# **Fund Information**

Investment objective and policy

The fund's investment objective is to provide capital growth and income primarily through investment in equity securities of medium sized US companies.

Investment will be in directly held transferable securities. The fund may also invest in collective investment schemes, warrants and money market instruments.

### **Review of Investment Activities**

From 31 May 2013 to 29 November 2013, the price of A Accumulation units on a selling price to selling price basis rose 4.78%. In comparison, from 30 May 2013 to 28 November 2013 the Frank Russell 2500 Index generated a total return of 5.44%<sup>1</sup> in sterling terms. Due to the fund's valuation point, the performance periods for the fund and benchmark are at different dates, however, the information is comparable.

1 Source: Thomson Reuters Datastream.

The US equity market rose steadily during the period under review, with improving economic data and solid corporate earnings outweighing concerns over when the US Federal Reserve will begin tapering its quantitative easing programme. Towards the end of the period, a last minute Congressional deal to extend the government's debt ceiling moved US equity markets higher. Medium sized US companies produced strong returns and outperformed larger companies over the period under review.

The fund underperformed its benchmark. Overall stock selection, particularly in the consumer discretionary sector, added value. The largest contributor to returns was provider of infotainment systems to automotive manufacturers, Harman International Industries. The stock rose after positive surprises on earnings, revenue and profit margins. The largest detractor from returns was Apartment Investment & Management. The real estate sector lagged the wider market as higher yielding equities fell out of favour. Its most recent earnings report was regarded as solid. There were no material changes in fund composition over the period.

We believe the US economy is in a slow growth phase. However, the portfolio is driven by bottom up analysis and we continue to focus on identifying investment opportunities in areas related to housing, auto manufacturing, as well as those companies that are beneficiaries of the burgeoning energy discoveries in the US.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

# **Risk Profile**

Risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk free investment.

Specific risks The fund invests in assets which are exposed to currencies other than sterling. Exchange rates may cause the value of overseas investments and the revenue from them to rise or fall.

The fund invests predominantly in the securities of a particular country. There may be a greater risk than investing in funds that hold securities in a range of countries.

The fund invests in smaller companies which may be less liquid than larger companies and price swings may therefore be greater than in larger company funds.

For these reasons, the purchase of units should not normally be regarded as a short term investment.

### **Statement of the Manager's Responsibilities**

The Financial Conduct Authority's Collective Investment Schemes Sourcebook (COLL) requires the Manager to prepare accounts for each annual and half yearly accounting period, in accordance with United Kingdom Generally Accepted Accounting Practice, which give a true and fair view of the financial position of the fund and of its net expenses and the net capital gains on the property of the fund for the period. In preparing the accounts the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- comply with the disclosure requirements of the Statement of Recommended Practice for Authorised Funds issued by the IMA in October 2010;
- follow generally accepted accounting principles and applicable accounting standards;
- prepare the accounts on the basis that the fund will continue in operation unless it is inappropriate to do so;
- keep proper accounting records which enable it to demonstrate that the accounts as prepared comply with the above requirements.

The Manager is responsible for the management of the fund in accordance with its Trust Deed, the Prospectus and the COLL and for taking reasonable steps for the prevention and detection of fraud, error and non-compliance with law or regulations.

The Manager's report and accounts for the period ended 30 November 2013 were signed on 17 January 2014 on behalf of the Manager by:

**C.E. Helmstetter** Directors J.M. Cardew
