

MI TwentyFour Investment Funds

Dynamic Bond Fund

Factsheet | 26 February 2021

Dynamic Bond Fund is managed by TwentyFour Asset Management LLP and is a sub-fund of MI TwentyFour Investment Funds, an umbrella open-ended investment company registered under the Financial Conduct Authority as a UK Authorised Investment Company with Variable Capital. MI TwentyFour Investment Funds is classified as a UK UCITS scheme.

Fund Objective

The Fund aims to provide an attractive level of income along with an opportunity for capital growth, by investing in a broad range of bonds and fixed income assets.

Investment Approach

The Fund will adopt a highly flexible approach that enables the Investment Manager to take advantage of prevailing market conditions as they change over time. The Fund may invest in, or otherwise obtain exposure to, debt instruments from the whole range of fixed income assets including high yield bonds, investment grade bonds, government bonds, asset-backed securities, money market funds (MMFs) and other bonds (such as, for example, emerging market sovereign bonds or bank capital perpetual bonds) as determined by the Investment Manager's view on risk and reward over time.

The Fund can also use derivatives, such as interest rate and credit derivatives, to either optimise exposures or reduce them in conjunction with the Investment Manager's market viewpoint, thereby giving the Fund the opportunity to perform in both rising and declining rate environments throughout the economic cycle. The Fund may also employ synthetic short positions both for hedging purposes and to take advantage of deterioration either in the market generally or with respect to specific issuers. The Fund may also hedge some or all of its foreign exchange exposure.

Past performance is not a reliable indicator of future performance. The performance figures shown are in GBP on a mid-to-mid basis inclusive of net reinvested income and net of all fund expenses. Performance data does not take into account any commissions and costs charged when shares of the fund are issued and redeemed. The value of an investment and the income from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested.

ESG Integration Policy

The Fund considers environmental, social and governance (ESG) factors in the investment process, utilising an integrated approach.

Key Risks

- **All financial investment involves risk. The value of your investment isn't guaranteed, and its value and income will rise and fall. Investors may not get back the full amount invested.**
- Past performance is not a reliable indicator of future performance, and the Fund may not achieve its investment objective.
- Fixed income carries two main risks, interest rate risk and credit risk: (1) Where long term interest rates rise, there is a corresponding decline in the market value of bonds and vice versa; (2) Credit risk refers to the possibility that the issuer of the bond will not be able to repay the principal and make interest payments.
- Typically, sub-investment grade securities will have a higher risk of issuer default, and are generally considered to be more illiquid than investment grade securities.
- Overseas investment will be affected by movements in currency exchange rates.
- The Fund can invest in structured credit products or asset-backed securities (ABS). The issuer of such products may not receive the full amounts owed to them by underlying borrowers, which would affect the performance of the Fund. Credit and prepayment risks also vary by tranche which may affect the Fund's performance.
- The Fund has the ability to use derivatives, including but not limited to FX forwards, for hedging and EPM purposes only. This may magnify gains or losses.
- Investments in emerging markets may be affected by political developments, currency fluctuations, illiquidity and volatility.
