### **Swedish Paying Agent:**

Skandinaviska Enskilda Banken AB (publ),

Sergels Torg 2, 106 40 Stockholm, Sweden

#### Danish Representative Agent:

Nordea Bank Danmark A/S,

Issuer Services, Postboks 850, 0900 Copenhagen C, Denmark

### For the Netherlands, Norway and Finland:

M&G International Investments Limited,

mainBuilding, Taunusanlage 19, 60325 Frankfurt am Main, Germany

## AUTHORISED CORPORATE DIRECTOR'S REPORT

The Authorised Corporate Director (ACD) presents its interim investment report and unaudited financial statements for the six months ended 31 December 2012.

The sub-funds in this report are all part of an umbrella Open-Ended Investment Company (OEIC), M&G Investment Funds (3). This OEIC is an Investment Company with Variable Capital (ICVC) incorporated under the Open-Ended Investment Companies Regulations 2001. It is authorised and regulated by the Financial Services Authority (FSA) under the Financial Services and Markets Act 2000. M&G Investment Funds (3), as an umbrella OEIC, contains 10 sub-funds, each of which is a UCITS (Undertakings for Collective Investment in Transferable Securities) scheme as defined in the Collective Investment Schemes sourcebook, as issued (and amended) by the FSA:

M&G Corporate Bond Fund

M&G Dividend Fund

M&G Emerging Markets Bond Fund

M&G European Corporate Bond Fund

M&G European High Yield Bond Fund

M&G Fund of Investment Trust Shares
M&G International Sovereign Bond Fund

M&G Recovery Fund

M&G Smaller Companies Fund

M&G UK Select Fund

The Company was authorised on 8 August 2001 and was launched on 7 March 2002, following the conversion of a series of authorised unit trusts.

The Company's principal activity is to carry on business as an OEIC. The Company is structured as an umbrella company, and different sub-funds may be established by the ACD from time to time with the agreement of the Depositary and approval from the FSA. The sub-funds are operated separately and the assets of each sub-fund are managed in accordance with the investment objective and policy applicable to that sub-fund.

The interim investment report and unaudited financial statements for each sub-fund for the six months ended 31 December 2012 are set out in detail in their section of this report (see contents page).

## AUTHORISED CORPORATE DIRECTOR'S REPORT

### Investment objective of the M&G Corporate Bond Fund

The Fund aims to achieve a higher total return (the combination of income and growth of capital) from investment than would be obtainable in UK government fixed interest securities (ie gilts) of similar maturities

#### Investment policy of the M&G Corporate Bond Fund

The Fund invests mainly in sterling denominated corporate debt instruments. The Fund's exposure to corporate debt may be gained through the use of derivatives. Any currency exposures within the Fund may be managed by currency hedges into sterling. The Fund may also invest in other assets including collective investment schemes, other transferable securities and other debt instruments (including corporate debt and government and public securities denominated in any currency), cash and near cash, deposits, warrants, money market instruments and other derivative instruments.

#### Investment approach

The M&G Corporate Bond Fund is invested primarily in sterling-denominated investment grade debt. However, up to 20% of the portfolio may be invested in higher yielding corporate bonds, government debt, convertibles and preference stocks, as well as money market instruments. The fund's exposure to corporate debt may be gained through the use of derivatives.

The investment approach is very much 'top-down', therefore, the fund manager's economic outlook will determine the portfolio's duration, and in which asset classes and sectors it is concentrated.

The fund manager uses proprietary research, rather than external research. M&G's in-house team of credit analysts provides bottomup analysis of the corporate bond markets, which complements the fund manager's top-down views.

### Risk and reward profile\*

 Please note that this 'Risk and reward profile' section is based on Sterling Class 'A' shares, the nominated share class.

## INVESTMENT ACTIVITIES OVER THE REPORT PERIOD

## As at 2 January 2013, for the six months ended 31 December 2012

We adjust the positioning of the M&G Corporate Bond Fund to reflect changes in our outlook regarding interest rates and credit risk (companies' ability to repay their debts).

We started the period with a broadly defensive, or cautious, positioning from a credit risk perspective. Signs that the eurozone crisis had begun to worsen, and had started to affect economic activity outside the region, led us to reduce investments in economically sensitive areas – especially banks – and to increase our allocation to government bonds\*. As the period progressed, however, and the near-term threats to global financial stability appeared to ease, we gradually took on more credit risk in the fund. We reduced our weighting in government bonds from around 9% at the beginning of July to less than 5% at the end of the review period, and increased our holdings in bonds issued by financial institutions. Nonetheless, we remained underweight in banks relative to our peer group and continued to be highly selective when lending to firms in the sector.

The change in our interest rate risk positioning between the start and end of the period also reflects our incrementally more positive view on the global outlook. Such positioning is best observed in our adjustment of the fund's duration stance. Duration measures a portfolio's price sensitivity to fluctuations in market interest rates, with a higher duration portfolio benefiting more from a fall in rates, but suffering greater price declines when rates rise (bond prices move inversely to market interest rates, or yields). Although the fund's duration remained short relative to a comparable index, it fell from 7.0 years in July – when the weak economic backdrop suggested interest rates might remain lower than we had previously expected – to 6.4 years at the end of December – when renewed momentum in the US economy appeared to swing the balance back in favour of an earlier pickup in yields.

### **Richard Woolnough**

Fund manager

Richard Woolnough is an employee of M&G Limited which is an associate of M&G Securities Limited.

\* Corporate and government bonds are loans that are extended by an investor to an issuing entity – private sector firms in the case of corporate bonds and governments in the case of government bonds – in exchange for regular interest payments. The issuer promises to pay the holder the initial value of the loan at the end of the bond's life.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

### NOTE TO THE FINANCIAL STATEMENTS

### **Accounting policies**

The interim financial statements have been prepared on the same basis as the audited annual financial statements for the year ended 30 June 2012. They are in accordance with the historical cost convention, as modified by the revaluation of investments, and the Statement of Recommended Practice for Authorised Funds issued by the Investment Management Association in October 2010.

