

### Investment objective

The Company invests primarily in UK securities with the long term objective of achieving:

- 1) an increase of the Net Asset Value per share by more than the growth in the FTSE All-Share Index; and
- 2) growth in dividends per share by more than the rate of UK inflation.

Further details of the investment trust's Investment Policy and Risk and Investment Limits can be found in the Report of the Directors contained within the investment trust's Annual Financial Report.

### Key facts

Ordinary share price performance figures have been calculated using daily closing prices, on a sterling basis to 31 October 2014, except where otherwise stated, with dividends reinvested. Ordinary share NAV performance figures have been calculated using daily NAV, on a sterling basis to 31 October 2014 with dividends reinvested. The NAV used excludes current period revenue and values debt at par. Graph figures are at the end of the relevant month unless otherwise stated. Standardised past performance figures are to 30 September 2014. Source: Morningstar

<sup>1</sup> All performance figures should be viewed in conjunction with the standardised rolling 12-month performance table.

### Manager's report

#### Market and economic review

The FTSE All-Share index generated a negative total return over the month of -0.7%. Year-to-date, the index remains flat (-0.1%). UK inflation continued to hover at around a 5 year low while the recent fall in oil prices, if sustained, should provide a boost to consumer spending, not least as a result of falling energy bills. Reynolds American saw its share price rise strongly after posting a third quarter profit that beat analysts' estimates. BTG, having last month received the positive news that its DC Bead® oncology product had been approved for distribution in China in September, revealed further positive news in its October pre-close statement which suggested its full year numbers were on track to be at the top end of its guidance range despite adverse foreign exchange movements. Detractors to the investment trust's performance included Rolls-Royce which warned that sales would decline this year and could fall again in 2015 as a result of lower demand for defence equipment due to a deteriorating global economic backdrop, client specific order delays, and Russian sanctions. Drax Group also witnessed weakness in its share price as global energy prices continued to decline.

#### Portfolio review

The key issues which are expected to continue to overshadow the performance of the equity market remain the interplay between growing investor pessimism on the global economic outlook and the ability of policymakers to create the conditions to reinvigorate growth prospects where necessary.

The overall background for companies' revenue growth is likely to remain subdued into 2015 which we believe will give rise to further profit warnings which have been a feature of the recent news-flow in the market.

The investment trust strategy is therefore largely unchanged from the recent past. The fund manager puts a high price on the companies in the market which offer visibility of revenues, profits and cash-flows in this low growth world and which are managed for the sole purpose of delivering shareholder value in the form of a sustainable and growing dividend.

#### Investment trust history and structure

The Company has recently appointed Invesco Fund Managers Limited ('the Manager') as its Alternative Investment Fund Manager. The Manager is an associated company of Invesco Asset Management Limited ('IAML'), the Company's previous investment manager, which will continue to act as portfolio manager under delegated authority from the Manager and as company secretary and administrator. No changes are proposed to the way the Company's assets are invested as a result of the implementation of Alternative Investment Fund Managers Directive.

The current number of ordinary shares in issue is 195,116,734.

The investment trust is authorised to buy back up to 14.99% of its ordinary shares for cancellation.

The Directors also obtained shareholder approval to authorise the allotment of up to 10% of the Company's issued share capital.

These authorities are renewed yearly to assist in discount control management. The current authorities were approved by shareholders at the 18 July 2014 AGM.

The investment trust has the following prior charges in issue:

- £100 million 7.75% debenture stock 2022

£100 million 364 day credit facility with Bank of New York Mellon

Shares in the investment trust are listed on the London Stock Exchange.

The investment trust is managed by Mark Barnett.

---

### Important information

Issued on behalf of the board of the Edinburgh Investment Trust plc by Invesco Fund Managers Limited.

The value of investments and any income will fluctuate (this may partly be as a result of exchange rate fluctuations) and investors may not get back the full amount invested.

The investment trust may invest in derivatives. This means that the net asset value of the investment trust may, at times, be highly volatile. The use of derivative instruments involves certain risks (including market or communication breakdown, counterparty failure and credit risk) and there is no assurance that the objectives for the use of such instruments will be achieved.

The investment trust may use borrowings to invest in the market. The use of borrowings may enhance total return when the value of the investment trust's assets is rising, but it will have the opposite effect when asset values fall. The use of borrowings may increase the volatility of the share price and the net asset value per share. In certain circumstances, the investment trust may be required to repay borrowings and this could adversely affect income and capital returns.

When making an investment in an investment trust you are buying shares in a company that is listed on a stock exchange. The price of the shares will be determined by supply and demand. Consequently, the share price of an investment trust may be higher or lower than the underlying net asset value of the investments in its portfolio and there can be no certainty that there will be liquidity in the shares.

Where securities are mentioned in this document they do not necessarily represent a specific portfolio holding and do not constitute a recommendation to purchase or sell.

Where Invesco Perpetual has expressed views and opinions, these may change.
