Fund objective

The investment objective of the Fund is to replicate the performance of the MSCI Emerging Markets Index (the "Index"), while minimising as far as possible the tracking error between the Fund's performance and that of the Index.

Risk of investing in the fund

Market risk: The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested.

Currency exchange risk: Where overseas investments are held the rate of currency exchange may also cause the value of such investments to fluctuate.

Emerging market risk: Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in established markets.

Investors and potential investors should read and note the risk warnings in the prospectus and relevant Key Investor Information Document before making an investment decision.

Russia Risk: There are significant risks inherent in investing in Russia, which could affect the value of investment. These include a lack of clarity in laws and regulations in the following areas: investor protection, banks and other financial services, the Russian economic system, taxation, transaction settlement and fiduciary duty and responsibilities of company management. Please see the supplement for full information.

You should read and note the risk warnings in the prospectus, the relevant Key Investor Information Document (KIID) and the details in the Supplementary Information Document (SID).