## AUTHORISED CORPORATE DIRECTOR'S REPORT

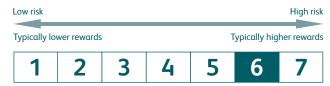

## Investment objective and policy of the M&G Dividend Fund

The Fund invests mainly in a range of UK equities with the aim of achieving a steadily increasing income stream. The Fund will target a yield higher than that of the FTSE All-Share Index. Subject to this, the aim will be to maximise total return (the combination of income and growth of capital).

#### Investment approach

The M&G Dividend Fund invests in a well diversified portfolio of UK stocks with a strong emphasis on income. The aim is to provide a level of income that is in excess of that of the FTSE All-Share Index.

#### Risk and reward profile\*

 Please note that this 'Risk and reward profile' section is based on Sterling Class 'A' shares, the nominated share class.

## INVESTMENT ACTIVITIES OVER THE REPORT PERIOD

## As at 2 January 2013, for the six months ended 31 December 2012

During the period under review, new holdings of note that were introduced to the fund included cardboard and packaging firm DS Smith, business processing company Capita and Swiss pharmaceuticals manufacturer Novartis. After struggling for many years, DS Smith has a new management team and has made a recent acquisition in Europe, which has put the firm in a much stronger competitive position. Capita was purchased following a period of share price weakness. The business is benefiting from the trend by companies towards outsourcing administrative functions. Novartis is a global drugs company with significant cost-cutting potential and some interesting prospects in the pipeline.

Market weakness was used to top up some existing holdings. One example of this was Tesco's shares, which had been acquired at the start of 2012 and presented a rare opportunity to buy into a strong dividend\*-growing stock at an attractive level. Another was Barclays, one of the few banks not requiring a government bailout, which has taken advantage of the very attractive borrowing rates offered by the Bank of England to strengthen its balance sheet.

Two holdings left the portfolio due to takeovers. These were Cove Energy, which was sold to Thailand's PTT Exploration and Production, and the UK's largest software company, Logica, which was bought out by Canadian rival, CGI.

Some of the fund's holdings were reduced, including insurer Legal & General and banking group HSBC, to lock in to some good performance. Elsewhere, positions in Vodafone and BG Group were reduced; the telecommunications firm on the back of concerns that it would have to bid up for 4G spectrum on the evidence of the Dutch auction; and oil and gas producer BG, ahead of a profit and production warning in October.

#### Alex Odd

Fund manager

Alex Odd is an employee of M&G Limited which is an associate of M&G Securities Limited.

\* Dividends represent a share in the profits of the company and are paid out to a company's shareholders at set times of the year.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

### **FUND STATISTICS**

Sterling Class 'C' shares are not generally available to all investors.

### NOTE TO THE FINANCIAL STATEMENTS

### **Accounting policies**

The interim financial statements have been prepared on the same basis as the audited annual financial statements for the year ended 30 June 2012. They are in accordance with the historical cost convention, as modified by the revaluation of investments, and the Statement of Recommended Practice for Authorised Funds issued by the Investment Management Association in October 2010.

## AUTHORISED CORPORATE DIRECTOR'S REPORT

## Investment objective of the M&G Emerging Markets Bond Fund

The Fund aims to maximise total return (the combination of income and growth of capital).

## Investment policy of the M&G Emerging Markets Bond Fund

The Fund invests mainly in debt instruments issued by emerging market borrowers, including government, government agency and corporate debt. There are no restrictions on the currencies to which the Fund may be exposed. Derivatives may be used for investment purposes as well as for efficient portfolio management. The Fund may also invest in collective investment schemes, other transferable securities (including other debt instruments), cash and near cash, deposits, warrants and money market instruments.

M&G has the discretion to identify the countries that it considers to qualify as emerging markets although these will typically be those that the IMF or World Bank define as emerging or developing economies.

### Investment approach

The M&G Emerging Markets Bond Fund aims to maximise total returns by investing mainly in emerging market sovereign and corporate debt. The investment approach begins with a top-down assessment of macroeconomic factors such as global risk appetite and structural global growth catalysts. On a regional and country-specific level, factors such as monetary and fiscal policies, capital flows, and political and regulatory environments will be assessed. The result of this analysis will help inform the fund's country and currency allocations and its duration. Individual credit selection is determined by a thorough credit analysis and an assessment of valuations. Both macroeconomic and stock-specific analysis is undertaken in close conjunction with the deputy fund manager and the internal credit analysts. The fund is diversified by investing in a range of assets across global emerging markets and is unconstrained by a benchmark with a fully flexible strategy.

#### Risk and reward profile\*

 Please note that this 'Risk and reward profile' section is based on Sterling Class 'X' shares, the nominated share class.

## INVESTMENT ACTIVITIES OVER THE REPORT PERIOD

## As at 2 January 2013, for the six months ended 31 December 2012

We substantially increased the fund's holdings in emerging market corporate bonds\* during the review period. In our view, such assets are attractively priced compared with emerging market government debt but are not necessarily much riskier. This is because most emerging market corporate bonds are denominated in US dollars, thereby reducing the risk due to currency fluctuations. Additionally, most issuers that we hold in the portfolio have globally diversified operations while many of the companies are wholly or partly state-owned.

During the six months, we established positions in a range of emerging market corporate bonds from various countries and sectors, including Abu Dhabi-based energy investment company IPIC GMTN, Russian gas giant Gazprom, Brazilian mining group Vale Overseas and Corporación Andina de Fomento, a Latin American development bank. All of these bonds are denominated in US dollars. Over the review period, the fund's holdings in corporate and supranational bonds increased from 2% to 50%.

In contrast, we reduced the fund's presence in emerging market government bonds following good performance. As valuations for these assets have risen steeply, we considered many of them to be overpriced and unlikely to offer much more upside potential. As a result, we closed stakes in Brazilian and Argentinian government bonds and decreased holdings in government bonds issued by Colombia, Indonesia, Russia and Chile. However, we initiated positions in Zambian and Bolivian government bonds and added to an existing stake in Mexican government debt due to our belief that Mexico is likely to benefit from the US economic recovery.

These changes had the effect of increasing the portfolio's allocation to the US dollar, which at the end of the review period made up about 80% of the fund. The remainder was held in the Mexican peso, Malaysian ringgit and Korean won, among others.

