

Man GLG UK Income Fund

MONTHLY SUMMARY REPORT: 31 DECEMBER 2018

REPORTING CLASS: Man GLG UK Income Fund Professional Acc C

FUND AIM

Man GLG UK Income Fund seeks a level of income above the FTSE All Share Index together with some capital growth by investing, directly or indirectly, primarily in equities and equity linked securities (securities whose returns are determined by the performance of the underlying equities) of UK companies or of companies which derive a substantial part of their revenues from the UK.

A complete description of fund aims is set out in the fund's prospectus.

FUND RISKS

The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested. Prior to investing in the Fund investors should carefully consider the risks associated with investing, whether the Fund suits their investment requirements and whether they have sufficient resources to bear any losses which may result from an investment in the Fund. Investors should only invest if they understand the terms on which the Fund is offered. Investors should consider the following risks and where appropriate seek professional advice before investing: **Market Risk, Counterparty Risk, Currency Risk, Liquidity Risk, Financial Derivatives Instruments, Single Region/Country.** More details can be found in the risk glossary.

Prior to making investments investors should read and consider the fund's offering documents.

PERFORMANCE CHART (SINCE INCEPTION)

Source: Man Group plc (31 December 2018)

Reference Index represented by: FTSE ALL SHARE (GBP, NDTR)

PERFORMANCE STATISTICS (SINCE INCEPTION)

	Reporting Shareclass	Reference Index	Relative
Annualised Return	5.44%	4.74%	0.70%
Annualised Volatility	14.60%	13.50%	1.11%
Sharpe Ratio ²	0.18	0.14	0.04
Correlation	0.92	N/A	N/A
Beta	1.00	N/A	N/A
Information Ratio	0.12	N/A	N/A
Tracking Error	5.73%	N/A	N/A

² Sharpe ratio is an absolute measure of risk-adjusted return, negative Sharpe ratios are not shown as they can be misleading.

Past Performance is not indicative of future performance. Returns may increase or decrease as a result of currency fluctuations. Performance data is shown net of the reporting class Ongoing Charge Figure (or TER), performance fees and transaction costs and gross of taxes with gross dividend income reinvested, and does not take into account sales and redemption charges where such costs are applicable. Other share classes may charge different fees.

SYNTHETIC RISK & REWARD INDICATOR (SRRI)

See Glossary for an explanation of the SRRI Calculation

COMMENTARY

The Fund fell by 2.2% during the month compared to a fall of 3.8% for the FTSE All Share Total Return. Over the year the Fund fell by 7.3% compared to a fall of 9.5% for the FTSE All Share Total Return.

We are currently writing our Outlook document for this year which will provide full attribution for the year as a whole as well as our outlook for 2019.

Specifically during December good performance came from Hollywood Bowl which rose by 19.5% in the wake of good full year results. Further to a good profit performance and excellent execution of the continued roll out, the company signalled its intention to complement the full year dividend with a special dividend. Our process attempts to isolate dividend surprise through exposure to superior balance sheet and cashflow metrics and it was pleasing to see this being delivered. Further to this, there was also a positive contribution from Diversified Gas and Oil, the natural gas and oil producer, who issued a trading statement where they upgraded Ebitda guidance by over 20%. The shares responded positively to the tune of 10% and on only circa 8x forward earnings and a prospective yield of over 8% we remain happy holders.

On the downside Costain the construction company fell by 15%. There was no stock specific news but the market continues to digest the Kier rights issue and surmises that the entire sector is at risk. In our opinion there are meaningful differences between Costain and Kier. The most important is that the company enjoys a meaningful net cash balance sheet, the margin profile is superior and the visibility provided by the order book is greater. While the current malaise is frustrating the valuation of circa 8x earnings with a yield of over 5% is ever more attractive in our opinion.

