Report of the Manager

Manager's report

The Manager presents the report and financial statements for the Old Mutual MultiManager Trust (the "Fund") for the period from 1 October 2013 to 31 March 2014. The Fund was launched on 13 December 2002 and units for each sub-fund were first offered for sale at 50p each.

Authorised status

The Old Mutual MultiManager Trust is an authorised unit trust scheme ("AUT") under section 243 of the Financial Services and Markets Act 2000 (Authorisation orders) and is constituted by a Trust Deed between Old Mutual Investment Management Limited (the "Manager") and National Westminster Bank Plc (the "Trustee"), authorised and regulated by the Financial Conduct Authority. It is a "UCITS Scheme" for the purpose of the Financial Conduct Authority's Collective Investment Schemes Sourcebook (the "COLL Sourcebook").

Liability

Unitholders do not have any proprietary interest in the underlying assets of the Funds and they are not liable for the debts of the Funds.

Subsequent events

These financial statements have been prepared in accordance with the Statement of Recommended Practice (SORP) for authorised Funds issued by the Investment Management Association (IMA) in October 2010.

The Fund is an umbrella scheme which complies with the Financial Conduct Authority's Collective Investment Schemes Sourcebook (COLL) and has nine sub-funds (listed below). Additional sub-funds may be launched in the future:

Sub-fund name	Launch date
Old Mutual Ethical fund	23 September 2005
Old Mutual UK Index Fund	13 December 2002
Old Mutual Equity 1 Fund	19 October 2004
Old Mutual Equity 2 Fund	13 December 2002
Old Mutual UK Alpha Fund	31 January 2003
Old Mutual Artemis Income Fund	29 March 2013
Old Mutual Artemis UK Special Situations Fund	12 April 2013
Old Mutual BlackRock UK Special Situations Fund	27 March 2013
Old Mutual Newton Higher Income Fund	12 April 2013
Old Mutual Newton Managed Fund*	23 February 2005

*The Old Mutual Newton Managed Fund was closed to investors on 27 February 2014

Additional information

In accordance with the requirements of the Financial Services and Market Act 2000, we hereby certify these financial statements on behalf of the Manager.

Statement of the Manager's responsibilities

The Regulations, as issued and amended by the Financial Conduct Authority, require the Manager to prepare financial statements for each interim and annual accounting period which give a true and fair view of the financial affairs of the Fund and of its net revenue/(expense) and the net capital gains/(losses) of the scheme for the period. In preparing the financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- comply with the accounting requirements of the Statement of Recommended Practice 'Financial Statements of Authorised Funds' issued by the Investment Management Association ("IMA") in October 2010;
- follow generally accepted United Kingdom accounting principles and standards and applicable United Kingdom laws;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the scheme will continue in operation;
- keep proper accounting records which enable it to demonstrate that the financial statements, as prepared, comply with the above requirements; and
- take reasonable steps for the detection and prevention of fraud and non-compliance with laws or regulations.

The Manager is responsible for the management of the Fund in accordance with the Regulations, the Prospectus and the Trust Deed.

Statement of the Trustee's responsibilities

The Trustee is responsible for the safekeeping of all the property of the scheme (other than tangible moveable property) which is entrusted to it and for the collection of revenue that arises from that property.

Report of the Trustee to the Unitholders of the Old Mutual MultiManager Trust

for the period from 1 October 2013 to 31 March 2014

It is the duty of the Trustee to take reasonable care to ensure that the scheme is managed in accordance with the Financial Conduct Authority's Collective Investment Scheme Sourcebook (COLL), as amended, the scheme's trust deed and Prospectus, in relation to the pricing of, and dealings in, units in the Scheme; the application of revenue of the Scheme; and the investment and borrowing powers of the Scheme.

Having carried out such procedures as we considered necessary to discharge our responsibilities as Trustee of the Scheme, it is our opinion, based on the information available to us and the explanations provided, that, in all material respects, the Manager:

- has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Scheme's units and the application of the Scheme's revenue in accordance with the COLL, the trust deed and Prospectus; and
- has observed the investment and borrowing powers and restrictions applicable to the Scheme.

National Westminster Bank Plc
Trustee

Notes to the financial statements

for the period 1 October 2013 to 31 March 2014

1 Accounting policies

The interim Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds, issued by the IMA in October 2010.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 September 2013.

2 Finance costs

Distribution and interest

The distributions take account of revenue received on the issue of units and revenue deducted on the cancellation of units, and comprise:

	01.10.13 to 31.03.14 £'000	01.10.12 to 31.03.13 £'000
Interim (31 December)	248	-
Interim (31 March)	17,225	7,745
	17,473	7,745
Revenue deducted on cancellation of units	814	1,698
Revenue received on issue of units	(1,841)	(238)
Finance costs: Distributions	16,446	9,205
Finance costs: Interest	11	2
Total finance costs	16,457	9,207
Reconciliation of distributions:		
Net revenue after taxation	11,035	7,119
ACD capitalised fees rebate	(2)	-
Capitalised fees	5,514	1,857
CT relief transfer	(27)	(24)
Revenue deficit carried forward	143	378
RDR conversion transfer from Income to Capital	27	-
UK stock dividends not distributed	-	(125)
Undistributed revenue carried forward	(244)	-
Finance costs: Distributions	16,446	9,205

Old Mutual Artemis Income Fund

Launch date	27 March 2013
Sector classification	UK Equity Income
Investment adviser	Artemis Investment Management LLP
Net asset value	£101,569,857

Objective

To achieve a rising income combined with capital growth from a portfolio primarily made up of investments in the United Kingdom.

Policy

The Investment Adviser actively manages the portfolio in order to achieve the objective with exposure to ordinary shares, preference shares, convertibles and fixed interest securities. The Investment Adviser will not be restricted in respect of choice of investments either by company size or industry, or in terms of the geographical split of the portfolio. The sub-fund may also invest in other transferable securities, units of collective investment schemes, money market instruments, warrants, cash and near cash, derivatives and forward transactions and other investments to the extent that each is permitted by the FCA Rules.

Performance record

Net asset value

The table below shows the total net asset value of the sub-fund, the net asset value per unit in pence and the number of units in existence at the end of the accounting year. Units were first issued at 100p per unit.

Date	Net asset value of sub-fund	Units in issue	Net asset value per unit
30.09.13			
Income 'A'	£100,784,424	96,185,744	104.78
31.03.14			
Income 'A'	£100,752,075	93,165,141	108.14
Accumulation 'U2'*	£808,082	821,098	98.41
Income 'U2'**	£9,700	9,660	100.42

* from 21 February 2014

** from 28 February 2014

Comparative table

The table below shows the highest and lowest unit prices per unit in pence for the calendar years indicated below.

Calendar year	Highest price	Lowest price
2013		
Income 'A'	110.2	98.95
2014*		
Income 'A'	112.7	106.9
Accumulation 'U2'**	101.0	95.87
Income 'U2'***	100.3	100.0

* to 31 March

** from 21 February 2014

*** from 28 February 2014

Income (Net Distribution/Accumulations)

Calendar year	Pence per unit
2013	
Income 'A'	2.4934
2014*	
Income 'A'	1.5811
Accumulation 'U2'**	0.0540
Income 'U2'***	0.0000

* ex dividend date of 31 March and payable on 31 May 2014

** from 21 February 2014

*** from 28 February 2014

Investment Manager's review

It was a volatile period for the UK stock market. Tensions between Russia and Ukraine, the threat of sanctions from the West and mixed corporate earnings were to blame. Despite the uncertainty, fund performance proved positive in absolute terms and relative to the FTSE All-Share index.

Holdings in Laird, the London Stock Exchange and US railroad stock Norfolk & Southern made significant contributions to returns. Novartis also performed well, making encouraging progress towards developing a drug for preventing heart failure. Not holding UK supermarkets, currently in the midst of a price war, also helped relative returns.

Although the fund's overall performance was positive, two holdings performed poorly. Fraud in RSA Insurance's Irish division, and the departure of its CEO, sent its shares 25% lower. We believe there is still value in this business, so we retain our holding. Shares in Centrica also fell following Ed Miliband's announcement that he would freeze energy prices should Labour win the next election.