#### Mike Riddell

Fund manager

Mike Riddell is an employee of M&G Limited which is an associate of M&G Securities Limited.

\* Corporate and government bonds are loans that are extended by an investor to an issuing entity – private sector firms in the case of corporate bonds and governments in the case of government bonds – in exchange for regular interest payments. The issuer promises to pay the holder the initial value of the loan at

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

- [a] The date on which the interim distribution will be paid to Income shareholders and credited to Accumulation shareholders.
- [b] The Ongoing Charges Figure is the ratio of the relevant annualised total disclosable costs of each share class from the most recent reporting period to the average net asset value for that share class over the same period.
- [c] The Ongoing Charges Figure shown here is an estimate of the charges, as the share class has not been in existence for a full financial year.

Income accrued from interest-bearing securities is distributed on an effective yield basis.

[a] On 1 September 2008 the fund's objective was changed.

[b] To 2 January 2013.

[c] From 19 April 2012 (the launch date of the share class).

[d] From 3 August 2012 (the launch date of the share class).

Past performance is no indication of current or future performance and the performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

The price of shares and the income from them may go down as well as up, and you may get back less than you invested.

### NOTE TO THE FINANCIAL STATEMENTS

### **Accounting policies**

The interim financial statements have been prepared on the same basis as the audited annual financial statements for the year ended 30 June 2012. They are in accordance with the historical cost convention, as modified by the revaluation of investments, and the Statement of Recommended Practice for Authorised Funds issued by the Investment Management Association in October 2010.

## AUTHORISED CORPORATE DIRECTOR'S REPORT

## Investment objective of the M&G European Corporate Bond Fund

The Fund aims to maximise total return (the combination of income and growth of capital) while generating a higher level of income than that from European government bonds of similar maturities.

## Investment policy of the M&G European Corporate Bond Fund

The Fund invests mainly in investment grade corporate bonds denominated in any European currency. The Fund may also invest in high yield corporate bonds, government and public securities denominated in any European currency. The Fund's exposure to bonds, government and other public securities may be gained through the use of derivatives. The Fund may also invest in other assets, including collective investment schemes, other transferable securities, cash and near cash, deposits, warrants, money market instruments and other derivative instruments which may be denominated in any major global currency. Any non-European currency exposures within the fund may be managed by currency hedges in European currencies.

### Investment approach

The M&G European Corporate Bond Fund aims to maximise total returns through investing in mainly European investment grade corporate bonds. The fund also has the flexibility to invest in high yield or government bonds. The fund manager believes returns are driven by a combination of macroeconomic, asset, sector, geography and stock-level factors. A dynamic investment approach is followed, allowing the fund manager to change the blend of duration and credit exposure based on his outlook.

The fund has no benchmark, which allows for a flexible and high-conviction investment approach. A high level of diversification, across individual issuers, sectors and geographies is an essential part of the investment process.

An in-house team of independent credit analysts assists the fund manager in individual credit selection along with the monitoring of names held by the fund.

### Risk and reward profile\*

 Please note that this 'Risk and reward profile' section is based on Sterling Class 'X' shares, the nominated share class.

## INVESTMENT ACTIVITIES OVER THE REPORT PERIOD

## As at 2 January 2013, for the six months ended 31 December 2012

There were no major changes to our key sector convictions during the review period, and we still favour industries that are able to produce stable earnings throughout the economic cycle, so-called 'defensive', or 'non-cyclical' sectors, such as cable and telecommunications companies. Over the period, we invested further in some of our preferred names in these areas such as TeliaSonera and Vivendi.

The fund is mainly invested in companies based in economically stronger European countries such as Germany, the UK, the Netherlands and France. In addition, we maintained approximately 15% of the fund in US issuers based on our positive outlook for the US economy.

Within financials we maintain our preference for insurance companies along with selected banks. We slightly increased our exposure to this sector over the period and purchased bonds\* issued by some of the better quality banking names such as Lloyds TSB, Citigroup, Banco Bilbao Vizcaya Argentaria, Svenska Handelsbanken and Bank of America. We also participated in a new bond issuance by the Bank of Ireland which was offering a generous yield (prospective rate of return). Compared with the rest of the eurozone periphery, Ireland is showing some signs of progress and a slight return to growth.

We marginally reduced the fund's credit risk and sold some of the lower rated corporate bonds such as issuances by Czech coal producer New World Resources and Polish television network TVN. Although the bonds had delivered good returns, we believed they offered less potential for further significant gains.

There were no substantial changes to the fund's duration (a measure of the portfolio's sensitivity to changes in interest rates) which was 3.8 years as at the end of December. This is moderately short relative to the Merrill Lynch EMU Corporate Index and we believe it is a prudent position for the fund to take given that interest rates remain at very low levels.

### Stefan Isaacs

Fund manager

Stefan Isaacs is an employee of M&G Limited which is an associate of M&G Securities Limited.

Corporate and government bonds are loans that are extended by an investor to an issuing entity – private sector firms in the case of corporate bonds and governments in the case of government bonds – in exchange for regular interest payments. The issuer promises to pay the holder the initial value of the loan at the end of the bond's life.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

- [a] The date on which the interim distribution will be paid to Income shareholders and credited to Accumulation shareholders.
- [b] The Ongoing Charges Figure is the ratio of the relevant annualised total disclosable costs of each share class from the most recent reporting period to the average net asset value for that share class over the same period.
- [c] The Ongoing Charges Figure shown here is an estimate of the charges, as the share class has not been in existence for a full financial year.

Income accrued from interest-bearing securities is distributed on an effective yield basis.

[a] On 1 September 2008 the fund's objective was changed.

Past performance is no indication of current or future performance and the performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

The price of shares and the income from them may go down as well as up, and you may get back less than you invested.

### NOTE TO THE FINANCIAL STATEMENTS

#### **Accounting policies**

The interim financial statements have been prepared on the same basis as the audited annual financial statements for the year ended 30 June 2012. They are in accordance with the historical cost convention, as modified by the revaluation of investments, and the Statement of Recommended Practice for Authorised Funds issued by the Investment Management Association in October 2010.

