## Investment opportunities

- The Group draws on Henley Investment Centre's great heritage of income investing, recognising the importance of dividends as a key driver of investment returns.
- In particular, we are finding interesting ideas in the financials, energy and industrials sectors.
- From a regional perspective, we remain convinced that European and Asian equities are the stand-out opportunity globally in terms of valuation and dividend yield.

## Fund objective

- The objective of the fund is to generate a rising level of income together with longterm capital growth.
- The fund invests primarily in shares of companies globally.
- The fund may use derivatives (complex instruments) to manage the fund more efficiently, with the aim of reducing risk, minimising costs and/or generating additional capital or income.
- The fund is actively managed within its objectives and is not constrained by a benchmark.

## Fund strategy

The fund adopts a 'total return' approach, seeking to deliver a combination of above average income as well as capital growth. Constructed of around 40-60 stocks, it is invested in what the Global Equity Income Group, Henley Investment Centre, believes to be high quality companies at attractive valuations. We view such companies as those that can sustain profit margins and deliver positive returns through the economic cycle. By focusing on companies with robust balance sheets, strong cash flows and good management teams, the fund has tended to participate less in falling markets over the long term.

**Past performance is not a guide to future returns.** Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the periods prior to this launch date, performance figures are based on the accumulation share class, without any adjustment for fees. Performance figures for all share classes can be found in the relevant Key Investor Information Document. Fund performance figures are shown in sterling, inclusive of reinvested income and net of the ongoing charge and portfolio transaction costs to 31 March 2019 unless otherwise stated. Sector average performance is calculated on an equivalent basis. The standardised past performance information is updated on a quarterly basis. Source: Lipper.

### Investment risks

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

The fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the fund. The Manager, however, will ensure that the use of derivatives within the fund does not materially alter the overall risk profile of the fund.

### Important information

- <sup>1</sup> Membership of the Global Equity Income Group, Henley Investment Centre can be found at [www.invesco.co.uk](http://www.invesco.co.uk). Nick Mustoe shown in picture.
- <sup>2</sup> All fund portfolio figures within this leaflet are as at 31 March 2019 (source: Invesco).
- <sup>3</sup> The Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market price of the fund, as at the date shown. It does not include any entry charge and investors may be subject to tax on their distributions. The fund's ongoing charge is charged to capital. This has the effect of increasing the distributions for the year by the amount of the ongoing charge and constraining the fund's capital performance to an equivalent extent.
