Physical Replication

Xtrackers Physical Palladium ETCs are backed by a direct investment in the underlying physical palladium. The issuer has direct and sole ownership of the palladium which is stored in secure vaults in London. Each physical ETC security entitles the holder to a specified quantity of palladium (the “Metal Entitlement”) of the segregated pool owned by the issuer. The value of the security is a function of the Metal Entitlement, the palladium spot price and any applicable fees. Xtrackers Physical Palladium ETCs combine the advantages of physical palladium ownership, e.g. exposure to palladium spot prices and minimal counterparty exposure, with the liquidity, transparency and ease of execution typical of exchange traded products. Settlement of the ETCs will be in cash.

Limited-Recourse Assets

In respect of each series of ETC securities, the underlying physical palladium (Secured Property) is owned by the issuer and held through the secured account custodian. It is further secured in favour of the trustee on behalf of the security holders. Each series of ETC securities will have recourse only to the respective Secured Property (i.e. ring-fenced) which is not available to satisfy the claims of holders of a different series of ETC securities.

Key Advantages of Xtrackers Physical PM ETCs

- Convenience: An easy way to gain exposure to spot returns of the underlying precious metal.
- Liquidity of Xtrackers ETC: securities are traded intra-day on major European stock exchanges.
- Minimal tracking error: Returns of the ETCs are equal to the spot returns of the underlying metal minus any applicable fees.
- Physical ownership: Backed by the corresponding physical metal.
- Transparent to value: Precious metal prices are published daily in major newspapers, TV and other news sources.
- Segregated: The physical metal is stored in secure vaults and each ETC series has a security over specific metal accounts held by the custodian.

Key Risks of Xtrackers Physical PM ETCs

- Xtrackers ETC are non principal protected investments, therefore an investor's capital will be at risk up to a total loss.
- Prices of precious metals are generally more volatile than prices of other asset classes.
- Investments in ETC securities will not accrue any interest and performance is subject to the deduction of the product fee.
- The value of an investment in ETC securities may go down as well as up and past performance is not a good indicator of future performance.
- Investing in ETC securities will not make an investor the owner of the relevant metal.
- Pricing of the ETC securities on the secondary market may be at a significant discount or premium compared to the Value per ETC Security (intrinsic value) published by the Issuer.
