Report of the Authorised Corporate Director (ACD)

The Company

The Invesco Perpetual UK 2 Investment Series is an Investment Company with variable capital, incorporated in England and Wales on 11 April 2003.

The Company is an "Umbrella Company" (under the ICVC Regulations) and therefore new sub funds may be formed by the ACD, subject to Regulatory approval. Any changes to sub funds or share classes will be included in an updated Prospectus. Each sub fund of the Company belongs to the type of "UCITS Scheme which complies with Chapter 5 of the FSA New Collective Investment Schemes Sourcebook 2004 Regulations ("COLL Sourcebook")".

At 30 September 2009, the Company consisted of three sub funds:

Invesco Perpetual Income Fund Invesco Perpetual UK Enhanced Index Fund Invesco Perpetual UK Strategic Income Fund

Interim accounting date
Final distribution payable on
Interim distribution payable on

Should expenses and taxation exceed income in a distribution period, no distribution will be payable.

Fund Ratings

Invesco Perpetual Income Fund

S&P Fund Rating¹ 'AAA'
OBSR Fund Rating² 'AAA'

Invesco Perpetual UK Strategic Income Fund S&P Fund Rating¹

'ΑΑ'

- Standard & Poor's Fund Ratings are based on an in-depth evaluation of the fund manager and the fund's performance. Ratings are formally monitored every three months and reviewed annually and range from a top 'AAA' to a 'A' rating. Any level of Standard & Poor's rating is recognised throughout the investment industry as a considerable achievement.
 - S&P Fund Ratings, Copyright© 2009 Standard & Poor's, a Division of The McGraw-Hill Companies, Inc. All rights reserved.
- OBSR ratings are determined following in-depth qualitative and quantitative analysis, with the final rating based on three key factors - risk adjusted performance, investment process and the skills of the individual fund manager. The ratings range from a top 'AAA' rating to a 'A' rating. Any rating is recognised throughout the investment industry as a considerable achievement and an indication of high quality.

Report of the Authorised Corporate Director (ACD)

Risk Profile

Shareholders should be aware of the risks inherent in investing in securities and other financial instruments. Financial markets can be vulnerable to unpredictable price movements and are affected by a number of factors, both political and economic.

As one of the key objectives of Invesco Perpetual Income Fund and Invesco Perpetual UK Strategic Income Fund is to provide income, the ACD's periodic charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

The main risks from the Company's holding of financial instruments are set out in note 4 of the Notes to the Company's financial statements on pages 6 to 8.

Liability

The shareholders of the Company have no liability for the debts of the Company. However, as a sub fund is not a legal entity, if the assets attributable to any sub fund are insufficient to meet the liabilities attributable to it, the shortfall may be met out of the assets attributable to one or more of the other sub funds of the Company.

ISA Eligibility

All the Company's sub funds except Invesco Perpetual UK Enhanced Index Fund, qualify for stocks and shares ISA investment. None of the sub funds qualify for cash ISA investment.

Certification of the Interim Report by the ACD In accordance with the requirements of the Financial Services (Open-Ended Investment Companies) Regulations 2001, I hereby certify these financial statements on behalf of the Directors of Invesco Fund Managers Limited.

C.D. Henderson - Director 17 November 2009

Company's unaudited financial statements

Net Assets at 30 September 2009		6,801,333		5,772,007	

The adoption of the SORP issued in November 2008 has resulted in presentation changes to the Statement of Total Return, whereby, Other losses and security charges are now classified as Net capital gains/(losses) during the period. The effect of this is to remove £10,000 (2008 - £2,000) from "Other gains/(losses)" and reduce "Expenses" by £10,000 (2008 - £5,000), with corresponding change in "Net capital gains/(losses) during the period".

Notes to the Company's unaudited financial statements

1 Accounting policies

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice for Financial Statements of Authorised Funds issued by the IMA in November 2008 (the IMA SORP 2008).

The interim financial statements have been prepared on the same basis as the audited financial statements for the year ended 31 March 2009.