In terms of activity, the biggest changes came in the mining and banking sectors. We built a position in Glencore, a diversified mining company, after meeting its management. We sold BHP Billiton. In banking, we added to HSBC and bought Barclays, which we believe should eventually reward shareholders with attractive dividend payments. To finance these purchases, we sold Cisco. The NSA spying scandal has made some countries reluctant to buy telecoms equipment from US manufacturers. In pharmaceuticals, we reduced Roche and bought Sanofi, which has strong positions in diabetes treatments.

In terms of our outlook, after strong gains in equity markets last year, we are cautious. If higher share prices are to be justified, corporate earnings must rise. Meanwhile, we are seeing an unusually large number of initial public offerings (IPOs). We are approaching these warily. Newly listed companies rarely have the characteristics we look for in potential investments: stable franchises, strong balance sheets and good dividends.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rates at which funds of this type have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 5 have in the past shown moderately high volatility. With a fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

Investment risk - There is no guarantee that the sub-fund will achieve its objective.

Geographic concentration risk - a fall in the UK market may have a significant impact on the value of the sub-fund because it primarily invests in this market.

Credit risk - the issuer of a Bond or a similar investment within the sub-fund may not pay income or repay capital to the sub fund when due. Bonds which are rated below investment grade are considered to have a higher risk exposure with respect to meeting their payment obligations.

Interest rate risk - investments in bonds are affected by interest rates and inflation trends which may affect the value of the sub-fund.

Currency risk - the sub-fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your units may rise and fall as a result of exchange rate movements between these currencies.

Derivative risk - the sub-fund may use derivatives to reduce costs and/or the overall risk of the Fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM; they should not increase the overall riskiness of the sub-fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet its contractual obligations.

Capital erosion risk - the sub-fund takes charges from capital of the sub fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the sub-fund to cover the charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the Prospectus.

Notes to the financial statements

for the period from 1 October 2013 to 31 March 2014

1 Accounting policies

The interim Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds, issued by the IMA in October 2010.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 September 2013.

2 Finance costs

Distribution and interest

The distributions take account of revenue received on the issue of units and revenue deducted on the cancellation of units, and comprise:

	01.10.13 to 31.03.14 £'000
Interim (31 March)	1,473
Revenue deducted on cancellation of units	1,473
Revenue received on issue of units	59
	(26)
Finance costs: Distributions	1,506
Finance costs: Interest	3
Total finance costs	1,509
Reconciliation of distributions:	
Net revenue after taxation	738
Capitalised ACD fee rebate	(2)
Capitalised ACD fee	778
Tax relief on capitalised fees	(8)
Finance costs: Distributions	1,506

Distribution table

Interim distribution

Group 1: Units purchased prior to 1 October 2013
 Group 2: Units purchased from 1 October 2013 to 31 March 2014

	Net revenue pence per unit	Equalisation pence per unit*	Distribution payable 31.05.14 pence per unit
Income 'A' Units			
Group 1	1.5811	-	1.5811
Group 2	1.1156	0.4655	1.5811
Accumulation 'U2' Units**			
Group 1	0.0540	-	0.0540
Group 2	0.0232	0.0308	0.0540
Income 'U2' Units***			
Group 1	0.0000	-	0.0000
Group 2	0.0000	0.0000	0.0000

* Equalisation only applies to units purchased during the distribution period (Group 2 units). It is the average amount of revenue included in the purchase price of all Group 2 units and is refunded to holders of these units as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of units for capital gains tax purposes.

** Accumulation 'U2' units launched 21 February 2014

*** Accumulation 'U2' units launched 28 February 2014

Old Mutual Artemis UK Special Situations Fund

Launch date	12 April 2013
Sector classification	UK All Companies
Investment adviser	Artemis Investment Management LLP
Net asset value	£37,975,745

Objective

To achieve long term capital growth by exploiting special situations.

Policy

The sub-fund invests principally in UK equities and in companies which are headquartered or have a significant part of their activities in the UK which are quoted on a regulated market outside the UK. The Investment Adviser actively manages the portfolio in order to achieve the objective and will not be restricted in respect of investment either by company size or industry. The securities of companies listed, quoted and/or traded in the UK but domiciled elsewhere and the securities of companies traded on PLUS may be included in the portfolio.

The sub-fund may also invest in other transferable securities, units of collective investment schemes, money market instruments, warrants, cash and near cash, derivatives and forward transactions and other investments to the extent that each is permitted by the FCA Rules.

Performance record

Net asset value

The table below shows the total net asset value of the sub-fund, the net asset value per unit in pence and the number of units in existence at the end of the accounting year. Units were first issued at 100p per unit.

Date	Net asset value of sub-fund	Units in issue	Net asset value per unit
30.09.13			
Accumulation 'A'	£37,480,097	33,658,606	111.35
31.03.14			
Accumulation 'A'	£37,954,866	31,123,231	121.95
Accumulation 'U2'*	£20,879	21,079	99.05

* from 17 February 2014

Comparative table

The table below shows the highest and lowest unit prices per unit in pence for the calendar years indicated below.

Calendar year	Highest price	Lowest price
2013*		
Accumulation 'A'	119.3	97.85
2014**		
Accumulation 'A'	126.1	118.5
Accumulation 'U2'***	102.3	97.93

* From 12 April

** to 31 March

*** from 17 February 2014

Income (Net Accumulations)

Calendar year	Pence per unit
2013	
Accumulation 'A'	1.4643
2014*	
Accumulation 'A'	0.0000
Accumulation 'U2'**	0.0000

* ex dividend date of 31 March and payable on 31 May 2014

** from 17 February 2014

Investment Manager's review

Despite increasing signs of recovery in the UK economy, corporate earnings are coming under pressure. Trading statements from BG, Debenhams, Wm Morrison, Rolls Royce, RSA, Shell and Tate & Lyle, for example, have been cautious. Despite these disappointments – and concerns over Ukraine and slower growth in China – the UK market registered a positive return. The fund, meanwhile, outperformed significantly.

Our strongest performers included Advanced Computer Software, Britvic, Xchanging and Pace. Despite the fund's strong performance, there were some disappointments. Most notably, RSA was hurt by the revelation of fraud in its Irish business. Its shares, however, have responded positively to the appointment of Stephen Hester as CEO. We support his approach to unlocking RSA's considerable potential.

In terms of fund activity, we supported a refinancing of Flybe. A new management team from easyJet is already beginning to reduce costs significantly. We also bought Rentokil. Its new management team has reduced the debt burden and focused on improving returns.

We started to take profits where we feel valuations have become stretched relative to historic levels. For example shares in Kingfisher moved higher despite unimpressive earnings growth, causing us to sell. We also took profits in BAE Systems, ITV and Avon Rubber. All three stocks had performed strongly for us. We have reduced our position in Reed Elsevier, which had risen significantly. It remains an excellent business, but we feel it no longer merits being our largest holding.

In terms of our outlook, uncertainty abounds. Worries about the health of the Chinese economy persist – and there are question marks over valuations in certain sectors of the UK market. It is difficult for us to offer any insight into events in China, but the overvaluation of certain technology stocks is clear. We are, meanwhile, sceptical of the recent boom in IPOs. Desperate for growth, investors are awarding bizarre valuations to some online businesses. We have not been active in this area and expect the froth to disperse in time.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rates at which funds of this type have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 5 have in the past shown moderately high volatility. With a fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

Investment risk - There is no guarantee that the sub fund will achieve its objective.

Geographic concentration risk - a fall in the UK market may have a significant impact on the value of the sub fund because it primarily invests in this market.

Smaller companies risk - smaller or newer companies are subject to greater risk and reward potential. Investments may be volatile or difficult to buy or sell.

Liquidity risk – Some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the sub-fund's ability to meet redemption requests upon demand.

Currency risk - the sub fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your units may rise and fall as a result of exchange rate movements between these currencies.

Derivative risk – the sub-fund may use derivatives to reduce costs and/or the overall risk of the sub fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM; they should not increase the overall riskiness of the sub fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet its contractual obligations.

Capital erosion risk - the sub-fund takes its charges from the income of the sub-fund in the first instance. The impact of sub-fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the sub-fund to cover these charges.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

Distribution table

1. Accounting policies

The interim Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds, issued by the IMA in October 2010.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 September 2013.

