## Sector Analysis of Total Assets

## Investment Proposition

The Fund invests in companies that offer significant growth prospects with an emphasis on companies operating in industries with potential for structural change and innovation.

The Fund's holdings will, by their nature, offer a wide range of potential outcomes. We aim to embrace this uncertainty and believe it is important that the portfolio is adequately diversified by name and thematic influence; and sufficiently broad so as to be open to the inclusion of new ideas.

The Fund has a bias towards smaller companies.

## Risk Warnings

Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and investors may not get back the amount invested. Past performance is not a guide to future performance.

The specific risks associated with the Fund include:

- The share price of smaller, immature companies may vary more than those of larger, more established companies and the shares may be harder to sell. Smaller, immature companies may do less well in periods of adverse economic conditions.
- The Fund invests in overseas assets, priced in foreign currencies. Changes in the rates of exchange may cause the value of your shares to go down.

Further details of the risks associated with investing in the Fund can be found in the Key Investor Information Document, copies of which are available at [www.bailliegifford.com](http://www.bailliegifford.com), or the Prospectus which is available by calling the ACD.
