Morningstar OBSR Fund Management Rating

Bronze

Fund launch date 12 June 1987

Fund size £1,197.90m

Legal status UK authorised ICVC

Yield (Accumulation share class) 1.59%  
Historic yield<sup>2</sup>

Income distribution date 28 February

Accounting period ends 31 December 30 June

Available within an ISA? Yes

### Market commentary

A small fall in the FTSE All-Share index in July has meant that the recent low level of volatility and modest monthly changes in the UK equity market has been maintained. Notwithstanding this, the economic news remains encouraging with the economy continuing to expand. The preliminary estimate of GDP was released which showed a quarterly rise of 0.8%. The latest unemployment figures were also released which showed a further fall to 6.5% and this rate was the lowest since December 2008. Additionally CPI inflation showed a rise from 1.5% in May to 1.9% in June. Companies in the news included Rio Tinto which announced encouraging Q2 production figures. Friends Life announced an agreement to sell Lombard International and to use the proceeds to help fund a buy-back of its shares. BP announced results for the second quarter in which it said that any sanctions imposed internationally on Russia may have negative implications for its business there.

### Fund strategy

Over the last two years the UK equity market has made a considerable recovery, which we believe has allowed UK stock market valuations of companies to move closer to fair value. Despite this we believe that corporate earnings can grow from here, albeit at a more modest pace. Combining this with the ability to find value in individual companies, the fund manager believes positive returns can be made over the medium term.

### Investment objective

The Invesco Perpetual UK Growth Fund aims to achieve capital growth in the UK. The fund intends to invest primarily in companies listed in the UK. In pursuing this objective the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

## Five year performance

— Invesco Perpetual UK Growth Fund (Accumulation share class)  
— IMA UK All Companies Sector

**Past performance is not a guide to future returns.** The chart shown above should be viewed in conjunction with the 'Standardised rolling 12-month performance' table overleaf.

- <sup>1</sup> All fund portfolio figures within this leaflet are as at 31 July 2014 (source: Invesco Perpetual).
- <sup>2</sup> The Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market price of the fund, as at the date shown. It does not include any entry charge and investors may be subject to tax on their distributions.
- <sup>3</sup> The Industry Classification Benchmark is a joint product of FTSE International Limited and Dow Jones & Company, Inc. and has been licensed for use in our industry sector breakdown.

### Investment risks

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

The fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments, reduce the costs of investing or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the fund. The Manager, however, will ensure that the use of derivatives within the fund does not materially alter the overall risk profile of the fund.

### Important information

Where Invesco Perpetual has expressed views and opinions, these may change.