2. Finance costs

Distribution and interest

The distributions take account of revenue received on the issue of units and revenue deducted on the cancellation of units, and comprise:

	01.10.13 to 31.03.14 £'000
Interim (31 March)	-
Revenue deducted on cancellation of units	-
Revenue received on issue of units	4
Finance costs: Distributions	(2)
Finance costs: Interest	2
Total finance costs	-
Reconciliation of distributions:	
Net revenue after taxation	32
Revenue deficit carried forward	(30)
Finance costs: Distributions	2

Distribution table

Interim distribution

Group 1: Units purchased prior to 1 October 2013
 Group 2: Units purchased from 1 October 2013 to 31 March 2014

	Net revenue pence per unit	Equalisation pence per unit*	Distribution payable 31.05.14 pence per unit
Accumulation 'A' Units			
Group 1	0.0000	-	0.0000
Group 2	0.0000	0.0000	0.0000
Accumulation 'U2' Units**			
Group 1	0.0000	-	0.0000
Group 2	0.0000	0.0000	0.0000

* Equalisation only applies to units purchased during the distribution period (Group 2 units). It is the average amount of revenue included in the purchase price of all Group 2 units and is refunded to holders of these units as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of units for capital gains tax purposes.

** Accumulation 'U2' Units launched 18th February 2014.

Old Mutual BlackRock UK Special Situations Fund

Launch date	27 March 2013
Sector classification	UK All companies
Investment adviser	BlackRock Advisors (UK) Limited
Net asset value	£74,219,914

Objective

To achieve long term capital growth for investors.

Policy

The Fund invests primarily in the shares of companies incorporated or listed in the UK and will normally have an emphasis on small or medium sized companies. The Fund may also invest in collective investment schemes. Small and medium sized companies are those whose market capitalisation is lower than that of companies in the FTSE 100 Index at the time of the Fund's investment.

Performance record

Net asset value

The table below shows the total net asset value of the sub-fund, the net asset value per unit in pence and the number of units in existence at the end of the accounting year. Units were first issued at 50p per unit.

Date	Net asset value of sub-fund	Units in issue	Net asset value per unit
30.09.13			
Accumulation 'A'	£74,805,322	71,890,536	104.05
31.03.14			
Accumulation 'A'	£73,545,061	66,142,695	111.19
Accumulation 'U2'*	£674,853	684,576	98.58

* from 14 February 2014

Comparative table

The table below shows the highest and lowest unit prices per unit in pence for the calendar years indicated below.

Calendar year	Highest price	Lowest price
2013		
Accumulation 'A'	112.9	96.09
2014*		
Accumulation 'A'	114.6	108.3
Accumulation 'U2'**	101.8	96.18

* to 31 March

** from 14 February 2014

Income (Net Accumulations)

Calendar year	Pence per unit
2013	
Accumulation 'A'	0.7329
2014*	
Accumulation 'A'	0.3935
Accumulation 'U2'	0.1148

* ex dividend date of 31 March and payable on 31 May 2014

** from 14 February 2014

Investment Manager's Review

Market volatility was a prominent feature during the period as market participants reflected on the impact of a potential US strike on Syria, the outcome of the German elections and the timing of the tapering of quantitative easing by the Federal Reserve. Notwithstanding the focus on central-bank policy measures and geopolitical risks, there was a mood of quietly increasing optimism over improving economic indicators in the US, UK, Eurozone, Japan and China. European equity markets performed particularly well over the period, as investors sensed that the continent was finally emerging from its political and financial difficulties. US and UK equities also performed well relative to the broader global equity market. However, uncertainty over Federal Reserve policy took its toll on Asia Pacific and other global emerging markets as investors' risk appetite ebbed. For much of the period, concerns over the sustainability of Chinese economic growth also had a negative impact on markets in the region, although a subsequent improvement in the country's economic indicators seemed to reassure investors and boosted commodity prices. The performance of bond markets was mixed, oscillating on conflicting central-bank signals. Given investors' concerns over tapering, government bonds underperformed investment-grade corporate bonds and high-yield bonds, both of which were helped by the healthier corporate environment.

The largest contributor to performance came from the fund's holding in Ashtead which continued to trade well in the US benefiting from their well-invested fleet, the supply constraints of poorly capitalised competition and a nascent recovery in demand. Housebuilders continue to perform well, with further supportive policy from the UK Government. Bovis posted a positive trading statement in January highlighting a strong increase in orders for 2014. Victrex saw a pick-up in end user and reported a good start to the year and Howdens Joinery continues to perform well. Following the 2014 Budget announcement a benefit to performance was not owning life insurance and gaming companies within the portfolio, both of which have fared badly.

Over the quarter we have added to the Fund's positions in Jupiter Fund Management, Shaftesbury, Workspace and Dunelm and opened new positions in Elementis, Carnival and Ted Baker. We took some profits from our holding in Ashtead Group and Howdens Joinery and sold our positions in Verizon Communications, Antofagasta and Dialight.

Recent macroeconomic data from the developed world has been encouraging with clear signs that the UK economy is beginning to improve and some early signs of stabilisation in parts of Europe, although this has been balanced by continued worries regarding the outlook for emerging markets. Overall global GDP growth remains modest yet positive and equity valuations continue to look attractive relative to other assets. We continue to maintain an overall emphasis on high quality, well financed companies that we believe are able to prosper in a relatively low growth world.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rates at which funds of this type have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 6 have in the past shown relatively high volatility. With a fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

Investment risk - There is no guarantee that the sub fund will achieve its objective.

Geographic concentration risk - a fall in the UK market may have a significant impact on the value of the sub fund because it primarily invests in this market.

Smaller companies risk - smaller or newer companies are subject to greater risk and reward potential. Investments may be volatile or difficult to buy or sell.

Liquidity risk - Some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the Fund's ability to meet redemption requests upon demand.

Derivative risk - the sub fund may use derivatives to reduce costs and/or the overall risk of the sub fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM; they should not increase the overall riskiness of the sub fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet its contractual obligations.

Capital erosion risk - the sub fund takes charges from capital of the sub fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the Fund to cover the charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

Notes to the financial statements

for the period from 1 October 2013 to 31 March 2014

1 Accounting policies

The interim Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds, issued by the IMA in October 2010.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 September 2013.

2 Finance costs

Distribution and interest

The distributions take account of revenue received on the issue of units and revenue deducted on the cancellation of units, and comprise:

	01.10.13 to 31.03.14 £'000
Interim (31 March)	261
	261
Revenue deducted on cancellation of units	10
Revenue received on issue of units	(3)
Finance costs: Distributions	268
Finance costs: Interest	-
Total finance costs	268
Reconciliation of distributions:	
Net revenue after taxation	268
Finance costs: Distributions	268

Distribution table

Interim distribution

Group 1: Units purchased prior to 1 October 2013
 Group 2: Units purchased from 1 October 2013 to 31 March 2014

	Net revenue pence per unit	Equalisation pence per unit*	Distribution payable 31.05.14 pence per unit
Accumulation 'A' Units			
Group 1	0.3935	-	0.3935
Group 2	0.2236	0.1699	0.3935
Accumulation 'U2' Units**			
Group 1	0.1148	-	0.1148
Group 2	0.0606	0.0542	0.1148

* Equalisation only applies to units purchased during the distribution period (Group 2 units). It is the average amount of revenue included in the purchase price of all Group 2 units and is refunded to holders of these units as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of units for capital gains tax purposes.

** Accumulation 'U2' Units launched 18th February 2014.

Old Mutual Equity 1 Fund

Launch date	19 October 2004
Sector classification	Unclassified
Investment adviser	Old Mutual Asset Managers (UK) Limited
Net asset value	£120,198,641

Objective

To maximise capital growth through investment in a focused portfolio of predominantly UK equities.

Policy

Investment will be in a portfolio of predominantly UK equities, either directly in transferable securities or through collective investment schemes, including those managed and operated by the Manager.

For efficient portfolio management purposes only, investment may also be made into derivatives or forward transactions.

Performance record

Net asset value

The table below shows the total net asset value of the sub-fund, the net asset value per unit in pence and the number of units in existence at the end of the accounting year. Units were first issued at 50p per unit.

Date	Net asset value of sub-fund	Units in issue	Net asset value per unit
30.09.11			
Accumulation 'A'	£84,494,033	180,613,704	46.78
30.09.12			
Accumulation 'A'	£119,570,839	193,628,130	61.75
30.09.13			
Accumulation 'A'	£120,375,079	144,882,226	83.08
31.03.14			
Accumulation 'A'	£120,198,641	125,369,364	95.88

Comparative table

The table below shows the highest and lowest unit prices per unit in pence for the calendar years indicated below.