# AUTHORISED CORPORATE DIRECTOR'S REPORT

### Investment objective of the M&G European High Yield Bond Fund

The Fund aims to maximise total return (the combination of income and growth of capital) while generating a high level of income.

## Investment policy of the M&G European High Yield Bond Fund

The Fund mainly invests in higher yielding debt instruments denominated in any European currency and will normally be managed to give investors exposure to European currencies. The Fund's exposure to higher yielding debt instruments may be gained through the use of derivatives. The Fund may also invest in other assets including collective investment schemes, government and public securities and other transferable securities, cash and near cash, deposits, warrants, money market instruments and other derivative instruments which may be denominated in any major global currency. Any non-European currency exposures within the fund may be managed by currency hedges in European currencies.

#### Investment approach

The M&G European High Yield Bond Fund focuses on ongoing proprietary research rather than relying on external credit ratings. Emphasis is placed upon investigating the ability of a company or government to meet its interest payments, especially during unfavourable economic conditions.

Credit risk is constantly monitored and typically spread across a variety of countries and industrial sectors. The fund's exposure to higher yielding debt instruments may be gained through the use of derivatives. Exposure to European currencies (mainly the euro) is an integral part of the management approach, and fluctuations in the exchange rates of these currencies against sterling are likely to play a significant role in determining total returns for UK-based investors.

#### Risk and reward profile\*

 Please note that this 'Risk and reward profile' section is based on Sterling Class 'X' shares, the nominated share class.

# INVESTMENT ACTIVITIES OVER THE REPORT PERIOD

### As at 2 January 2013, for the six months ended 31 December 2012

There were no major changes to our key sector convictions during the review period, and we still favour industries that are able to produce stable earnings throughout the economic cycle, so-called 'defensive', or 'non-cyclical' areas, such as packaging, telecommunication and cable companies. We invested further in some of our preferred names in these industries, such as US packaging group Reynolds, Swiss mobile and broadband provider Sunrise Communications, and South African paper manufacturer Sappi Papier.

The fund continues to be mainly invested in companies based in economically stronger European countries such as Germany, the UK, the Netherlands and Luxembourg. In addition, we maintained approximately 10% of the fund in US issuers, based on our positive outlook for the US economy. On this basis, we also purchased bonds\* issued by Mexican cement producer Cemex as we believe the company should be well positioned to benefit from a US housing market recovery.

Within financials, we maintain our preference for insurance companies along with selected banks. Further additions were made in this area, including a new issuance from the Bank of Ireland that was offering a generous yield (prospective rate of return). Compared with the rest of the eurozone periphery, Ireland is showing some signs of progress and a slight return to growth. The fund's weighting in financials rose slightly to around 10% at the end of December.

We sold a number of holdings in names which we considered to be more sensitive to changes in investor sentiment, such as luxury carmaker Aston Martin, German car parts retailer Auto-Teile-Unger and bathroom manufacturer Grohe Holdings. Although these bonds had performed well, we believed they offered less of a potential for further significant gains.

#### **James Tomlins**

Fund manager

James Tomlins is an employee of M&G Limited which is an associate of M&G Securities Limited.

\* Corporate and government bonds are loans that are extended by an investor to an issuing entity – private sector firms in the case of corporate bonds and governments in the case of government bonds – in exchange for regular interest payments. The issuer promises to pay the holder the initial value of the loan at the end of the bond's life.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

- [a] The date on which the interim distribution will be paid to Income shareholders and credited to Accumulation shareholders.
- [b] The Ongoing Charges Figure is the ratio of the relevant annualised total disclosable costs of each share class from the most recent reporting period to the average net asset value for that share class over the same period.
- [c] The Ongoing Charges Figure shown here is an estimate of the charges, as the share class has not been in existence for a full financial year.

Income accrued from interest-bearing securities is distributed on an effective yield basis.

[a] On 1 September 2008 the fund's objective was changed.

[b] To 2 January 2013.

[c] From 3 August 2012 (the launch date of the share class).

Past performance is no indication of current or future performance and the performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

The price of shares and the income from them may go down as well as up, and you may get back less than you invested.

# INTERIM FINANCIAL STATEMENTS (unaudited)

#### NOTE TO THE FINANCIAL STATEMENTS

#### **Accounting policies**

The interim financial statements have been prepared on the same basis as the audited annual financial statements for the year ended 30 June 2012. They are in accordance with the historical cost convention, as modified by the revaluation of investments, and the Statement of Recommended Practice for Authorised Funds issued by the Investment Management Association in October 2010.

# AUTHORISED CORPORATE DIRECTOR'S REPORT

### Investment objective and policy of the M&G Fund of Investment Trust Shares

The portfolio is normally limited to shares of investment trust companies. These shares provide a wide spread of investment in the UK and overseas stockmarkets and are often available at substantial discounts in relation to underlying asset values. Income is not a major factor, and the yield can be expected to be slightly less than the average for investment trust companies.

#### Investment approach

The M&G Fund of Investment Trust Shares is a diversified portfolio of approximately 60 investment companies with exposure to a wide range of international markets and investment classes. The fund manager uses his judgement to decide upon areas and investment vehicles from which long-term growth can be obtained. Additional criteria used include the investment philosophy and objective of the underlying holdings and the ability of each manager to deliver on them; and the discount at which its shares are trading. Holdings may be sold if there is a change in the fund manager's view; a failure of the underlying company to deliver on stated objectives; corporate activity, which leads the fund manager to take profits; or if the fund manager believes a holding has become overvalued.

#### Risk and reward profile\*

 Please note that this 'Risk and reward profile' section is based on Sterling Class 'A' shares, the nominated share class.

# INVESTMENT ACTIVITIES OVER THE REPORT PERIOD

### As at 2 January 2013, for the six months ended 31 December 2012

Over the review period, we added a Canadian position, Middlefield Canadian Income Trust, to increase our weighting to the North American market as a counterbalance to the fund's emerging market investments. North America is still perceived as a 'safe haven' which could have a stabilising effect should markets turn volatile again. The trust invests in a diverse range of incomegenerating Canadian companies.

