

Man GLG UK Income Fund

MONTHLY SUMMARY REPORT: 31 MAY 2019

REPORTING CLASS: Man GLG UK Income Fund Professional Acc C

FUND AIM

Man GLG UK Income Fund seeks a level of income above the FTSE All Share Index together with some capital growth by investing, directly or indirectly, primarily in equities and equity linked securities (securities whose returns are determined by the performance of the underlying equities) of UK companies or of companies which derive a substantial part of their revenues from the UK.

A complete description of fund aims is set out in the fund's prospectus.

FUND RISKS

The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested. Prior to investing in the Fund investors should carefully consider the risks associated with investing, whether the Fund suits their investment requirements and whether they have sufficient resources to bear any losses which may result from an investment in the Fund. Investors should only invest if they understand the terms on which the Fund is offered. Investors should consider the following risks and where appropriate seek professional advice before investing: **Market Risk, Counterparty Risk, Currency Risk, Liquidity Risk, Financial Derivatives Instruments, Single Region/Country.** More details can be found in the risk glossary.

Prior to making investments investors should read and consider the fund's offering documents.

COMMENTARY

The Fund fell by 4.8% during the month against the FTSE All-Share Total Return which fell by 3%. Year to date the Fund has risen 8.2% versus the 9% rise for the FTSE All Share Total Return.

After a strong start to the year, markets were weak as both domestic political concerns and escalating trade tensions came to the fore once again. Given the ineffectiveness of Theresa May in recent months her departure does not come as a surprise but regrettably it does little to provide clarity on the path ahead. A Conservative leadership contest will shortly be under way, and while the potential leaders have diverging views it seems reasonable to think that the success of the Brexit Party in the recent European elections will serve to focus minds on a cleaner break than was provided by the existing Withdrawal Agreement. This uncertainty served to weigh on sterling during the month.

Moving to trade, the focal point for the escalation was fears surrounding intellectual property and specifically Huawei's involvement in the impending 5G network. When this was combined with a moderation of many of the PMI surveys, then a natural reaction from market participants was to question the economic outlook. This was most clearly shown by rapidly falling bond yields with the US 10 year yield falling by 15% to 2.1%, and the UK 10 year fell below 0.9%. This is a level that we have not since the aftermath of Brexit.

Within the Fund good performance came from the Fund management firm, Intermediate Capital Group, which rose by 11%. Final results during the month were ahead of expectations, driven by good asset raising momentum and pleasing revenue margins. This was combined with an improving balance sheet and it was pleasing to see the dividend rise by 50%, which was materially ahead of expectations. It is this combination of operating momentum, conservative dividend cover and attractive free cash flow that we aim to isolate in the dividend growth portion of the portfolio.

On the downside, the combination of falling bond yields and sterling gave rise to an extension of the defensive outperformance relative to value. Our lack of ownership therefore of stocks such as Diageo and Unilever on account of valuation was a detriment to relative performance.

Further to this, we did have some extremely disappointing performance from our holding in Thomas Cook bonds which cost the Fund 57 basis points during the month. We will selectively invest in bonds where the following criteria are satisfied; where there is a listed equity with the bonds exhibiting equity-like upside, but with a preferable risk-reward profile to the listed equity given the position within the capital structure, together with the combination of both an attractive running yield and the potential for significant capital upside. Holdings this year include HSBC, and Prudential at attractive discounts to par.

Whilst conscious of the travails of the company at the back end of last year, we felt equity value existed. We were cautious towards some of the expectations around profits for the year ahead, but saw value in the airline and also their strong position in the Nordic markets. We also felt that the company had access to the equity market. As a result, at 75 pence in the pound, with a running yield of 8.5%, we saw the more than 30% upside to par as attractive. While we still believe asset value exists in the business, making the current 37p price of the bonds potentially very attractive, management now have to act quickly to reassure the credit markets and come up with a credible plan to restore confidence. News on the airline sale is crucial to this process and will be an important next step.

We continue to thank investors for their support.

RISK GLOSSARY

Market Risk - The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets. Therefore, the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.

Counterparty Risk - The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.

Currency Risk - The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.

Liquidity Risk - The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.

Financial Derivatives Instruments - The Fund may invest in financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) typically for hedging purposes. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The use of FDI may multiply the gains or losses.

Single Region/Country - The Fund is a specialist country-specific or geographic regional fund, the investment carries greater risk than a more internationally diversified portfolio.

A complete description of risks is set out in the Fund's prospectus.