Calendar year	Highest price	Lowest price
2009		
Accumulation 'A'	48.01	30.06
2010		
Accumulation 'A'	55.71	42.39
2011		
Accumulation 'A'	59.89	45.54
2012		
Accumulation 'A'	66.31	50.51
2013		
Accumulation 'A'	91.26	67.27
2014*		
Accumulation 'A'	99.09	89.76

* to 31 March

Income (Net Accumulations)

Calendar year	Pence per unit
2009	
Accumulation 'A'	0.9338
2010	
Accumulation 'A'	0.4419
2011	
Accumulation 'A'	0.6111
2012	
Accumulation 'A'	0.5696
2013	
Accumulation 'A'	0.9484
2014*	
Accumulation 'A'	0.1121

* ex dividend date of 31 March and payable on 31 May 2014

Investment Manager's Review

UK data continued to improve over the review period. The housing market is generally positive and the employment picture has been especially encouraging, suggesting that overall growth may be stronger than official GDP figures suggest. There is a broad expectation that interest rates will rise, but the extent is likely to be limited. Inflation has continued to ease and there is little sense that this will reverse. Consumers remain hypersensitive to interest rates, not least through exposure to variable rate mortgages, adding to the Bank of England's caution in respect of raising rates.

The global picture was positive, if more mixed. A severe winter and poor communication from the Federal Reserve clouded views on the US, though recovery there seemed to remain solid. Conditions in the eurozone have greatly improved, but resilient growth may still be some way off.

An overweight position in support services made the strongest positive contribution to returns at a sector level. The overweight is largely a reflection of the position in Ashtead, which delivered an excellent trading update. Overweights in Travel & Leisure and Household Goods & Home Construction were also positive, the latter driven by good performance from Barratt Developments. Software & Computer Services and Media were the main detractors at a sector level. At a stock level, Foxtons, the London estate agency, Al Noor Hospitals, Bodycote and storage business Big Yellow made good positive contributions. Phoenix Group was key detractor following the announcements on pension reform. ITE also detracted, suffering from its trading exposure to Ukraine and Russia.

We see no catalyst for changing the positioning of the fund – the combination of reasonable levels of global growth and the maintenance of loose monetary policy argues, in our view, for continuing to combine a range of stocks with structural growth or self-help features with an array of economically sensitive businesses, in particular those likely to benefit from an improving picture for the UK consumer. We aim to add value through good stock selection within this thematic framework.

Valuations continue to look reasonable, with the FTSE 250 Index (ex Investment Trusts) trading on around 15x 12-month forward earnings. From current valuation levels, it is critical that earnings growth projections are achieved to push equity prices higher. So far, corporate earnings growth remains muted so there has been no real catalyst to spur the market to further gains in recent months. However, there is a strong relationship between economic growth and corporate profit growth. If UK and global GDP growth expectations prove to be well founded then there is every reason to expect profit growth to resume as we move through 2014. The particular sensitivity of the mid-cap market to the UK economy bodes well in this respect.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rates at which funds of this type have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 6 have in the past shown relatively high volatility. With a fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

Investment risk - there is no guarantee that the sub-fund will achieve its objective.

Geographic concentration risk - a fall in the UK market may have a significant impact on the value of the sub-fund because it primarily invests in this market.

Smaller companies risk - smaller or newer companies are subject to greater risk and reward potential. Investments may be volatile or difficult to buy or sell.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the sub-fund's ability to meet redemption requests upon demand.

Currency risk - the sub-fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your units may rise and fall as a result of exchange rate movements between these currencies.

Derivative risk - the sub-fund may use derivatives to reduce costs and/or the overall risk of the sub-fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM; they should not increase the overall riskiness of the sub-fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet its contractual obligations.

Capital erosion risk - the sub-fund takes its charges from the income of the sub-fund in the first instance. The impact of sub-fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the sub-fund to cover these charges.

For a more detailed explanation of risks, please refer to the "Risks" section of the prospectus.

Notes to the financial statements

for the period from 1 October 2013 to 31 March 2014

1 Accounting policies

The interim Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds, issued by the IMA in October 2010.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 September 2013.

2 Finance costs

Distribution and interest

The distributions take account of revenue received on the issue of units and revenue deducted on the cancellation of units, and comprise:

	01.10.13 to 31.03.14 £'000	01.10.12 to 31.03.13 £'000
Interim (31 March)	140	714
Revenue deducted on cancellation of units	140	714
Revenue received on issue of units	40	21
	(3)	(13)
Finance costs: Distributions	177	722
Finance costs: Interest	-	-
Total finance costs	177	722
Reconciliation of distributions:		
Net revenue after taxation	177	722
Finance costs: Distributions	177	722

Distribution table

Interim distribution

Group 1: Units purchased prior to 1 October 2013
Group 2: Units purchased from 1 October 2013 to 31 March 2014

	Net revenue pence per unit	Equalisation pence per unit*	Distribution payable 31.05.14 pence per unit	Distribution paid 31.05.13 pence per unit
Accumulation 'A' Units				
Group 1	0.1121	-	0.1121	0.3744
Group 2	0.0000	0.1121	0.1121	0.3744

* Equalisation only applies to units purchased during the distribution period (Group 2 units). It is the average amount of revenue included in the purchase price of all Group 2 units and is refunded to holders of these units as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of units for capital gains tax purposes.

Old Mutual Equity 2 Fund

Launch date	13 December 2002
Sector classification	Unclassified
Investment adviser	Investec Asset Management Limited
Net asset value	£145,124,436

Objective

To provide long term total return from capital growth and income in a portfolio of predominantly UK equities.

Policy

Investment will be in a portfolio of predominantly UK equities, either directly in transferable securities or through collective investment schemes, including those managed and operated by the Manager.

For efficient portfolio management purposes only, investment may also be made into derivatives or forward transactions.

Performance record

Net asset value

The table below shows the total net asset value of the sub-fund, the net asset value per unit in pence and the number of units in existence at the end of the accounting year. Units were first issued at 50p per unit.

Date	Net asset value of sub-fund	Units in issue	Net asset value per unit
30.09.11			
Accumulation 'A'	£153,212,746	191,081,577	80.18
Income*	£14,871	25,000	59.48
30.09.12			
Accumulation 'A'	£154,845,064	161,146,298	96.09
30.09.13			
Accumulation 'A'	£129,927,461	108,631,883	119.60
31.03.14			
Accumulation 'A'	£145,124,436	113,530,790	127.83

* closed on 30 July 2012

Comparative table

The table below shows the highest and lowest unit prices per unit in pence for the calendar years indicated below.

Calendar year	Highest price	Lowest price
2009

2013	
Accumulation 'A'	3.2809
2014**	
Accumulation 'A'	1.7842

* to 30 July

** ex dividend date of 31 March and payable on 31 May 2014

Investment Manager's review

UK equity markets ended 2013 strongly. Investor belief that quantitative easing, the large-scale bond-buying programme by the US Federal Reserve, could be slowed, stopped and even reversed painlessly, was supported by their confidence in a recovering US economy. However, this ignored both the high valuation of equities and the disappointing earnings growth across the market.

At the start of 2014, the UK market edged higher with, once again, mid-caps outperforming the FTSE 100 Index. Despite February's strong rise, increased risk owing to events in Ukraine saw the market pull back in March. The bulls seem to have changed their story. Previously it was low valuations driving markets higher. Now it is the strongly growing UK economy and recovering US economy which is expected to drive earnings. In our view, this approach continues to ignore both the flat earnings profile and high valuations, which still exist.

The OM Equity 2 Fund provided positive returns over the period and outperformed its comparative index. General retailers was the best performing sector and good stock selection with the likes of Signet Jewelers contributed. The company performed strongly as its proposed purchase of US jeweller, Zale Corporation, was given the all clear by US regulators. Building supplies company, Grafton Group, also outperformed as housebuilders were supported by the extension of the Help to Buy Lending Scheme to 2020.

Among individual stocks, QinetiQ Group, a multinational defence company, also put in a good performance over the period, while insurer, Direct Line Insurance Group, also provided positive returns for the Fund.

In terms of negative contributors, Avon Products continued to perform poorly after recent disappointing earnings announcements, corporate governance issues and weak emerging market currencies – where Avon earns the lion's share of its profits.

Financial stock HSBC has also been impacted by emerging market issues, while Royal Bank of Scotland underperformed due to lingering fears over the outcome for the large shareholding owned by the UK government.

