Fund & Fund Manager Ratings

Fund Objectives

The Fund aims to generate positive returns over a rolling 3 year basis. However, there is no guarantee that this objective will be met and there is always the potential of loss to some, or all, of your original capital.

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

Fund Strategy

To assemble a portfolio of investments which have a lower risk than equities and which, in most cases, have a degree of inherent protection from falls in equity markets.

To construct a portfolio which contains within it a number of investments which have in the past proved to be lowly correlated or even inversely correlated with equity markets.

To generate a positive return over a 3 year rolling period.

Each stock in the Fund is expected to achieve a return in excess of LIBOR in steady interest rate and benign market conditions.
