

# Rathbone Global Opportunities Fund

## Investment objective

The objective of the fund is to provide above average long term capital growth from a global portfolio. The fund will be able to invest in any transferable security in all recognised world financial markets. The income yield will be at best minimal.

## Fund snapshot

This is a global stock-picking fund that invests in under-the-radar and out-of-favour growth companies. Our active management approach is flexible around company size, sector and geography, although our sweet spot is mid-sized growth companies in developed markets. We avoid direct holdings in emerging markets. The fund is a concentrated portfolio of 40 to 60 holdings that represent our highest-conviction, best ideas. We invest in unblemished, innovative, differentiated, scalable and sustainable growth companies that are shaking up their industries. This growth-oriented investment style also takes a responsible approach to risk and embraces a sell discipline without emotion. We hold a defensive bucket of holdings that are less economically sensitive, with slower and steadier growth prospects, for risk management purposes.
