## Fund Objective

To outperform (after deduction of costs) the S&P Global Small Cap Index, as stated in sterling, by at least 2% per annum over rolling five-year periods.

The manager believes this is an appropriate benchmark given the investment policy of the Fund and the approach taken by the manager when investing. There is no guarantee that this objective will be achieved over any time period and actual investment returns may differ from this objective, particularly over shorter time periods.

## Investment Proposition

The Fund invests in companies that offer significant growth prospects with an emphasis on companies operating in industries with potential for structural change and innovation.

The Fund's holdings will, by their nature, offer a wide range of potential outcomes. We aim to embrace this uncertainty and believe it is important that the portfolio is adequately diversified by name and thematic influence; and sufficiently broad so as to be open to the inclusion of new ideas.

The Fund has a bias towards smaller companies.

## Additional Fund Information

The Fund is a sub-fund of the Baillie Gifford Overseas Growth Funds ICVC (Investment Company with Variable Capital) which is an umbrella Open-Ended Investment Company. Its Authorised Corporate Director ('ACD') is Baillie Gifford & Co Limited.

The Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

The ongoing charges figure is based on the expenses for the financial year and may vary from year to year. It excludes the cost of buying and selling assets for the Fund although custodian transaction costs are included. Further explanation of all the charges and costs relating to this Fund can be found in the Enhanced Disclosure of Fund Charges and Costs document which is available through our website, [www.bailliegifford.com](http://www.bailliegifford.com)

Active Share is a measure of how actively managed a Fund is and is calculated by taking 100 minus the % of the Fund that overlaps with the comparative index. An active share of 100 indicates no overlap with the comparative index and an active share of zero indicates a portfolio that tracks the comparative index. We have chosen to show Active Share against the S&P Global Small Cap Index.

Turnover is calculated by taking the smaller figure of either total purchases or total sales for the month and dividing it by an average market value. The Annual Turnover is then calculated as the sum of the monthly turnover figures for the 12 month period.

## Risk Warnings

Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and investors may not get back the amount invested.

The specific risks associated with the Fund include:

- Investment in immature companies is generally considered higher risk given their less developed business models and less established positions. Changes in their share prices may be greater than those of more established companies and the shares may be harder to sell. Immature companies may do less well in unfavourable economic conditions.
- The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
- Custody of assets involves a risk of loss if the custodian becomes insolvent or breaches duties of care.
- The Fund's share price can be volatile due to movements in the prices of the underlying holdings and the basis on which the Fund is priced.

Further details of the risks associated with investing in the Fund can be found in the Key Investor Information Document, copies of which are available at [www.bailliegifford.com](http://www.bailliegifford.com), or the Prospectus which is available by calling the ACD