A new position was also established in GCP Infrastructure Investments, a fund primarily invested in UK infrastructure debt. This, together with our existing infrastructure holding, Bilfinger Berger Global Infrastructure Fund, acts as a diversifier since infrastructure as a theme has no links to stockmarket performance. In addition, the fund should provide a relatively stable income.

In contrast, we exited BlackRock Commodities Income Investment Trust following a period of good performance in order to reduce the fund's exposure to mining. This sector tends to be more affected when the pace of economic recovery is uncertain.

We reduced positions in Aberdeen Asian Income Fund and Biotech Growth Trust to realise profits. These holdings have performed extremely well throughout the year. Also, we trimmed our holding in Advance Frontier Markets Fund for portfolio management purposes.

#### Richard O'Connor

Fund manager

Richard O'Connor is an employee of M&G Limited which is an associate of M&G Securities Limited.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

#### NOTE TO THE FINANCIAL STATEMENTS

#### **Accounting policies**

The interim financial statements have been prepared on the same basis as the audited annual financial statements for the year ended 30 June 2012. They are in accordance with the historical cost convention, as modified by the revaluation of investments, and the Statement of Recommended Practice for Authorised Funds issued by the Investment Management Association in October 2010.

# AUTHORISED CORPORATE DIRECTOR'S REPORT

### Investment objective of the M&G International Sovereign Bond Fund

The Fund aims to maximise total return (the combination of income and growth of capital) through investment in a portfolio of investment grade debt instruments.

## Investment policy of the M&G International Sovereign Bond Fund

The portfolio will primarily consist of investment grade sovereign debt securities denominated in the currencies of the major industrialised nations, with the exception of the UK. The Fund's exposure to sovereign debt may be gained through the use of derivatives. While the investment manager has power to hedge the currency risk for UK investors, the Fund will normally be managed so as to give exposure to non-sterling currencies. The Fund may also invest in other assets including government and public securities, collective investment schemes, other transferable securities, other debt instruments, cash and near cash, deposits, warrants, money market instruments and other derivative instruments.

#### Investment approach

The M&G International Sovereign Bond Fund aims to maximise total return through investing primarily in investment grade sovereign debt securities denominated in the currencies of the major industrialised nations, with the exception of the UK. The fund seeks to outperform the Citigroup Non GBP World Government Bond Index net of fees over a one-to-three year horizon, taking active country, yield curve and currency positions to generate alpha.

#### Risk and reward profile\*

 Please note that this 'Risk and reward profile' section is based on Sterling Class 'A' shares, the nominated share class.

# INVESTMENT ACTIVITIES OVER THE REPORT PERIOD

### As at 2 January 2013, for the six months ended 31 December 2012

During the six months under review, we focused on bonds (interest-bearing loans) issued by governments from stronger economies. This was based on our concerns over the unresolved eurozone debt crisis and the uncertain outlook for the global economy. Consequently, we invested in government bonds from Germany and Sweden. On the other hand, we reduced the fund's holdings in US government bonds due to our belief that a recovery in the US housing market and the economy in general would put pressure on the prices of these assets.

Outside of 'safe haven' government debt, we put money into Italian government bonds as we expected these assets to gain from the European Central Bank's actions to improve banks' access to funding. The prices of these bonds rose during the review period, benefiting the fund's performance. We also established small positions in Tunisian government bonds (backed by the World Bank) and an issue from Temasek, an investment company owned by the Singaporean government, due to the attractive prices available.

In terms of currencies, we increased the fund's allocation to the US dollar on the back of our view that the currency would benefit from the pickup in the US economy. Conversely, we reduced the fund's holdings in the Japanese yen after strong performance, while maintaining positions in the Norwegian krone, Swedish krona and Canadian dollar, among other currencies.

Finally, we shortened the fund's duration, which measures the portfolio's sensitivity to changes in yields. Yield is a bond's prospective rate of return and moves in the opposite direction to the bond's price. We maintained a long duration on the portfolio at the start of the review period relative to the index, but went short in September as we expected yields to rise amid a more optimistic market environment, especially due to the recovery in the US economy. This shift in investor mood did indeed happen, and the short duration positioning was able to protect the fund's performance towards the end of the review period.

#### Mike Riddell

Fund manager

Mike Riddell is an employee of M&G Limited which is an associate of M&G Securities Limited.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Class 'R'	0.3540	0.3540	0.92 <sup>[c]</sup>	n/a

- [a] The date on which the interim distribution will be paid to Income shareholders and credited to Accumulation shareholders.
- [b] The Ongoing Charges Figure is the ratio of the relevant annualised total disclosable costs of each share class from the most recent reporting period to the average net asset value for that share class over the same period.
- [c] The Ongoing Charges Figure shown here is an estimate of the charges, as the share class has not been in existence for a full financial year.

Income accrued from interest-bearing securities is distributed on an effective yield basis.

#### NOTE TO THE FINANCIAL STATEMENTS

#### **Accounting policies**

The interim financial statements have been prepared on the same basis as the audited annual financial statements for the year ended 30 June 2012. They are in accordance with the historical cost convention, as modified by the revaluation of investments, and the Statement of Recommended Practice for Authorised Funds issued by the Investment Management Association in October 2010.

# AUTHORISED CORPORATE DIRECTOR'S REPORT

### Investment objective and policy of the M&G Recovery Fund

The Fund predominantly invests in a diversified range of securities issued by companies which are out of favour, in difficulty or whose future prospects are not fully recognised by the market. The sole aim of the Fund is capital growth. There is no particular income yield target.

#### Investment approach

The M&G Recovery Fund invests in companies that are out of favour with the stockmarket where a good management team is making concerted efforts to turn the business around. The fund manager takes a long-term view with a typical holding period of five years or more and aims to provide a diversified portfolio of up to 100 stocks. Developing a constructive dialogue with company management is a fundamental part of the investment process and the fund manager will not invest in a company unless he has met the management team first.

#### Risk and reward profile\*

Please note that this 'Risk and reward profile' section is based on Sterling Class 'A' shares, the nominated share class.

