Investment objective

The objective of the fund is to achieve above average and maintainable income but without neglecting capital security and growth. The Manager intends to achieve the objective primarily through the purchase of ordinary shares with an above average yield. There is no restriction on the economic sectors or geographic areas in which the fund may invest. However, investments will always be predominantly in the ordinary shares of UK companies.

To meet these objectives, the fund may also invest, at the Manager's discretion, in other transferable securities, money market instruments, warrants, cash and near cash, deposits and units in collective investment schemes. Use may be made of stocklending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA Rules. The value of investments and the income from them may go down as well as up and you may not get back your original investment.

Emerging markets are volatile and may suffer from liquidity problems. Changes in rates of exchange between currencies may cause the value of investments to decrease or increase.

Details of tax levels and reliefs may change in the future. The value of any tax relief depends on individual circumstances. If you have doubts about your tax position, or the suitability of this investment, you should seek professional advice.

As the Manager's annual fee is taken from capital, this will mean that capital may be eroded or growth restricted to the extent of the charge and that, while there may as a result be a reduction in liability for Capital Gains Tax, there will be some increase in Income Tax liability for tax paying unitholders. All other income expenses are paid out of the fund's income.
