

# Rathbone Global Sustainability Fund

## Investment objective

We aim to deliver a greater total return than the FTSE World Index, after fees, over any five-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (dividend payments). We use the FTSE World Index as a target for our fund's return because we want to offer you higher returns than global stock markets.

We also compare our fund against the Investment Association (IA) Global sector to give you an indication of how we perform against other funds in our peer group. Like us, the funds in this sector invest globally, although most of them don't invest using a sustainability framework.

## Investment strategy

Sustainable investing means different things to different people. For us, sustainable investing is about long-term value creation for investors, society and the environment.

We invest in companies that operate sustainably and are committed to helping achieve the United Nations Sustainable Development Goals. We avoid companies that fail our rigorous sustainability criteria. We believe that companies displaying strong environmental, social and governance policies and practices are likely to be well positioned to deliver long-term value for investors. As shareholders we work with companies to encourage best practice and highlight any concerns we have.

When choosing investments we use our own trinity of risk framework: price, business and financial. We look for businesses that offer good value and make strong and consistent profits with high quality earnings - those that are backed by real cash rather than accounting contrivance. Companies shouldn't have more debt than they can handle.

## You should know

### Important information

Copies of the Prospectus, the Key Investor Information Document (KIID), the Supplementary Information Document (SID), and application forms may be obtained, free of charge, from Rathbone Unit Trust Management Limited.

Emerging markets are volatile and may suffer from liquidity problems. Changes in rates of exchange between currencies may cause the value of investments to decrease or increase.

Details of tax levels and reliefs may change in the future. The value of any tax relief depends on individual circumstances. If you have doubts about your tax position, or the suitability of this investment, you should seek professional advice.

To meet the investment objective, the fund may also invest, at the Manager's discretion, in other transferable securities, money market instruments, warrants, cash and near cash, deposits and units in collective investment schemes. Use may be made of stocklending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA Rules.

The annual management charge and other income expenses are paid out of the fund's capital.

### Information notes

^From April 2018, the ongoing charges figure has been calculated according to PRIIPs regulations, which came into effect on 1 January 2018. Holdings are based on six monthly audited accounts. Changes to fund holdings within this period may result in higher or lower ongoing charges.