Presentation of financial statements

The adoption of the SORP issued in November 2008 has resulted in presentation changes to the interim financial statements whereby, summary of material portfolio changes and disclosure of notes to the financial statements are no longer required. The adoption of the IMA SORP 2008 has also made some presentational changes to the Statement of Total Return and comparative figures have been restated accordingly. These presentation changes have no impact on the current or prior periods return of the total net assets of the company or each sub-fund.

2 Comparative figures

The Aggregated Statement of Total Return, the Aggregated Statement of Change in Shareholders' Funds and the Aggregated Balance Sheet do not reflect the amounts for Invesco Perpetual UK Focus Fund and Invesco Perpetual UK Opportunities Fund for the period from 1 April 2008 to 30 September 2008, the Scheme of Arrangement became effective on 3 October 2008.

3 Shareholders' funds

The Company currently has four share classes, accumulation, accumulation (No Trail), income and income (No Trail) in issue. The ACD's initial charge and periodic charge are as follows:

		Initial charge %	Periodic charge %
Income Fund	- Trail classes	5.0	1.50
	- No Trail classes	5.0	1.00
UK Enhanced Index Fund	- No Trail classes ¹	5.0	0.20
UK Strategic Income Fund	- Trail classes	5.0	1.50
-	- No Trail classes	5.0	1.00

¹ Minimum investment £250,000.

The net assets attributable to each share class, the net asset value per share and the number of shares in issue of each class are shown in the Comparative Table of each sub fund. These can be found on:

Income Fund	page 11
UK Enhanced Index Fund	page 21
UK Strategic Income Fund	page 32

Each share class has the same rights on a winding up of the Company.

4 Derivatives and other financial instruments

In pursuing its investment objectives, the Company holds a number of financial instruments that may comprise securities and other investments, cash balances and debtors and creditors that arise directly from its operations. Derivatives, such as futures or forward currency contracts, may be utilised for efficient management purposes.

Political and economic events in the major economies of the world, such as the United States, Japan and the European Union, will influence stock and securities markets worldwide.

The main risks from the Company's holding of financial instruments are set out overleaf, together with the ACD's policy for managing these risks.

Notes to the Company's unaudited financial statements

4 Derivatives and other financial instruments continued Market price risk

Market price risk is the risk that the value of the Company's financial instruments will fluctuate as a result of changes in market prices caused by factors other than interest rates or foreign currency movement. Market price risk arises primarily from uncertainty about the future prices of financial instruments that the Company holds.

Market price risk represents the potential loss the Company may suffer through holding market positions in the face of price movements. The Company's investment portfolio is exposed to price fluctuations, which are monitored by the ACD in pursuance of the investment objective and policy. For an equity portfolio the risk is generally regarded as consisting of two elements – stock specific risk and market risk. Adhering to investment guidelines and avoiding excessive exposure to one particular issuer can limit stock specific risk. Subject to compliance with the investment objective, spreading exposure across a broad range of global stock markets can mitigate market risk.

Foreign currency risk

Foreign currency risk is the risk that the sterling value of the Company's investments will fluctuate as a result of changes in exchange rates. Changes in the sterling exchange rate can affect the profitability of some UK companies, and thus their market prices, as sterling's relative strength or weakness can affect export prospects, the value of overseas earnings in sterling terms and the prices of imports sold in the UK. Investment in overseas securities will provide direct exposure to currency risk as a consequence of the movement in foreign exchange rates.

The ACD may seek to reduce exposure to currency risk by the use of forward currency contracts. The hedging of currency exposure is undertaken to minimise foreign currency exposure or where the ACD considers that there is a compelling economic case. However, no single hedging strategy can be universally suitable for all shareholders.

Interest rate risk

Interest rate risk is the risk that the value of the Company's investments will fluctuate as a result of changes in interest rates. The value of fixed interest securities may be affected by changes in the interest rate environment, either globally or locally. Changes in the rate of return in one asset class may influence the valuation basis of other classes. The amount of income receivable from fixed interest securities, receivable on bank balances or payable on bank overdrafts will be affected by fluctuations in interest rates.

By a careful assessment of economic and other relevant factors, we seek to invest in those companies most likely to benefit, or be shielded, from anticipated changes in interest rates.