### **INVESTMENT REVIEW**

### As at 2 January 2013, for the six months ended 31 December 2012

#### Fund update

In an era of instant communication, with fund managers increasingly being called upon to comment on the short-term share price movements of their investments, I would like to take this opportunity to reiterate that the approach we take with the M&G Recovery Fund is a long-term one. I am convinced this strategy is aligned with the requirements of our investors, who are, in general, saving to meet long-term liabilities and also more compatible with the long-term strategic views of the companies we invest in. This encourages me to believe that the best way to meet the responsibility of producing returns for our investors over many years is to back underperforming businesses for the long haul, providing financial backing and advice where necessary, and giving them time to return to health.

While we are currently weathering a period of mildly adverse performance, our long-term policy remains intact. Recovery investing is inherently risky and we know that not all of our choices will turn out as we hope. Nevertheless, we will continue to focus on finding companies with strong business franchises that are undervalued by other investors, as we have done for 43 years. We are confident that this strategy will reward patient investors with long-term capital growth.

#### Factors affecting performance

Although the extended period of economic adjustment continues, stockmarkets enjoyed a fairly substantial rally in the second half of 2012. With little concrete evidence that growth is about to resume, investors appeared ready to believe that central banks would take appropriate action to avert recession or the collapse of the euro. Despite the improvement in share prices, investors still appear wary of taking on much risk and remain focused on the short term. They have been seeking certainty of earnings and cashflow and are unprepared to give much, if any, credit for potential value. They have also been unforgiving if companies disappoint by, for example, failing to meet development targets.

Despite several holdings in the M&G Recovery Fund generating substantial value, these were, on balance, outweighed during the review period by some negative factors and the fund underperformed relative to the FTSE-All Share Index. From an asset allocation standpoint, our lack of presence in banks, which rallied strongly, albeit from a very low base, weighed on the fund. The main detractor to returns over the six months was, however, weak stock selection.

In the basic materials sector, signs of a pickup in the global economy towards the end of the year led to investors buying some of the biggest companies in the mining sector, which had come under severe pressure in the preceding year. We are inclined to avoid these huge businesses since they tend to be seen as plays on rising commodity prices and bought for economic rather than corporate recovery, but our lack of exposure to them had a detrimental impact on relative performance.

Several of our larger holdings experienced setbacks to their development plans, for instance, Kenmare Resources, which produces mineral sands from the Moma Mine in Mozambique, and Coal of Africa, which operates mines in South Africa; both encountered commissioning problems that caused delays in rolling out planned production increases. We have engaged extensively with the management teams of these businesses and are confident that the issues are temporary and surmountable.

Tullow Oil, one of our largest holdings, has been a member of the portfolio since 2000 and has often been a major contributor to performance but, in recent months, some disappointing exploration results have caused the shares to fall back from their premium rating. We remain confident that the company will generate further value by increasingly deploying cash from mature areas into developing assets, such as Kenya and Ethiopia, in the months ahead.

BTG's share price dropped when the development of a drug to treat blood poisoning was abandoned. Nevertheless, the biotechnology firm has other products, both in production and in the pipeline, which should enable it to grow in the medium term.

More encouragingly, the fund has had its fair share of successes too. Although companies who disappointed investors were sold heavily, those who delivered on their strategies enjoyed an improvement in their share prices. One such was budget airline easyJet, the largest individual contributor to performance over the review period. The establishment of a more rigorous capital allocation strategy and a progressive dividend policy, together with a well-received plan to

### **INVESTMENT REVIEW**

allocate seats, demonstrated that the relatively new management team has put the company on the right track, enabling the shares to be rewarded with a recovery in their price.

The last time we wrote to you, we mentioned our conviction that the portfolio contains much 'latent value', with investors failing, in our opinion, to give companies credit for the potential worth of their assets. We experienced an instance of such value being realised when engineering technology conglomerate Invensys agreed to sell its rail division, which generated around a third of the group's profits, for a price almost as great as the market value of the whole business. This allowed the removal of the pensions deficit that had overshadowed the firm for years. In our view, this is one of the best business deals we have seen for a long time, putting Invensys on an even keel and enabling the management team to focus on improving the remaining operations.

As the companies we work with improve and grow, we encourage them to seek a listing on the main London stockmarket, where they will receive greater attention, hopefully attracting more investors. Such a listing can act as a spur to superior share price performance, as with Irish pharmaceuticals distributor United Drug, which became a member of the FTSE 250 Index in October, a move that gave a substantial boost to its shares. The greater interest in the group was graphically demonstrated when we went to the latest investor day. While less than a dozen people turned up to meet the management in September 2011, there were more than 70 present a year later.

Pace, which makes digital receivers for satellite television, generated substantial value for the fund as well. The group was one of the main detractors to performance in 2011, as it suffered from supply chain problems sparked by floods in Thailand but, towards the end of that year, an impressive new chief executive was appointed, which encouraged us to increase our stake. During 2012, Pace became a more efficient, profitable and highly cash-generative company, recovering from the supply disruption and experiencing growing demand for its next generation products.

#### Changes to the portfolio

The reluctance of banks to supply companies with the finance that they require and the unwillingness of many investors to invest for anything other than the depressingly very short term, has presented us with several opportunities to support businesses that we expect to grow. Providing appropriate backing for both new and existing turnaround candidates is an integral part of our investment approach.

The largest new addition to the portfolio was Entertainment One, which owns the rights to films, television programmes, including children's favourite Peppa Pig, and music. We supported the group when it needed finance to buy Alliance Films in Canada, thereby creating the largest independent film distributor in both the UK and Canada. We are impressed by the management team of the merged entity and expect it to deliver strong results in the future.

Among other companies to receive the portfolio's support in fundraising exercises were Tournaz, a developer of ultra-low power communication microchips, international outsourcing company iEnergizer, Oxford Biomedica and previously mentioned Kenmare Resources. We also bought further shares in insurance group Aviva, cider maker C&C and Indus Gas.

Some of our more mature holdings, such as Vodafone and Rolls-Royce, were sold in their entirety, while exposure to Croda, Compass and Hunting, all of which had recovered strongly, was trimmed and the proceeds applied elsewhere. We took the painful decision to sell the remaining interest in Lonmin given the multiple problems that have overwhelmed the group in recent years. The main concern, however, was the vulnerability of the miner to further political deterioration in South Africa.