We remain, as always, focused on purchasing out of favour companies, which are cheap on our assessment of their normalised level of profits and which have sound balance sheets. There seems to be slightly more stock dispersion in the UK market, which provides us with the opportunity to investigate some new ideas while continuing to reduce some of our large long-term holdings.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the sub-fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 6 have in the past shown relatively high volatility. With a fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

Investment risk - there is no guarantee that the sub-fund will achieve its objective.

Geographic concentration risk - a fall in the UK market may have a significant impact on the value of the sub-fund because it primarily invests in this market.

Smaller companies risk - smaller or newer companies are subject to greater risk and reward potential. Investments may be volatile or difficult to buy or sell.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the sub-fund's ability to meet redemption requests upon demand.

Currency risk - the sub-fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your units may rise and fall as a result of exchange rate movements between these currencies.

Derivative risk - the sub-fund may use derivatives to reduce costs and/or the overall risk of the sub-fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM; they should not increase the overall riskiness of the sub-fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet its contractual obligations.

Capital erosion risk - the sub-fund takes charges from capital of the sub-fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the sub-fund to cover the charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the Prospectus.

Notes to the financial statements

for the period from 1 October 2013 to 31 March 2014

1. Accounting policies

The interim Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds, issued by the IMA in October 2010.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 September 2013.

2. Finance costs

Distribution and interest

The distributions take account of revenue received on the issue of units and revenue deducted on the cancellation of units, and comprise:

	01.10.13 to 31.03.14 £'000	01.10.12 to 31.03.13 £'000
Interim (31 March)	2,026	2,138
	2,026	2,138
Revenue deducted on cancellation of units	16	302
Revenue received on issue of units	(57)	(135)
Finance costs: Distributions	1,985	2,305
Finance costs: Interest	-	1
Total finance costs	1,985	2,306
Reconciliation of distributions:		
Net revenue after taxation	1,321	1,534
Capitalised fees	683	795
CT relief transfer	(19)	(24)
Finance costs: Distributions	1,985	2,305

Notes to the financial statements

for the period from 1 October 2013 to 31 March 2014

Interim distribution

Group 1: Units purchased prior to 1 October 2013

Group 2: Units purchased from 1 October 2013 to 31 March 2014

	Net revenue pence per unit	Equalisation pence per unit*	Distribution paid 31.05.14 pence per unit	Distribution paid 31.05.13 pence per unit
Accumulation 'A' Units				
Group 1	1.7842	-	1.7842	1.4840
Group 2	0.9235	0.8607	1.7842	1.4840

* Equalisation only applies to units purchased during the distribution period (Group 2 units). It is the average amount of revenue included in the purchase price of all Group 2 units and is refunded to holders of these units as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of units for capital gains tax purposes.

Old Mutual Ethical Fund

Launch date	23 September 2005
Sector classification	Global Growth
Investment adviser	Impax Asset Management Limited
Net asset value	£81,145,355

Objective

To achieve long term capital growth and income through investment in a well-diversified portfolio of international securities issued by companies that demonstrate sound ethical practice.

Policy

Investment will be in a well diversified portfolio, predominantly of equities, which are held either directly or through collective investment schemes. Investment may also be in fixed interest securities.

For efficient portfolio management purposes only, investment may also be made into derivatives or forward transactions.

Securities are screened against ethical investment criteria, with the aim of ensuring that only companies with sound ethical practice are included in the portfolio. Further information about these criteria is available to unitholders or prospective unitholders on request.

Performance record

Net asset value

The table below shows the total net asset value of the sub-fund, the net asset value per unit in pence and the number of units in existence at the end of the accounting year. Units were first issued at 50p per unit.

Date	Net asset value of sub-fund	Units in issue	Net asset value per unit
30.09.11			
Accumulation 'A'	£61,755,024	122,332,240	50.48
30.09.12			
Accumulation 'A'	£64,316,575	109,878,561	58.53
30.09.13			
Accumulation 'A'	£76,621,165	99,876,764	76.72
Accumulation 'R'	£663,707	867,429	76.51
31.03.14			
Accumulation 'A'	£74,080,072	92,587,651	80.01
Accumulation 'R'	£7,065,283	8,783,988	80.43

Comparative table

The table below shows the highest and lowest unit prices per unit in pence for the calendar years indicated below.

Calendar year	Highest price	Lowest price
2009		
Accumulation 'A'	56.05	36.80
2010		
Accumulation 'A'	64.54	51.33
2011		
Accumulation 'A'	65.70	48.68
2012		
Accumulation 'A'	61.94	54.46
2013		
Accumulation 'A'	80.39	62.21
Accumulation 'R'**	81.72	68.81
2014*		
Accumulation 'A'	81.59	76.29
Accumulation 'R'	81.99	76.63

* to 31 March

** from 18 February

Income (Net Accumulations)

Calendar year	Pence per unit
2009

2010	
Accumulation 'A'	0.3058
2011	
Accumulation 'A'	—**
2012	
Accumulation 'A'	—**
2013	
Accumulation 'A'	—**
Accumulation 'R'	—**
2014*	
Accumulation 'A'	—**
Accumulation 'R'	0.6092

* ex dividend date of 31 March and payable on 31 May 2013

** for the period under review, the expenses exceeded revenue and therefore there was no revenue available to accumulate within this sub-fund.

Investment Manager's review

In the final three months of 2013, markets experienced modest profit taking early in December but still ended ahead for the quarter, after a strong year for global equities. Shares were supported by positive data and optimistic outlooks for corporate earnings. From a regional perspective, Europe saw some weakness and Chinese equities underperformed after a strong November. Japan performed well as the yen continued to weaken in the face of improved US economic data.

But markets struggled to advance further during the first quarter of the new year. Although economic data was supportive and corporate 2013 results did not disappoint, there was insufficient positive news to attract investors to global equities. Tensions between the Ukraine and Russia were a major catalyst for risk aversion in Europe, taking the shine off equities after a nice start in February. In Asia, the Japanese yen recovered some of its losses during the quarter, but this later triggered renewed profit taking, while weak industrial data and export numbers in China made investors nervous and caused equities to fall sharply there. The panic across emerging markets inspired by falls in the Argentine and Turkish currencies proved a short-term negative catalyst that triggered further outflows from EM investments.

Economically-sensitive companies continued to outperform more defensive businesses during the six months. Restructuring in the renewable and alternative energy sub-sector resulted in the adjustment of supply to demand, improving revenues for wind and solar in emerging markets.

The fund enjoyed a strong absolute gain in the fourth quarter of 2013, but lagged the FTSE Environmental Opportunities All Share Index. In the first quarter of 2014, the fund return was marginally negative and again trailed the FTSE Environmental Opportunities All Share Index which ended slightly higher.

In the first half of the reporting interval, one of the biggest detractors was not holding Beijing Enterprises - a Hong Kong based pollution-control-solutions business whose shares outperformed - because it does not meet the requirements of the ethical screen. In general other holdings that detracted from returns were companies reporting disappointing third quarter results and forecasts, or businesses that were hurt by weak volumes and pricing for recycled materials. But the fund was helped in the fourth quarter by its holdings in companies that stand to benefit from the environmentally-focused reforms confirmed at the third Plenum in China, and from its holdings in companies reporting strong third quarter results and positive forecasts.

In the second half of the reporting period, the main factors detracting from performance were disappointing earnings results and weak outlook statements, which contributed to profit taking in a number of stock holdings following strong 2013 gains. However, a number of other companies that were holdings in the portfolio reported strong 2013 results and 2014 outlook statements that boosted their shares and thus benefited the fund's returns.

This year could see higher volatility, with the first signs of a maturing equity market driven by valuation concerns and affected by further tapering with additional concerns regarding rising short rates in the US. A new risk has appeared with the tensions between Ukraine and Russia, mainly affecting European companies.

The manager is cautiously optimistic that global equity markets will be higher in 12 months time as moderate improvements (on balance) to global economic and industrial data continue to come in. Companies reporting earnings disappointments are likely to be strongly penalised though.

There were few significant trades over the last three months of 2013, though in the alternative energy/energy efficiency sector the manager bought Quanta of the US (power network efficiency) liking its attractive price and an improved outlook for its order book.

In the first quarter of 2014, the manager bought Regal Beloit of the US (industrial energy efficiency) as after two years of relatively weak performance and a re-basing of earnings expectations, the stock had become an attractive investment. The manager also bought Huaneng Renewables (renewable energy developers and IPPs) to capture the opportunities in Chinese power markets. The manager sold Power Integrations (consumer energy efficiency) as the stock became overvalued following a period of strong performance, and Samsung Electro-Mechanics (consumer energy efficiency) due to increasing pressure from competitors in consumer electronics. The manager also sold China Everbright International (waste technology equipment) because the stock price had become rather expensive following a period of strong performance.