Liquidity risk

A substantial proportion of the Company's assets consists of readily realisable securities. The main liability of the Company is the cancellation of any shares that investors wish to sell. Securities may need to be sold to fund such cancellations should insufficient cash be held at the bank to meet this obligation.

Smaller companies, by their nature, tend to have relatively modest traded share capital, and the market in such shares can, at times, prove illiquid. Shifts in investor sentiment, or the announcement of new price sensitive information, can provoke significant movement in share prices, and make dealing in any quantity difficult.

The equity markets of emerging countries tend to be more volatile than the more developed markets of the world. Standards of disclosure and accounting regimes may not always fully comply with international criteria, and can make it difficult to establish accurate estimates of fundamental value. The paucity of accurate and meaningful information, and inefficiencies in its distribution, can leave emerging markets prone to sudden and unpredictable changes in sentiment. The resultant investment flows can trigger significant volatility in these relatively small and illiquid markets. At the same time, this lack of liquidity, together with low dealing volumes, can restrict the Company's ability to execute substantial deals.

Credit risk

The Company may find that companies in which it invests fail to settle their debts on a timely basis. The value of securities issued by such companies may fall as a result of the perceived increase in credit risk.

Transactions in securities entered into by the Company give rise to exposure to the risk that counterparties may not be able to fulfil their responsibility by completing their side of the transaction. The Company minimises this risk by conducting trades through reputable counterparties.

Notes to the Company's unaudited financial statements

4 Derivatives and other financial instruments continued Investment objective

Each sub fund has been managed throughout the period in accordance with its investment objective. These can be found on:

Income Fund page 09
UK Enhanced Index Fund page 19
UK Strategic Income Fund page 30

The sub funds may also hold cash and near cash assets where reasonably necessary to fund cancellations of shares, for the efficient management of the sub fund or for purposes ancillary to the objectives of the sub fund. They may also borrow, providing such borrowing is on a temporary basis and does not exceed the limits laid down in the regulations. The exercise of these powers and the management of risk during the period is disclosed above. The use of financial instruments by a UCITS scheme is set out in the COLL Sourcebook.

Fair value

The market value of investments is taken to equal 'fair value'. There is no material difference between the value of the financial assets and liabilities as shown in the Balance Sheet and their fair value.

Base currency

The base currency of the Company is sterling and is taken to be the 'functional currency' of the Company.

Bank balances and overdrafts

Bank balances and overdrafts are held by the Custodian and are subject to the Custodian's variable credit and debit interest rates respectively.

Borrowings

The borrowing facilities available to the Company as at 30 September 2009 comprise a bank overdraft facility of 10% of the value of the Company.

Investment report for the period

The Investment Objective of the Income Fund

The fund aims to achieve a reasonable level of income, together with capital growth. The fund intends to invest primarily in companies listed in the UK, with the balance invested internationally. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Full Prospectus.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invescoperpetual.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, mid-to-mid (excluding the initial sales charge), in sterling, with net income reinvested. FTSE All-Share Index data source: Thomson Datastream, total return, in sterling terms.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Investment report for the period

Strategy, review and outlook

In the six months to 30 September 2009, the fund rose by 22.0%, compared to a 35.7% rise for the FTSE All-Share Index. This placed the fund in the fourth quartile of its peer group, the IMA UK Equity Income & Growth sector, which gained by an average of 28.3%.

Fund and sector average performance data source: Lipper, mid-to-mid (excluding the initial sales charge), in sterling, with net income reinvested. FTSE All-Share Index data source: Thomson Datastream, total return, in sterling.

Past performance is not a guide to future returns.

The period under review saw the UK equity market experience an almost uninterrupted rally from the lows experienced early in March. The market's strength was partly the product of stocks being oversold in the first quarter of the year but the improvement was sustained by growing hopes that a sharp rebound in economic activity could be achieved. As a result, economically sensitive stocks led the market higher. The fund's disappointing relative performance was the result of its focus on areas of the market with more resilient and dependable earnings, which generally trailed the market's rise.

In terms of fund activity, we continued to build positions in favoured companies at what we believe to be compelling valuations. This included AstraZeneca and GlaxoSmithKline, tobacco groups Altria and Reynolds American, as well as Vodafone and BAE Systems.

