

Rathbone Ethical Bond Fund

Investment objective

The objective of the fund is to provide a regular, above average income through investing in a range of bonds and bond market instruments that meet strict criteria ethically and financially.

Fund snapshot

The manager runs the benchmark-agnostic fund with a strongly defined view that accounts for economic and political trends, company analysis, and thematic ideas. The investment grade fund targets a high yield with a strong ethical overlay. Once investment themes have been developed, the team carry out credit analysis to find the assets that work best within the thematic framework. Cash flow and strong balance sheets are key in determining bond selection, with the team applying the 'Four Cs Plus' principles: character, capacity, collateral and covenants. The 'Plus' is conviction - that to achieve above-average long-term performance, the team feel they must think differently to the market. After that, an ethical overlay is applied which consists of a negative screening followed by a positive screening.

You should know

Important information

Copies of the Prospectus, the Key Investor Information Document (KIID), the Supplementary Information Document (SID), and application forms may be obtained, free of charge, from Rathbone Unit Trust Management Limited.

Changes in rates of exchange between currencies may cause the value of investments to decrease or increase.

Details of tax levels and reliefs may change in the future. The value of any tax relief depends on individual circumstances. If you have any doubts about your tax position, or the suitability of this investment, you should seek professional advice.

Interest rate fluctuations are likely to affect the capital value of investments within bond funds. When long term interest rates rise the capital value of units is likely to fall and vice versa. The effect will be more apparent on funds that invest significantly in long-dated securities. The value of capital and income will fluctuate as interest rates and credit ratings of the issuing companies change.

To meet the investment objective, the fund may also invest, at the Manager's discretion, in other transferable securities, money market instruments, warrants, cash and near cash, deposits and units in collective investment schemes. Use may be made of stocklending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA rules.

As the Manager's annual fee is taken out from capital, distributable income will be increased at the expense of capital which will either be eroded or future growth constrained. All other income expenses are paid out of the fund's income.

Information notes

*From April 2018, the Ongoing Charges Figure has been calculated according to PRIIPs regulations, which came into effect on 1 January 2018. Holdings are based on six monthly audited accounts. Changes to fund holdings within this period may result in higher or lower ongoing charges.

*The historic distribution yield reflects the annualised income net of the expenses in the fund (calculated in accordance with the relevant accounting standards) as a percentage of the mid-market unit price of the fund as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any initial charge and investors may be subject to tax on their distributions.

**As from 30 June 2016 the fund's year end changed to 30 September.

Source performance data Financial Express, bid to bid, net income re-invested. This is net of expenses and tax. Data using prices as at 30.11.2018. I-Class units/shares were launched on 01 March 12. Performance is a combination of I-Class units and R-Class units (where I-Class was unavailable). ***Alpha, Beta and Volatility statistics given on a 5 year rolling basis. Alpha and Beta are calculated using the IBOXX Non Gilt Index as the benchmark. Alpha, Beta and Volatility shown is annualised standard deviation of monthly returns. †Turnover is calculated on a 1 year rolling basis.
