# Rathbones Look forward

# Rathbone Global Opportunities Fund

#### Investment objective

The objective of the fund is to provide above average long term capital growth from a global portfolio. The fund will be able to invest in any transferable security in all recognised world financial markets. The income yield will be at best minimal.

#### **Fund snapshot**

This is a global stock-picking fund that invests in under-the-radar and outof-favour growth companies. Our active management approach is flexible around company size, sector and geography, although our sweet spot is midsized growth companies in developed markets. We avoid direct holdings in emerging markets. The fund is a concentrated portfolio of 40 to 60 holdings that represent our highest-conviction, best ideas. We invest in unblemished, innovative, differentiated, scalable and sustainable growth companies that are shaking up their industries. This growth-oriented investment style also takes a responsible approach to risk and embraces a sell discipline without emotion. We hold a defensive bucket of holdings that are less economically sensitive, with slower and steadier growth prospects, for risk management purposes.