We added to BAE Systems as we believe it remains significantly undervalued. The company has a strong spread of earnings across business units and geographies and is a key partner in government defence contracts globally. In addition, significant revenues are being generated by maintenance and support services, which are activities with strong and sustainable margins. The group's involvement in the Joint Strike Fighter also has significant potential to boost earnings and in our view the current share price clearly undervalues the group's long-term potential.

AstraZeneca and GlaxoSmithKline are highly cash generative, have dependable earnings profiles and secure, rising dividends. Despite these fundamental qualities, these companies are among the cheapest in the market, which represents an exceptional buying opportunity in our view. New earnings streams from expanding markets in areas like Asia and Latin America, together with significantly improved drug pipelines, represent future growth drivers and in our view more than outweigh concerns about patent expiries.

With regard to disposals, these were focused largely on oil and gas related companies. BP and oil services group Amec were sold as we have concerns about the future viability of their dividends. We expect the global economy to experience significant challenges in the years ahead, leading to muted demand for oil. As such, we expect the oil price to come under pressure and in our view this creates doubt about the ability of these companies to maintain existing dividend levels. It is becoming increasingly expensive to find and extract new oil and gas reserves and with oil prices potentially weakening from current levels, we believe that these companies may fail to generate sufficient cash to cover both capital expenditure and dividend payments to shareholders.

While the UK economy has experienced some improvement from the trough seen earlier this year, we remain cautious about the current outlook. Banks remain reluctant to lend, businesses and consumers have little appetite to borrow and with unemployment likely to continue rising, we believe there is little prospect of the economy returning to sustainable levels of growth in the short term. With regard to the equity market and the positioning of the fund, our conviction in the businesses we hold remains high. In our view, they will provide leadership to the UK equity market as the extent of the economy's remaining challenges become clear and we expect them to regain the premium rating relative to the market that they have historically enjoyed. In our view, these companies are currently significantly undervalued and we are positive about their potential to deliver attractive returns over the long term.

Neil Woodford, Fund Manager

Where Neil Woodford has expressed views and opinions, these may change and are not necessarily representative of Invesco Perpetual views.

Accumulation shares (No Trail) and income shares (No Trail) were issued at 100p on 31 May 2007.

The fund was formed on 31 December 2006 through a Scheme of Arrangement which resulted in the transfer of the assets, amounting to $\pounds 4,604,495,000$, of Invesco Perpetual Income Fund, a sub fund in the Invesco Perpetual UK Investment Series, to Invesco Perpetual Income Fund, a sub fund in the Invesco Perpetual UK 2 Investment Series.

² from 31 May

Investment report for the period

Total expense ratio (TER)	01.4.09 to 30.9.09	01.4.08 to 31.3.09
Total expenses as % of average net assets Accumulation shares and income shares Accumulation shares (No Trail) and income shares (No Trail)	1.68% 1.18%	1.68% 1.18%
Total expenses (£'000)	49,332	96,990
Average net assets for the period (£'000)	5,892,326	5,784,064

The total expense ratio (TER) represents the annual operating expenses of the fund expressed as a percentage of average net assets for the period - it does not include initial charges or transaction expenses. The TER includes the annual management charge and also the following charges which are deducted directly from the Fund: Registration Fee, Depositary Fee, Custody Fee, Audit Fee, FSA Fee, Price Publication Fee and Report production, less: VAT recoverable where applicable. The TER is expressed as an annual percentage rate.

Portfolio turnover rate (PTR)	01.4.09 to 30.9.09	01.4.08 to 31.3.09
Total purchases (£'000) Total sales (£'000)	841,369 442,206	2,243,063 1,735,907
Portfolio turnover rate as % of average net assets	13.25%	50.99%

Portfolio Turnover Rate (PTR) gives an indication of how frequently investments within the funds are purchased and sold. The PTR is calculated by taking (a) the sum of investments purchased and sold, less (b) the sum of the fund's share capital issued and cancelled, and is expressed as a percentage of the average net asset value.

The adoption of the SORP issued in November 2008 has resulted in presentation changes to the Statement of Total Return, whereby, Other gains/(losses) and security charges are now classified as Net capital gains/(losses) during the period. The effect of this is to remove £7,000 (2008 - £1,000) from "Other gains/(losses)" and reduce "Expenses" by £5,000 (2008 - £3,000), with corresponding change in "Net capital gains/(losses) during the period".