Meanwhile, a holding in UK water utility Severn Trent was purchased as the company stands to benefit from an improving regulatory outlook in the UK market. And shares in Beijing Enterprises Water Group (water infrastructure) were bought on weakness. This is a company with a strong long-term growth story and a direct beneficiary of the Chinese water scarcity theme. And last, the manager sold United Utilities of the UK following a period of resilient performance.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rates at which funds of this type have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Sub-funds in category 6 have in the past shown relatively high volatility. With a sub-fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

Investment risk - there is no guarantee that the sub-fund will achieve its objective.

Strategy risk - the sub-fund invests in sectors and companies using an ethical investment strategy. This means the range of the sub-fund's investments may be more restrictive, and consequently the sub-fund may be less diversified than other investment funds.

Concentration risk (number of securities) - the sub-fund typically invests in a limited number of investments. A fall in the value of a single investment may have a greater impact on the sub-fund's value than if it held a larger number of investments.

Smaller companies risk - smaller or newer companies are subject to greater risk and reward potential. Investments may be volatile or difficult to buy or sell.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the sub-fund's ability to meet redemption requests upon demand.

Currency risk - the sub-fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your units may rise and fall as a result of exchange rate movements between these currencies.

Derivative risk - the sub-fund may use derivatives to reduce costs and/or the overall risk of the sub-fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM; they should not increase the overall riskiness of the sub-fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet its contractual obligations.

Capital erosion risk - the sub-fund takes its charges from the income of the sub-fund in the first instance. The impact of sub-fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the sub-fund to cover these charges.

For a more detailed explanation of risks, please refer to the "Risks" section of the prospectus.

Notes to the financial statements

for the period from 1 October 2013 to 31 March 2014

1. Accounting policies

The interim Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds, issued by the IMA in October 2010.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 September 2013.

2. Finance costs

Distribution and interest

The distributions take account of revenue received on the issue of units and revenue deducted on the cancellation of units, and comprise:

	01.10.13 to 31.03.14 £'000	01.10.12 to 31.03.13 £'000
Interim (31 March)	54	-
	54	-
Revenue deducted on cancellation of units	1	-
Revenue received on issue of units	(17)	-
Finance costs: Distributions	38	-
Finance costs: Interest	-	-
Total finance costs	38	-
Reconciliation of distributions:		
Net expense after taxation	(132)	(342)
Revenue deficit carried forward	143	370
RDR conversion transfer from Income to Capital	27	-
UK stock dividends not distributed	-	(28)
Finance costs: Distributions	38	-

Distribution table

Interim distribution

Group 1: Units purchased prior to 1 October 2013
 Group 2: Units purchased from 1 October 2013 to 31 March 2014

	Net revenue pence per unit	Equalisation pence per unit*	Distribution payable 31.05.14 pence per unit	Distribution paid 31.05.13 pence per unit**
Accumulation 'A' Units**				
Group 1	0.0000	-	0.0000	0.0000
Group 2	0.0000	0.0000	0.0000	0.0000
Accumulation 'R' Units				
Group 1	0.6092	-	0.6092	0.0000
Group 2	0.0435	0.5657	0.6092	0.0000

* Equalisation only applies to units purchased during the distribution period (Group 2 units). It is the average amount of revenue included in the purchase price of all Group 2 units and is refunded to holders of these units as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of units for capital gains tax purposes.

** For the period under review, the expenses exceeded revenue and therefore there was no revenue available to accumulate.

Old Mutual Newton Higher Income Fund

Launch date	12 April 2013
Sector classification	UK Equity Income
Investment adviser	Newton Investment Management Limited
Net asset value	£34,758,400

Objective

To achieve increasing annual income together with long term capital growth.

Policy

The Fund will invest primarily in the shares of UK companies. The Fund may also invest in other transferable securities, warrants, collective investment schemes, money market instruments, deposits and derivatives.

Performance record

Net asset value

The table below shows the total net asset value of the sub-fund, the net asset value per unit in pence and the number of units in existence at the end of the accounting year. Units were first issued at 50p per unit.

Date	Net asset value of sub-fund	Units in issue	Net asset value per unit
30.09.13			
Income 'A'	£36,000,094	36,195,479	99.46
31.03.14			
Accumulation 'U2'*	£1,012	1,000	101.20
Income 'A'	£34,757,388	32,948,305	105.49

* from 14 February 2014

Comparative table

The table below shows the highest and lowest unit prices per unit in pence for the calendar years indicated below.

Calendar year	Highest price	Lowest price
2013		
Income 'A'	107.2	96.51
2014*		
Accumulation 'U2'**	102.3	99.75
Income 'A'	107.5	101.3

* to 31 March

** from 14 February 2014

Income (Net Distributions/ Accumulations)

Calendar year	Pence per unit
2013	
Income 'A'	1.8513
2014*	
Accumulation 'U2'**	0.5740
Income 'A'	0.7885

* ex dividend date of 31 March and payable on 31 May 2014

** from 14 February 2014

Investment Manager's review

Not owning HSBC Holdings proved helpful to performance, initially as concerns about emerging market credit deepened and subsequently as it missed profit expectations. By contrast, owning Vodafone Group detracted as rumours, circulated later in the period of a takeover by AT&T proved unfounded.

The portfolio received shares in Verizon Communications following Vodafone's disposal of its stake in the company. We disposed of these shares because of our concern over the increasingly competitive environment in the US.

Political risk continued to weigh on some parts of the market, such as utilities, with a talk of a price freeze. This affected energy suppliers Centrica and SSE.

More recently, we once again established a holding in BHP Billiton, one of our preferred companies in the global mining sector. We also started a position in United Utilities, because we believe that it is attractively valued and could be an acquisition target.

We topped up the existing position in Standard Life following a drop in the share price at the end of 2013.

Among other activity, we reduced the position in Severn Trent to help fund the United Utilities purchase. Disposals included Standard Chartered over concerns that current levels of capital may be inadequate if credit conditions continue to deteriorate in Asia. We exited the position in Unilever because of its emerging-market exposure and vulnerability to rises in interest rates.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rates at which funds of this type have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 5 have in the past shown moderately high volatility. With a fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

Investment risk - There is no guarantee that the sub fund will achieve its objective.

Geographic concentration risk - a fall in the UK market may have a significant impact on the value of the sub fund because it primarily invests in this market.

Smaller companies risk - smaller or newer companies are subject to greater risk and reward potential. Investments may be volatile or difficult to buy or sell.

Liquidity risk - Some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the Fund's ability to meet redemption requests upon demand.

Derivative risk - the fund may use derivatives to reduce costs and/or the overall risk of the sub fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM; they should not increase the overall riskiness of the sub fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet its contractual obligations.

Capital erosion risk - the sub fund takes charges from capital of the Fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the Fund to cover the charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

Notes to the financial statements

for the period from 1 October 2013 to 31 March 2014

1. Accounting policies

The interim Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds, issued by the IMA in October 2010.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 September 2013.

2. Finance costs

Distribution and interest

The distributions take account of revenue received on the issue of units and revenue deducted on the cancellation of units, and comprise:

	01.10.13 to 31.03.14 £'000
Interim (31 December)	248
Interim (31 March)	260
	508
Revenue deducted on cancellation of units	9
Revenue received on issue of units	(3)
Finance costs: Distributions	514
Finance costs: Interest	-
Total finance costs	514
Reconciliation of distributions:	
Net revenue after taxation	245
Capitalised fees	269
CT relief transfer	-
Finance costs: Distributions	514

Distribution table

Interim distribution

Group 1: Units purchased prior to 1 October 2013
 Group 2 : Units purchased from 1 October 2013 to 31 March 2014

	Net revenue pence per unit	Equalisation pence per unit*	Distribution paid 31.05.14 pence per unit	Distribution paid 31.05.13 pence per unit
Accumulation 'U2' Units**				
Group 1	0.5740	-	0.5740	-
Group 2	0.0000	0.0000	0.0000	-
Income 'A' Units				
Group 1	0.7885	-	0.7885	-
Group 2	0.3170	0.4715	0.7885	-

* Equalisation only applies to units purchased during the distribution period (Group 2 units). It is the average amount of revenue included in the purchase price of all Group 2 units and is refunded to holders of these units as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of units for capital gains tax purposes.