#### Outlook

It is important to note that, while we understand the recent performance of the fund has been somewhat disappointing, we do not believe it would be in our investors' interests to change our investment approach. Since launch in 1969, the M&G Recovery Fund has been through multiple economic and stockmarket cycles and we have learnt that taking a long-term approach can work. Although periods when markets are driven by economic concerns and changes in sentiment can prove testing for our strategy, we are convinced that it would be a mistake to alter it, in an attempt to chase short-term returns.

In general, the corporate environment seems to be in better financial health than the broader economy, which continues to struggle with the government's austerity programme, and many companies have repaired their balance sheets and built up large cash positions. This could augur well for an upturn in merger and acquisition activity, which remains at a remarkably low level. If businesses take the decision to reinvest some of their cash to purchase other companies, the portfolio could benefit tremendously, not only through constituents attracting bids, but from a wider recognition of the value available.

The ongoing economic uncertainty presents us with opportunities. We will continue to focus on discovering unloved businesses that we believe can, over time and with the appropriate levels of support, be guided back to health. We are confident that these new opportunities, together with our existing recovery holdings, will generate rewards for patient investors over the coming years.

# INTERIM FINANCIAL STATEMENTS (unaudited)

#### NOTE TO THE FINANCIAL STATEMENTS

#### **Accounting policies**

The interim financial statements have been prepared on the same basis as the audited annual financial statements for the year ended 30 June 2012. They are in accordance with the historical cost convention, as modified by the revaluation of investments, and the Statement of Recommended Practice for Authorised Funds issued by the Investment Management Association in October 2010.

## AUTHORISED CORPORATE DIRECTOR'S REPORT

### Investment objective and policy of the M&G Smaller Companies Fund

The Fund invests in smaller companies, where good management can have most impact on earnings. Investment in such shares can offer prospects of above average capital growth. Income is not a major factor and the yield can be expected to be less than that of the FTSE All-Share Index.

#### Investment approach

The fund manager of the M&G Smaller Companies Fund uses a bottom-up approach to identify companies for inclusion within the fund's diversified portfolio. The investment approach specifically focuses on three areas: company management, structural growth opportunities and valuations. Company management is perhaps the most crucial variable in deciding whether a small company is likely to be successful or not and, in this regard, company meetings are key. The manager favours trustworthy, diligent and understated management teams.

In terms of assessing the company's structural growth opportunities, the manager analyses the buoyancy of end markets, barriers to entry and earnings growth visibility. Finally, for assessing whether a company's long-term prospects are undervalued by the market, she uses financial analysis, valuation metrics, tailored screens and broker research – this enables her to focus on good investments, not just good companies

Generally, shares will be held for the long term, that is, between three and five years, as the manager will look to take advantage of the market's inability to focus on the long term. However, shares will be sold when a company is significantly overvalued, is taken over, or if the original reasons for buying no longer apply.

#### Risk and reward profile\*

 Please note that this 'Risk and reward profile' section is based on Sterling Class 'A' shares, the nominated share class.

# INVESTMENT ACTIVITIES OVER THE REPORT PERIOD

### As at 2 January 2013, for the six months ended 31 December 2012

Over the six months under review we identified a number of attractive investment opportunities that are likely to achieve sustainable growth and add value to the fund. These included Carclo, a global supplier of technical plastic products used in medical, telecommunication and electronics devices. Carclo has recently signed a lucrative 10-year partnership with Atmel, a leading provider of touchscreen interfaces and controls, for its conductive inkjet technology.

A new position was also established in online video search engine blinkx, which has demonstrated its robust business model in video advertising, the fastest growing segment within online advertising. The company also has medium-term growth opportunities in expanding new distribution channels, such as mobile and webTV.

We participated in a fund raising for Epistem Holdings, a small Manchester-based medical research and technology company that is about to introduce a potentially cutting-edge point-of-care diagnostic product. The Genedrive portable testing system is based on established DNA amplification technology with significant advantages in terms of speed, accuracy, flexibility and crucially cost. Initially, the product will be focused on the \$1 billion global tuberculosis testing market, with the possibility to expand into areas such as HIV/AIDS, malaria, dengue and a range of other diseases. Importantly, Epistem Holdings has established distribution partnerships with market leaders Xcelris (in India) and Becton Dickinson (rest of world).

Significant sales over the period included natural gas operator Cove Energy and oil firm Nautical Petroleum, which both left the fund following successful bid offers by PTT Exploration & Production and Cairn Energy respectively. The position in defence company Chemring Group was sold. Any hopes of a suitable bid from private equity house Carlyle have evaporated; the company issued two profit warnings and a number of senior managers have left the company. Finally, a large proportion of our holding in medical devices manufacturer, Consort Medical, was sold as we took advantage of a sharp increase in the share price following the disposal of subsidiary, King Systems.

#### **Louise Nash**

Fund manager

Louise Nash is an employee of M&G Limited which is an associate of M&G Securities Limited.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

### **FUND STATISTICS**

Sterling Class 'C' shares are not generally available to all investors.

- [a] The date on which the interim distribution will be paid to Income shareholders and credited to Accumulation shareholders.
- [b] The Ongoing Charges Figure is the ratio of the relevant annualised total disclosable costs of each share class from the most recent reporting period to the average net asset value for that share class over the same period.
- [c] The Ongoing Charges Figure shown here is an estimate of the charges, as the share class has not been in existence for a full financial year.

<sup>[</sup>a] The Prudential Small Companies Trust merged into the M&G Smaller Companies Fund immediately after 17 February 2012.

Past performance is no indication of current or future performance and the performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.

The price of shares and the income from them may go down as well as up, and you may get back less than you invested.

<sup>[</sup>b] To 2 January 2013.

<sup>[</sup>c] From 3 August 2012 (the launch date of the share class).

#### NOTE TO THE FINANCIAL STATEMENTS

#### **Accounting policies**

The interim financial statements have been prepared on the same basis as the audited annual financial statements for the year ended 30 June 2012. They are in accordance with the historical cost convention, as modified by the revaluation of investments, and the Statement of Recommended Practice for Authorised Funds issued by the Investment Management Association in October 2010.