Group 2	0.5183	1.2579	1.7762	1.8441

Group 1 shares: purchased prior to 1 April 2009 Group 2 shares: purchased on or after 1 April 2009

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of income included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of income shares for capital gains purposes.

Investment report for the period

The Investment Objective of the UK Enhanced Index Fund

The fund aims to achieve long term capital growth from investment primarily through a portfolio of investments in UK companies. In pursuing this objective, the fund managers may include other investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Full Prospectus.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invescoperpetual.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, mid-to-mid (excluding the initial sales charge), in sterling, with net income reinvested. FTSE All-Share Indices data source: Thomson Datastream, total return, in sterling terms.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Investment report for the period

Strategy, review and outlook

The value of shares in the fund rose by 36% during the six months to the end of September 2009 compared to a 35.7% gain for the FTSE All-Share (ex. Investment Trusts) Index. This placed the fund in the third quartile of its peer group, the IMA UK All Companies sector, which increased by an average of 36.8%.

Fund and sector average performance data source: Lipper, mid-to-mid (excluding the initial sales charge), sterling, with net income reinvested. FTSE All-Share (ex. Investment Trusts) Index data source: Thomson Datastream, total return, in sterling.

Past performance is not a guide to future returns.

Buoyed by global growth upgrades and growing risk appetite, UK equities performed strongly, with share prices supported by a combination of factors, including a backdrop of historically low UK interest rates, government stimulus measures and a growing sense that the worst of the recession has passed. Reflecting investors' renewed appetite for riskier assets, market performance was dominated by share-price appreciation of companies in cyclical sectors of the market such as mining and financials. By contrast, defensive sectors underperformed the wider UK equity market.

The fund's performance is generated through a quantitative bottom-up investment process driven by stock selection and based on four concepts: Earnings Momentum, Price Trend, Management Action and Relative Value. Relative risk is controlled with the help of an optimiser, an analysis tool that recommends trades to maximise portfolio exposure to the selected stocks within pre-determined risk/return parameters. In terms of portfolio construction, we tightly constrain the risk taken in sectors and industries.

Our stock selection model evaluates the attractiveness of stocks based on these four concepts. With the calculation of information coefficients we determine the correlation between our return forecasts and the actual returns the stocks achieved over the previous month. The results, for each concept separately as well as for all concepts combined, give information about the predictive ability of our model. During the review period, the prognostic ability of our Relative Value concept assisted fund performance, whereas the other three concepts suffered.

In terms of stock performance, BBA Aviation, Melrose and Morgan Crucible did well for the fund. Returns from our bank holdings were more mixed, with HSBC, Barclays and Standard Chartered positive contributors to performance, whereas Lloyds Banking and Royal Bank of Scotland were detractors. Overweight positions in Vodafone and GlaxoSmithKline also hurt relative performance.

During the review period we made a number of stock adjustments to the portfolio as a result of our stock selection model. We increased our holdings in BHP Billiton, Standard Chartered and HSBC. By contrast, we reduced our exposure to Lloyds Banking, Centrica and Melrose.

Our diversified and disciplined approach to stock selection favours companies that, in our view, are attractively valued, have good earnings and price momentum and have management acting in the interest of shareholders. We believe that we can add value through the systematic application of fundamental and behavioural insights. Disciplined portfolio construction and cost effective trading are integral to our investment process, which we believe should help us preserve value added from stock selection and reduce the probability of significant underperformance.

Investment report for the period

Total expense ratio (TER)	01.4.09 to 30.9.09	01.4.08 to 31.3.09
Total expenses as % of average net assets Accumulation shares (No Trail) and income shares (No Trail)	0.39%	0.40%
Total expenses (£'000)	235	391
Average net assets for the period (£'000)	119,248	97,896

The total expense ratio (TER) represents the annual operating expenses of the fund expressed as a percentage of average net assets for the period - it does not include initial charges or transaction expenses. The TER includes the annual management charge and also the following charges which are deducted directly from the Fund: Registration Fee, Depositary Fee, Custody Fee, Audit Fee, FSA Fee, Price Publication Fee and Report production, less: VAT recoverable where applicable. The TER is expressed as an annual percentage rate.