With trading activity in mind, we sold our bonds in DNO, the Norwegian oil company. While the coupon of 8.75% is attractive and capable of providing an equity like return, even with the bonds standing at a small premium to par, our decision to sell was threefold. Firstly the bonds have been exceptionally stable in an increasingly volatile market. Secondly the company signalled its desire to bid for Faroe Petroleum which has the potential to alter the financial position of the company from net cash to net debt. Finally and perhaps predictably we felt we needed to be conscious of the significant weakness in the oil price.

With purchases in mind we continued to build a position in Easyjet. The shares have been weak this year falling by over 20% to a level similar to the one seen in the wake of Brexit in June 2016. However from a value perspective the shares are now well supported by asset value and the earnings profile is supported by the recent move in the oil price. The headline valuation of less than 9x earnings is also attractive in our opinion and the yield is over 5% which is largely payable at the end of February.

As ever we continue to thank our investors for their support and look forward to communicating in greater detail with our outlook document shortly.

RISK GLOSSARY

Market Risk - The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets. Therefore, the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.

Counterparty Risk - The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.

Currency Risk - The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.

Liquidity Risk - The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.

Financial Derivatives Instruments - The Fund may invest in financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) typically for hedging purposes. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The use of FDI may multiply the gains or losses.

Single Region/Country - The Fund is a specialist country-specific or geographic regional fund, the investment carries greater risk than a more internationally diversified portfolio.

A complete description of risks is set out in the Fund's prospectus.

GLOSSARY

Active Share	Active share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the reference index.
Annualised Return	An annualised total return is an average amount of money earned by an investment each year over a given time period. It is calculated to show what an investor would earn over a period of time if the annual return was compounded.
Annualised Volatility	Volatility is the rate and extent at which the price of a portfolio, security or index, moves up and down. If the price swings up and down with large movements, it has high volatility. If the price moves more slowly and to a lesser extent, it has lower volatility. It is used as a measure of the riskiness of an investment. Annualised volatility is an average annual amount of volatility over a given time period.
Beta	A measure of how sensitive an investment portfolio is to market movements. The sign of the beta (+/-) indicates whether, on average, the portfolio's returns move in line with (+), or in the opposite direction (-), to the market. The market has a beta of 1. If the portfolio has a beta of less (more) than 1, it means that the security is theoretically less (more) volatile than the market.
Correlation	A measure of the interdependence or strength of the relationship between two investments. A correlation of 1 means that the two investments are perfectly synchronised, -1 implies that they move in symmetrically opposite directions and 0 means no relationship between them.
Distribution Yield	The distribution yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the fund's net asset value per share as at the date shown, and may be estimated. It does not include any initial charge and investors may be subject to tax on distributions.
Entry Charge	The entry charge shown is a maximum figure and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.
Exposure	This refers to the part of a portfolio that is subject to the price movements of a specific security, sector, market or economic variable. It is typically expressed as a percentage of the total portfolio, e.g. the portfolio has 10% exposure to the mining sector.
Information Ratio	A ratio of portfolio returns above the excess returns of a benchmark (usually an index) to the volatility of those returns. The ratio measures a portfolio manager's ability to generate excess returns relative to a benchmark. Volatility is measured using tracking error.
Market Cap	The market value of a company's outstanding shares. The micro dollar market capitalisation is from 0 to \$500m, the small dollar market capitalisation is from \$500m to \$2.5bn, the mid dollar market capitalisation is from \$2.5bn to \$5bn, the large dollar market capitalisation is from \$5bn to \$12.5bn and the mega dollar market capitalisation is \$12.5bn and above.
NAV	The Net Asset Value (NAV) represents the value per share. It is calculated by dividing the total net asset value of the fund (the value of the fund's assets less its liabilities) by the number of shares outstanding.
Ongoing Charge Figure (OCF)	The OCF is based on expenses and may vary from year to year. It includes management fees but excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund. The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
Overweight/Underweight	Refers to a fund's position in line with its chosen reference index. Overweight means a fund holds more of a certain security than the reference index and underweight means a fund holds less of a certain security compared to its reference index.
Performance Fee	The payment made to an Investment Manager if certain performance levels are achieved (often over and above any levels set out in the investment objective) within a set time period. Please refer to the fund's prospectus for a complete description.
Position Concentration	The proportion of a portfolio's net asset value represented by the largest (e.g. 5/10/20) positions.
Quartile Ranking	Quartile rankings are a measure of how well a fund has performed against a group of similarly categorised funds. The rankings range from 1 to 4, with 1 representing the fund's performance being in the top 25% of funds in its sector.
Redemption Fee	This is the maximum amount by which your investment may be reduced prior to the proceeds being paid out.
Sector (i)	A sector is an area of the economy in which businesses share the same or a related product or service. It can also be thought of as an industry or market that shares common operating characteristics. Dividing an economy into different pieces allows for more in-depth analysis of the economy as a whole.
Sector (ii)	A peer group of funds which have a similar investment objective or invest in the same type of assets. These are organised by independent companies such as the Investment Association in the UK. The average performance of a sector is often used to compare with the performance of an individual fund in the sector.
Sharpe Ratio	The Sharpe Ratio is a measure for calculating risk-adjusted return, and has become the industry standard for such calculations. The Sharpe Ratio is the average return earned in excess of the risk-free rate per unit of volatility or total risk. The higher the ratio the better, with a number greater than 1 usually considered good, a number greater than 2 considered very good and a ratio of 3 or higher considered excellent. As it is an absolute measure of risk-adjusted return, negative Sharpe Ratios can be misleading and are therefore shown as N/A.
Synthetic Risk & Reward Indicator (SRRI)	Featured on the Key Investor Information Document (KIID), the SRRI is a measure of the overall risk and reward profile of a fund. Funds are categorised on a scale from 1 to 7 where 1 is the lowest risk and 7 is the highest. Typically, the SRRI is derived from the volatility of past returns over a 5-year period. Investors should be aware the indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean risk free.
Tracking Error	Tracking error is a measure of the divergence between a portfolio's returns and the benchmark or index against which it is managed.
YTD	Year-to-date.

