. The value of investments and any income may fluctuate and investors may not get back the full amount invested. This fund may experience high volatility due to the composition of the portfolio or the portfolio management techniques used. This document is provided for the purpose of information only. Before investing you should read the key investor information document (KIID) as it contains important information regarding the fund, including charges, tax and fund specific risk warnings and will form the basis of any investment.

The prospectus, KIID and application forms are available from Capita Financial Managers, the Authorised Corporate Director of the Fund. Miton is a trading name of Miton Asset Management the Investment Manager of the Fund which is authorised and regulated by the Financial Conduct Authority and is registered in England No. 1949322 with its registered office at 51 Moorgate, London, EC2R 6BH.

Fund statistics over 3 years

	Fund
Annualised volatility (%)	3.7
Annualised alpha (%)	0.6
Beta	0.0
FE risk rating	33

Annualised volatility

A measure which describes the fluctuation of a fund's price over time. While volatility is specific to a fund's particular mix of investments, higher volatility is generally considered to equate to higher risk.

Annualised alpha

A measure of a fund's performance by comparison to its sector representing the return of the fund when the sector is assumed to have a return of zero and indicates the extra value that the manager's activities have contributed.

Beta

A statistical estimate of a fund's volatility by comparison to that of its sector. A fund with a Beta close to 1 means that the fund will move generally in line with the sector. Higher than 1 and the fund is more volatile than the sector.

FE risk rating

Measures the volatility of the fund relative to the FTSE 100 index, which has a risk rating of 100. Funds more volatile than the FTSE 100 have a score above 100 and vice versa.