Old Mutual Newton Managed Fund

Launch date	23 February 2005
Sector classification	Balanced Managed
Investment adviser	Newton Investment Management Limited
Net asset value	£-

The Old Mutual Newton Managed Fund closed on 27th February 2014

Objective

The sub-fund aimed to achieve capital growth through predominant investment in a well-diversified portfolio with long-term asset allocation of global equities and global fixed interest securities, with a bias towards the UK.

Policy

Investments may have been made through collective investment schemes or through directly invested portfolios. Outperformance was sought through a combination of stock selection and asset allocation between markets, and the performance of this sub-fund was therefore determined by movements in both asset prices and currency exchange rates.

For efficient portfolio management purposes only, investment may have also been made into currency forwards but no other derivatives or forward transactions.

Performance record

Net asset value

The table below shows the total net asset value of the sub-fund, the net asset value per unit in pence and the number of units in existence at the end of the accounting year. Units were first issued at 50p per unit.

Investment Manager's review

Following an extraordinary general meeting the Old Mutual Newton Managed Fund was merged into the Old Mutual Foundation 4 Fund on 27th February 2014.

Over the six months to 31 March 2014, the Fund's performance benefited from good stock-selection within the healthcare, technology and consumer goods sectors.

Swiss pharmaceuticals-companies Roche Holdings and Novartis performed well. They issued good full-year results and have strong drug pipelines. The results of US technology company Hewlett-Packard were also well received, with the company generating strong revenue.

The Fund also benefited from its positions in UK retailers Next, Carphone Warehouse and Associated British Foods owner of Primark.

Overall, the telecommunications sector was an area of weakness but one highlight was the performance of Swiss firm Swisscom.

On the negative side, performance was held back by UK industrial company Smiths Group, which issued disappointing results. We retain a position in the stock as it is still generating high and stable returns.

We initiated a new position in the global speciality-chemicals company, Eastman Chemicals, which has an attractive set of speciality chemical assets. We also started a position in Intuit, a US based provider of business and financial-management solutions. In our view, there are significant opportunities for the company by continuing to address the unmet needs of small businesses, consumers and accounting professionals.

Among other activity, we sold the position in UK life insurer Prudential due to its exposure to emerging markets. Also within the financials sector we sold the US regional bank Keycorp, after it reached our target price.

In order to reduce exposure to emerging markets, we also sold Swiss food producer Nestle and French-based cosmetics company L'Oreal.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the sub-fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Sub-funds in category 5 have in the past shown moderately high volatility. With a sub-fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

Investment risk - there is no guarantee that the sub-fund will achieve its objective.

Credit risk - the issuer of a Bond or a similar investment within the sub-fund may not pay income or repay capital to the sub-fund when due.

Interest rate risk - investments in bonds are affected by interest rates and inflation trends which may affect the value of the sub-fund.

Smaller companies risk - smaller or newer companies are subject to greater risk and reward potential. Investments may be volatile or difficult to buy or sell.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the sub-fund's ability to meet redemption requests upon demand.

Currency risk - the sub-fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your units may rise and fall as a result of exchange rate movements between these currencies.

Derivative risk - the sub-fund may use derivatives to reduce costs and/or the overall risk of the sub-fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM; they should not increase the overall riskiness of the sub-fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet its contractual obligations.

Capital erosion risk - the sub-fund takes its charges from the income of the sub-fund in the first instance. The impact of sub-fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the sub-fund to cover these charges.

For a more detailed explanation of risks, please refer to the "Risks" section of the prospectus.

Ongoing charges figure (OCF)*

30.09.12 Accumulation 'A'	1.58%
30.09.13 Accumulation 'A'	1.56%
31.03.14 Accumulation 'A'**	n/a

* The ongoing charges figure is the ratio of the sub-fund's ongoing charges to the average net assets of the sub-fund.

**The sub-fund closed on 27th February 2014.

Notes to the financial statements

for the period from 1 October 2013 to 31 March 2014

1. Accounting policies

The interim Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds, issued by the IMA in October 2010.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 September 2013.

2. Finance costs

Distribution and interest

The distributions take account of revenue received on the issue of units and revenue deducted on the cancellation of units, and comprise:

	01.10.13 to 31.03.14 £'000	01.10.12 31.03.13 £'000
Interim (31 March)	-	1,146
	-	1,146
Revenue deducted on cancellation of units	553	30
Revenue received on issue of units	(2)	(5)
Finance costs: Distributions	551	1,171
Finance costs: Interest	2	-
Total finance costs	553	1,171
Reconciliation of distributions:		
Net revenue after taxation	764	1,171
Undistributed revenue carried forward	(213)	-
Finance costs: Distributions	551	1,171

Old Mutual UK Alpha Fund

Launch date	31 January 2003
Sector classification	Unclassified
Investment adviser	Old Mutual Global Investors (UK) Limited
Net asset value	£1,252,610,965

Objective

To maximise capital growth through investment in a portfolio of predominantly UK equities.

Policy

Investment will be in a portfolio of predominantly UK equities, either directly in transferable securities or through collective investment schemes, including those managed and operated by the Manager.

For efficient portfolio management purposes only, investment may also be made into derivatives or forward transactions.

Performance record

Net asset value

The table below shows the total net asset value of the sub-fund, the net asset value per unit in pence and the number of units in existence at the end of the accounting period. Units were first issued at 50p per unit.

Date	Net asset value of sub-fund	Units in issue	Net asset value per unit

Old Mutual UK Alpha Fund

Investment Manager's review

Over the final quarter of 2013 the UK equity market's rally extended its gains for the year, but the first quarter of 2014 saw a more volatile performance, ending slightly lower. Investor confidence that growth in the developed world was firmly established and would not be derailed by the gradual reduction of stimulus by the US Federal Reserve ran into a statistical fog caused by severe winter weather impacting activity in many parts of the US.

Meanwhile, after two years of re-rating in anticipation of strong profits growth, corporate results announcements in the UK market in Q1 were actually pretty mixed. Sterling strength led to downgraded expectations for multinational companies, alongside continued weakness in a number of developing economies, whilst regulatory pressure to build capital ratios further held back bank shares.

The fund outperformed in the final quarter of 2013 but gave back some relative returns in the first quarter of 2014, giving a net return in line with the FTSE All Share Index return over the six months. The fund benefitted from good results and strong gains from a number of domestic economy holdings such as Next, Whitbread, Home Retail Group and Taylor Wimpey, together with financials such as St James's Place and Aviva, a new holding. International Consolidated Airlines Group also made more progress.

Offsetting these were poor returns from Debenhams and Ladbrokes, both of which are behind peers in their development of successful online offerings. Tate & Lyle suffered from intense price competition for sweetener Sucralose from China, while life assurer Resolution was adversely affected by planned reform to the UK annuity market.

Over the period we sold power generator Aggreko and cruise line operator Carnival on weaker trading and increased competition, alongside our holding in Invensys following its takeover. Aside from the Aviva purchase, we also began a holding in Vodafone towards the end of the six months.

The market may well remain in a broad trading range for a while to come, given its gains of recent years. But we expect it to breakout on the upside once rising economic activity starts to generate broader gains in corporate profits. The portfolio retains a pro-cyclical and financial bias rather than a defensive stance to benefit from this on-going improvement in the growth outlook.

The Old Mutual UK Alpha Fund produced a robust real return that strongly outperformed the benchmark during the reporting interval. Being both overweight and stock picking in travel/leisure and technology were positive factors for the fund's performance. Share selection and an underweight in telecoms were also beneficial, as was stock picking in personal/household goods. An underweight in oil/gas (despite unhelpful stock picking) was another plus for performance. Among the few detractors were stock picking in industrials and financials (where an underweight this sector also hurt).

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rates at which funds of this type have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 6 have in the past shown relatively high volatility. With a fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

Investment risk - there is no guarantee that the sub fund will achieve its objective.

Geographic concentration risk - a fall in the UK market may have a significant impact on the value of the sub fund because it primarily invests in this market.

Concentration risk (number of securities) - the sub fund typically invests in a limited number of investments. A fall in the value of a single investment may have a greater impact on the Fund's value than if it held a larger number of investments.

Smaller companies risk - smaller or newer companies are subject to greater risk and reward potential. Investments may be volatile or difficult to buy or sell.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the sub fund's ability to meet redemption requests upon demand.

