<b><i>Equity holdings</i></b>	<b>%</b>	<b><i>Smaller Companies - the opportunity</i></b>
Tractor Supply (USA)	3.2	For many years McInroy & Wood Ltd (parent of McInroy & Wood Portfolios Limited), has taken an active interest, on behalf of its clients, in smaller companies. "Smaller", in this context, means companies whose market capitalisation is normally less than those included in the leading equity indices in the USA, UK, and Europe. However, the portfolio also includes some slightly larger companies, mostly as a result of the growth of the original investments.
Boiron (France)	3.1	
Barr A G (UK)	3.0	
Anika Therapeutics (USA)	3.0	MW created the McInroy & Wood Smaller Companies Fund in order to afford clients and other investors a well-diversified international portfolio of smaller company investments.
Teleperformance (France)	2.9	
O'Reilly Automotive (USA)	2.8	
Spectris (UK)	2.7	MW believes there are particularly attractive long-term investment opportunities to be found among such companies. Over the past 30 years global investment institutions have come increasingly to dominate the leading investment markets. Their buying naturally has been concentrated on the biggest and most liquid stocks, rather than smaller companies, however attractive their values and prospects may be. Many smaller companies should continue to grow very profitably and, in the absence of a large institutional following, can be bought at relatively attractive prices.
Anixter International (USA)	2.7	
RPS (UK)	2.6	
Belimo (Switzerland)	2.6	As a specialist private client firm, MW is much less hampered than giant institutions by liquidity considerations in its investment selections, and is in a strong position to exploit the present opportunity on behalf of its clients. Market movements since the inception of the Smaller Companies Fund in 2001 have already gone some way towards fulfilling MW's expectation that well selected investments in the smaller companies sector would prove rewarding. Successful smaller companies can be expected to continue to perform well.

#### A Word of Caution

You should remember that the price of units and the income from them may go down as well as up. Gains are not necessarily achieved in the short term. Exchange rate fluctuations may also cause the value of an investment to rise and fall. More information about risk may be found in the full Prospectus under "Risk Warnings".