GLOSSARY

Active Share	Active share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the reference index.
Annualised Return	An annualised total return is an average amount of money earned by an investment each year over a given time period. It is calculated to show what an investor would earn over a period of time if the annual return was compounded.
Annualised Volatility	Volatility is the rate and extent at which the price of a portfolio, security or index, moves up and down. If the price swings up and down with large movements, it has high volatility. If the price moves more slowly and to a lesser extent, it has lower volatility. It is used as a measure of the riskiness of an investment. Annualised volatility is an average annual amount of volatility over a given time period.
Beta	A measure of how sensitive an investment portfolio is to market movements. The sign of the beta (+/-) indicates whether, on average, the portfolio's returns move in line with (+), or in the opposite direction (-), to the market. The market has a beta of 1. If the portfolio has a beta of less (more) than 1, it means that the security is theoretically less (more) volatile than the market.
Correlation	A measure of the interdependence or strength of the relationship between two investments. A correlation of 1 means that the two investments are perfectly synchronised, -1 implies that they move in symmetrically opposite directions and 0 means no relationship between them.
Distribution Yield	The distribution yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the fund's net asset value per share as at the date shown, and may be estimated. It does not include any initial charge and investors may be subject to tax on distributions.
Entry Charge	The entry charge shown is a maximum figure and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.
Exposure	This refers to the part of a portfolio that is subject to the price movements of a specific security, sector, market or economic variable. It is typically expressed as a percentage of the total portfolio, e.g. the portfolio has 10% exposure to the mining sector.
Information Ratio	A ratio of portfolio returns above the excess returns of a benchmark (usually an index) to the volatility of those returns. The ratio measures a portfolio manager's ability to generate excess returns relative to a benchmark. Volatility is measured using tracking error.
Market Cap	The market value of a company's outstanding shares. The micro dollar market capitalisation is from 0 to \$500m, the small dollar market capitalisation is from \$500m to \$2.5bn, the mid dollar market capitalisation is from \$2.5bn to \$5bn, the large dollar market capitalisation is from \$5bn to \$12.5bn and the mega dollar market capitalisation is \$12.5bn and above.
NAV	The Net Asset Value (NAV) represents the value per share. It is calculated by dividing the total net asset value of the fund (the value of the fund's assets less its liabilities) by the number of shares outstanding.
Ongoing Charge Figure (OCF)	The OCF is based on expenses and may vary from year to year. It includes management fees but excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund. The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
Overweight/Underweight	Refers to a fund's position in line with its chosen reference index. Overweight means a fund holds more of a certain security than the reference index and underweight means a fund holds less of a certain security compared to its reference index.
Performance Fee	The payment made to an Investment Manager if certain performance levels are achieved (often over and above any levels set out in the investment objective) within a set time period. Please refer to the fund's prospectus for a complete description.
Position Concentration	The proportion of a portfolio's net asset value represented by the largest (e.g. 5/10/20) positions.
Quartile Ranking	Quartile rankings are a measure of how well a fund has performed against a group of similarly categorised funds. The rankings range from 1 to 4, with 1 representing the fund's performance being in the top 25% of funds in its sector.
Redemption Fee	This is the maximum amount by which your investment may be reduced prior to the proceeds being paid out.
Sector (i)	A sector is an area of the economy in which businesses share the same or a related product or service. It can also be thought of as an industry or market that shares common operating characteristics. Dividing an economy into different pieces allows for more in-depth analysis of the economy as a whole.
Sector (ii)	A peer group of funds which have a similar investment objective or invest in the same type of assets. These are organised by independent companies such as the Investment Association in the UK. The average performance of a sector is often used to compare with the performance of an individual fund in the sector.
Sharpe Ratio	The Sharpe Ratio is a measure for calculating risk-adjusted return, and has become the industry standard for such calculations. The Sharpe Ratio is the average return earned in excess of the risk-free rate per unit of volatility or total risk. The higher the ratio the better, with a number greater than 1 usually considered good, a number greater than 2 considered very good and a ratio of 3 or higher considered excellent. As it is an absolute measure of risk-adjusted return, negative Sharpe Ratios can be misleading and are therefore shown as N/A.
Synthetic Risk & Reward Indicator (SRRI)	Featured on the Key Investor Information Document (KIID), the SRRI is a measure of the overall risk and reward profile of a fund. Funds are categorised on a scale from 1 to 7 where 1 is the lowest risk and 7 is the highest. Typically, the SRRI is derived from the volatility of past returns over a 5-year period. Investors should be aware the indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean risk free.
Tracking Error	Tracking error is a measure of the divergence between a portfolio's returns and the benchmark or index against which it is managed.
YTD	Year-to-date.

Important information

The Fund is a sub-fund of Man UK ICVC, domiciled in the United Kingdom and registered with the Financial Conduct Authority. Full details of the Fund objectives, investment policy and risks are located in the Prospectus which is available with the Key Investor Information Document in English and in an official language of the jurisdictions in which the Fund is registered for public sale, together with the Report and Accounts of the UCITS. The Fund's documentation are available free of charge from the local information/paying agent, from authorised distributors and from www.man.com.

In order to fulfil the fund's objectives the Prospectus allows the manager the ability to invest principally in units of other collective investment schemes, bank deposits, derivatives contracts designed with the aim of gaining short term exposure to an underlying stock or index at a lower cost than owning the asset, or assets aiming to replicate a stock or debt securities index.

The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Alternative investments can involve significant additional risks.

Hong Kong: To the extent this material is distributed in Hong Kong, this material is communicated by Man Investments (Hong Kong) Limited and has not been reviewed by the Securities and Futures Commission in Hong Kong. This material can only be communicated to intermediaries, and professional clients who are within one of the professional investors exemptions contained in the Securities and Futures Ordinance and must not be relied upon by any other person(s).

Switzerland: To the extent the material is used in Switzerland the communicating entity is Man Investments AG, which is regulated by the Swiss Financial Market Supervisory Authority FINMA. The Fund has not been registered with FINMA for distribution in Switzerland nor has it appointed a Swiss paying agent or Swiss representative. The Fund and the Fund's materials may only be made available to qualified investors as defined in Article 10 para 3 lit a. and b. of the Swiss Collective Investment Schemes Act. Recipients of this material are advised to satisfy themselves with the respective regulatory rules.

Recipients of this material are deemed to be investment professionals and/or qualified investors that have employed appropriately qualified individuals to manage their financial assets and/or are a financial services entity appointed by an investor to provide fiduciary advisory and/or portfolio management services in respect of their financial assets. Information provided in response to queries regarding investment strategies and products managed by the Investment Manager will not be deemed to be provision of investment advice or personal investment recommendations, or assessment of the suitability or appropriateness of any investment products or consideration of the particular circumstances specific to any individual recipient to whom this material has been sent.

This material is not suitable for US persons.

This material is proprietary information and may not be reproduced or otherwise disseminated in whole or in part without prior written consent. Any data services and information available from public sources used in the creation of this material are believed to be reliable. However accuracy is not warranted or guaranteed. © Man 2019