Currency risk - the sub fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your units may rise and fall as a result of exchange rate movements between these currencies.

Derivative risk - the sub fund may use derivatives to reduce costs and/or the overall risk of the Fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM; they should not increase the overall riskiness of the Fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet its contractual obligations.

Capital erosion risk - the sub fund takes charges from capital of the Fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the Fund to cover the charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the Prospectus.

Notes to the financial statements

for the period 1 October 2013 to 31 March 2014

1. Accounting policies

The interim Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds, issued by the IMA in October 2010.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 September 2013.

2. Finance costs

Distribution and interest

The distributions take account of revenue received on the issue of units and revenue deducted on the cancellation of units, and comprise:

	01.10.13 to 31.03.14 £'000	01.10.12 to 31.03.13 £'000
Interim (31 March)	10,554	1,229
Revenue deducted on cancellation of units	10,554	1,229
Revenue received on issue of units	122	113
	(1,728)	(62)
Finance costs: Distributions	8,948	1,280
Finance costs: Interest	6	-
Total finance costs	8,954	1,280
Reconciliation of distributions:		
Net revenue after taxation	5,165	540
Capitalised fees	3,784	783
UK stock dividends not distributed	-	(43)
Undistributed revenue carried forward	(1)	-
Finance costs: Distributions	8,948	1,280

Distribution table

Interim distribution

Group 1: Units purchased prior to 1 October 2013
 Group 2: Units purchased from 1 October 2013 to 31 March 2014

	Net revenue pence per unit	Equalisation pence per unit*	Distribution payable 31.05.14 pence per unit	Distribution paid 31.05.13 pence per unit

* Equalisation only applies to units purchased during the distribution period (Group 2 units). It is the average amount of revenue included in the purchase price of all Group 2 units and is refunded to holders of these units as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of units for capital gains tax purposes.

Old Mutual UK Index Fund

Launch date	13 December 2002
Sector classification	UK All Companies
Investment adviser	BlackRock Advisors (UK) Limited
Net asset value	£186,454,429

Objective

To achieve capital growth through predominant investment in a portfolio of UK equities aimed at tracking the performance of the FTSE All-Share Index.

Policy

Investment will be in a portfolio of predominantly UK equities, either directly in transferable securities or through collective investment schemes, including those managed and operated by the Manager.

For efficient portfolio management purposes only, investment may also be made into derivatives or forward transactions.

Performance record

Net asset value

The table below shows the total net asset value of the sub-fund, the net asset value per unit in pence and the number of units in existence at the end of the accounting period. A Accumulation units were first issued at 50p per unit, R Accumulation units were first issued at 100p per unit and U2 Accumulation units were first issued at 100p per unit.

Date	Net asset value of sub-fund	Units in issue	Net asset value per unit
30.09.11			
Accumulation 'A'	£301,338,611	350,096,607	86.07
30.09.12

Investment Manager's review

The UK equity fund ended higher in the six month to the end of March 2014, though returns were not smooth over the period as a whole. October and December were positive, as was February, while the intervening months were negative. There was a particularly sharp sell-off in January, followed by an almost equally sharp rally in February.

Meanwhile, after two years of re-rating in anticipation of strong profits growth, corporate results announcements in the UK market in Q1 were actually pretty mixed. Sterling strength led to downgraded expectations for multinational companies, alongside continued weakness in a number of developing economies, whilst regulatory pressure to build capital ratios further held back bank shares.

At a sector level, alternative energy, health care equipment & services, real estate, household goods & home construction and financial services made the greatest positive contribution to performance. Industrial metals & mining, food & drug retailers, personal goods and banks were the weakest. At a stock level, Greencore, a food producer, had the best returns, followed by Safestore, Pace and Darty. Partnership Assurance, Perform Group, Kenmare Resources and Mothercare were among the weakest.

The UK Index Fund is designed to track the performance of the FTSE All Share Index. For the twelve month reporting interval the portfolio achieved a strong gain that marginally exceeded that of the benchmark.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the sub-fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 6 have in the past shown relatively high volatility. With a sub-fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

Investment risk - there is no guarantee that the sub-fund will achieve its objective.

Index-tracking risk - the performance of the sub-fund will depend on the performance of the relevant index and the success of the sub-fund in tracking that index.

Geographic concentration risk - a fall in the UK market may have a significant impact on the value of the sub-fund because it primarily invests in this market.

Currency risk - the sub-fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your units may rise and fall as a result of exchange rate movements between these currencies.

Derivative risk - the sub-fund may use derivatives to reduce costs and/or the overall risk of the sub-fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM; they should not increase the overall riskiness of the sub-fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet its contractual obligations.

Capital erosion risk - the sub-fund takes its charges from the income of the sub-fund in the first instance. The impact of Fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the sub-fund to cover these charges.

For a more detailed explanation of risks, please refer to the "Risks" section of the Prospectus.

All investments are in ordinary shares unless otherwise stated.

Statement of total return

for the period from 1 October 2013 to 31 March 2014

		01.10.13 to 31.03.14 £'000	01.10.13 to 31.03.14 £'000	01.10.12 to 31.03.13 £'000	01.10.12 to 31.03.13 £'000
	Note				
Income					
Net capital gains			6,925		28,032
Revenue		2,905		4,041	
Expenses		(447)		(630)	
Finance costs: Interest	2	-		(1)	
Net revenue before taxation		2,458		3,410	
Taxation		(1)		-	
Net revenue after taxation			2,457		3,410
Total return before distributions			9,382		31,442
Finance costs: Distributions	2		(2,457)		(3,384)
Change in net assets attributable to unitholders from investment activities			6,925		28,058

Statement of change in net assets attributable to unitholders

for the period from 1 October 2013 to 31 March 2014

		01.10.13 to 31.03.14 £'000	01.10.13 to 31.03.14 £'000	01.10.12 to 31.03.13 £'000	01.10.12 to 31.03.13 £'000
Opening net assets attributable to unitholders			185,701 *		312,122
Amounts received on issue of units		9,810		3,390	
Amounts paid on cancellation of units		(18,340)		(150,006)	
			(8,530)		(146,616)
Stamp duty reserve tax			(31)		(25)
Change in net assets attributable to unitholders from investment activities			6,925		28,058
Retained distribution on accumulation units			2,389		2,518
Closing net assets attributable to unitholders			186,454		196,057

* Section 3.30 of the IMA SORP issued in October 2010 requires comparative figures for the above statement. For interim financial statements this will result in the closing comparative net assets not being equal to net assets at the start of the current period.

Balance sheet

as at 31 March 2014

Net assets attributable to unitholders		186,454		185,701

Notes to the financial statements

for the period 1 October 2013 to 31 March 2014

1 Accounting policies

The interim Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds, issued by the IMA in October 2010.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 September 2013.

2 Finance costs

Distribution and interest

The distributions take account of revenue received on the issue of units and revenue deducted on the cancellation of units, and comprise:

	01.10.13 to 31.03.14 £'000	01.10.12 to 31.03.13 £'000
Interim (31 March)	2,389	2,518
Revenue deducted on cancellation of units	2,389	2,518
Revenue received on issue of units	123	886
	(55)	(20)
Finance costs: Distributions	2,457	3,384
Finance costs: Interest	-	1
Total finance costs	2,457	3,385
Reconciliation of distributions:		
Net revenue after taxation	2,457	3,410
UK stock dividends not distributed	-	(26)
Finance costs: Distributions	2,457	3,384

Distribution table

Interim distribution

Group 1: Units purchased prior to 1 October 2013
 Group 2: Units purchased from 1 October 2013 to 31 March 2014

	Net revenue pence per unit	Equalisation pence per unit*	Distribution payable 31.05.14 pence per unit	Distribution paid 31.05.13 pence per unit
Accumulation 'A' Units				
Group 1	1.5956	-	1.5956	1.4766
Group 2	0.8688	0.7268	1.5956	1.4766
Accumulation 'R' Units**				
Group 1	0.9447	-	0.9447	N/A
Group 2	0.5274	0.4173	0.9447	N/A
Accumulation 'U2' Units***				
Group 1	0.2153	-	0.2153	N/A
Group 2	0.0833	0.1320	0.2153	N/A

* Equalisation only applies to units purchased during the distribution period (Group 2 units). It is the average amount of revenue included in the purchase price of all Group 2 units and is refunded to holders of these units as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of units for capital gains tax purposes.