Important information

The Fund is a sub-fund of Man UK ICVC, domiciled in the United Kingdom and registered with the Financial Conduct Authority. Full details of the Fund objectives, investment policy and risks are located in the Prospectus which is available with the Key Investor Information Document in English and in an official language of the jurisdictions in which the Fund is registered for public sale, together with the Report and Accounts of the UCITS. The Fund's documentation are available free of charge from the local information/paying agent, from authorised distributors and from www.man.com.

In order to fulfil the fund's objectives the Prospectus allows the manager the ability to invest principally in units of other collective investment schemes, bank deposits, derivatives contracts designed with the aim of gaining short term exposure to an underlying stock or index at a lower cost than owning the asset, or assets aiming to replicate a stock or debt securities index.

The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Alternative investments can involve significant additional risks.

The Fund and the Fund's materials may only be made available to qualified investors as defined in Article 10 para 3 lit a. and b. of the Swiss Collective Investment Schemes Act. Recipients of this material are advised to satisfy themselves with the respective regulatory rules.

Recipients of this material are deemed to be investment professionals and/or qualified investors that have employed appropriately qualified individuals to manage their financial assets and/or are a financial services entity appointed by an investor to provide fiduciary advisory and/or portfolio management services in respect of their financial assets. Information provided in response to queries regarding investment strategies and products managed by the Investment Manager will not be deemed to be provision of investment advice or personal investment recommendations, or assessment of the suitability or appropriateness of any investment products or consideration of the particular circumstances specific to any individual recipient to whom this material has been sent.

This material is not suitable for US persons.

This material is proprietary information and may not be reproduced or otherwise disseminated in whole or in part without prior written consent. Any data services and information available from public sources used in the creation of this material are believed to be reliable. However accuracy is not warranted or guaranteed. © Man 2018