# AUTHORISED CORPORATE DIRECTOR'S REPORT

### Investment objective and policy of the M&G UK Select Fund

The Fund invests in a range of UK equities. The aim is to maximise total return (the combination of income and growth of capital).

#### Investment approach

The M&G UK Select Fund is a risk-aware, actively-managed, focus fund. Stockpicking dominates the investment process and there is no predefined investment style or company size preference. The fund aims to exploit stock volatility and shifts in market sentiment. The number of holdings is limited to around 50 and careful attention is paid to risk, as it cannot be reduced by diversification in the usual manner.

#### Risk and reward profile\*

 Please note that this 'Risk and reward profile' section is based on Sterling Class 'A' shares, the nominated share class.

# INVESTMENT ACTIVITIES OVER THE REPORT PERIOD

### As at 2 January 2013, for the six months ended 31 December 2012

In view of the uncertain economic background, a fairly cautious stance has been maintained on the fund. However, holdings in more economically sensitive shares were increased selectively where value was perceived. Amongst these were an industrial stock, conveyor belt manufacturer Fenner, publisher and events provider Informa, as well as Anglo-Australian miner BHP Billiton.

Fenner's main clients include the power and mining industries. The company's shares had come down from a peak in 2011 on the back of misplaced concerns in our view about a decline in capital investment by mining companies. Informa's exposure to Europe had caused the shares to fall back to a level that represented significant value, and BHP Billiton, the largest and best run of the miners, replaced Anglo American which is facing union troubles in South Africa.

Within the fund's larger company holdings, three positions that were increased were drugs manufacturer Shire, construction firm Balfour Beatty and Lloyds Banking Group. Shire's attention deficit hyperactivity disorder drug is selling well in the US. Balfour Beatty issued a modest profit warning, presenting a buying opportunity in our opinion, as the sum of the company's parts was attractive, especially given the hidden value of its private finance initiative assets. Meanwhile, we felt that the environment for Lloyds Banking Group was slowly but surely getting better.

Amongst departures from the portfolio, Logica, the UK's largest software company, was taken over by Canadian rival CGI. In addition, industrial group Cookson was split into Alent, a speciality materials business, and Vesuvius, which retained Cookson's engineered ceramics division. In particular, the Alent side of the reformed business which, amongst other activities manufactures parts for smartphones and tablets, looked substantially under-rated when compared with similar companies in the electronics sector.

#### Mike Felton

Fund manager

Mike Felton is an employee of M&G Limited which is an associate of M&G Securities Limited.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

### **FUND STATISTICS**

Sterling Class 'C' shares are not generally available to all investors.

Total liabilities		(499)		(1,110)
Net assets attributable to shareholders		80,637		80,805

#### NOTE TO THE FINANCIAL STATEMENTS

#### **Accounting policies**

The interim financial statements have been prepared on the same basis as the audited annual financial statements for the year ended 30 June 2012. They are in accordance with the historical cost convention, as modified by the revaluation of investments, and the Statement of Recommended Practice for Authorised Funds issued by the Investment Management Association in October 2010.

### **Further Information**

### **RISK FACTOR**

#### Risk affecting all sub-funds

Within the M&G Investment Funds (3) range, although each sub-fund will be treated as being responsible for meeting its own liabilities, the Authorised Corporate Director (ACD) may reallocate these in a manner which is fair to all Company investors if each sub-fund is unable to meet its liabilities. A shareholder is not, however, liable for the debts of the Company and will never be liable to make any further payment to the Company after paying the purchase price of the shares.

#### LIQUIDITY

The ACD's policy is that the sub-funds should normally be close to fully invested but this is subject to the need to retain liquidity for the purpose of effecting the redemption of shares, and the efficient management of the sub-funds in accordance with their objectives. There may, therefore, be occasions when there will be higher levels of liquidity, for example following the issue of shares or the realisation of investments. Higher liquidity levels may also arise when a subfund's asset allocation policy is changed.

#### **DILUTION**

The actual cost of purchasing or selling a sub-fund's investments may deviate from the mid-market price due to dealing costs and these costs can have an adverse effect on the value of the sub-fund, known as 'dilution'. The Collective Investment Schemes sourcebook, as issued (and amended) by the Financial Services Authority, allows the cost of dilution to be recovered from investors on the purchase or redemption of shares by means of a dilution adjustment to the dealing price, and this is the policy which has been adopted by the ACD.

Further information on the ACD's dilution adjustment policy is in the Prospectus, which is available free of charge from the ACD, M&G Securities Limited.

#### THE EU SAVINGS DIRECTIVE

The percentage of the following M&G sub-funds held in interest-bearing assets (as defined by the UK rules for the EU Savings Directive 2003/48/EC) is as follows:

M&G Corporate Bond Fund	99.11%
M&G Dividend Fund	0.30%
M&G Emerging Markets Bond Fund	99.63%
M&G European Corporate Bond Fund	98.13%
M&G European High Yield Bond Fund	98.11%
M&G Fund of Investment Trust Shares	2.74%
M&G International Sovereign Bond Fund	101.64%
M&G Recovery Fund	0.17%
M&G Smaller Companies Fund	4.14%
M&G UK Select Fund	1.94%

#### **PORTFOLIO TURNOVER RATES**

The Portfolio Turnover Rate (PTR) is a ratio that reflects the volume of trading within each sub-fund over the course of a 12 month period. The PTR is calculated by taking the sum of all transactions in securities less the sum of all transactions in the sub-fund's shares and is expressed as a percentage of the sub-fund's average net asset value.

The unaudited PTRs for the sub-funds currently registered in Switzerland are as follows:

as at

as at

31.12.12	30.06.12
107.06%	208.76%
97.59%	155.51%
37.50%	50.78%
80.35%	82.40%
6.94%	-5.69%
	107.06% 97.59% 37.50% 80.35%

### **TOTAL EXPENSE RATIOS**

The Total Expense Ratio (TER) is shown only for those share classes currently available in Switzerland. The TER shows the relevant annualised operating expenses of each share class from the most recent reporting period as a single percentage of the average net asset value for that share class over the same period.

The unaudited TERs for the sub-funds currently registered in Switzerland are as follows:

		Share class (Accumulation)	Total Exp 31.12.12	ense Ratio 30.06.12