Portfolio turnover rate (PTR)	01.4.09 to 30.9.09	01.4.08 to 31.3.09
Total purchases (£'000) Total sales (£'000)	21,929 21,434	63,957 18,531
Portfolio turnover rate as % of average net assets	15.09%	36.02%

Portfolio Turnover Rate (PTR) gives an indication of how frequently investments within the funds are purchased and sold. The PTR is calculated by taking (a) the sum of investments purchased and sold, less (b) the sum of the fund's share capital issued and cancelled, and is expressed as a percentage of the average net asset value.

The adoption of the SORP issued in November 2008 has resulted in presentation changes to the Statement of Total Return, whereby, Other gains/(losses) and security charges are now classified as Net capital gains/(losses) during the period. The effect of this is to remove Nil (2008 - £1,000) from "Other gains/(losses)" and reduce "Expenses" by £3,000 (2008 - £1,000), with corresponding change in "Net capital gains/(losses) during the period".

Distribution table

Distribution table for the period 1 April 2009 to 30 September 2009

Distribution payable 30 November 2009	Net income p	Equalisation p	Net distribution payable 30.11.09 p	Net distribution paid 30.11.08
Accumulation shares (No Trail)				
Group 1	4.1421	_	4.1421	4.6416
Group 2	2.4921	1.6500	4.1421	4.6416
Income shares (No Trail)				
Group 1 Group 2	3.1879 3.1879	0.0000	3.1879 3.1879	3.7376 3.7376

Group 1 shares: purchased prior to 1 April 2009 Group 2 shares: purchased on or after 1 April 2009

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of income included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of income shares for capital gains purposes.

UK Strategic Income Fund

Investment report for the period

The Investment Objective of the UK Strategic Income Fund

The fund aims to produce an above average income with capital growth primarily through a portfolio of investments in UK companies. In pursuing this objective, the fund managers may include other investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Full Prospectus.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invescoperpetual.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, mid-to-mid (excluding the initial sales charge), in sterling, with net income reinvested. FTSE All-Share Index data source: Thomson Datastream, total return, in sterling terms.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

UK Strategic Income Fund

Investment report for the period

Strategy, review and outlook

The value of shares in the fund rose by 22.9% during the six months to the end of September 2009, compared to a 35.7% rise for the FTSE All-Share Index. This placed the fund in the fourth quartile of its peer group, the IMA UK Equity Income & Growth sector, which rose by an average of 28.3%.

Fund and sector average performance data source: Lipper, mid-to-mid (excluding the initial sales charge), in sterling, with net income reinvested. FTSE All-Share Index data source: Thomson Datastream, total return, in sterling.

Past performance is not a guide to future returns.

A combination of better-than-expected corporate results, improving economic data, low interest rates and government stimulus measures amounted to a helpful backdrop for the UK equity market in the six months to 30 September 2009, resulting in record double-digit gains for the FTSE All-Share index. Reflecting investors' renewed appetite for riskier assets, market performance was dominated by shareprice appreciation of companies in cyclical sectors of the market such as mining and financials. By contrast, defensive sectors underperformed the wider UK equity market, with the result that the smallcapitalisation FTSE SmallCap index and the mid-sized FTSE 250 index experienced better share-price performance than that generated by the large-cap FTSE 100 index.

The fund generated healthy absolute returns over the review period but on a relative basis was not able to keep pace with the performance of the FTSE All-Share index. This was largely attributable to a bias towards defensive sectors of the market, such as utilities, tobacco and pharmaceuticals, which fell out of favour in an environment where investors continued to sell defensives to buy cyclical companies.

There were several significant transactions within the fund over the review period. For instance, Royal Dutch Shell and British Airways were removed from the portfolio, following a period of strong performance, to take advantage of better opportunities for investment in other parts of the market. This led to a number of new holdings being introduced into the fund, such as Compass Group and Bunzl.

A dip in Compass Group's share price during the review period presented an attractive entry point to purchase the shares at a favourable valuation. The decline in the share price was caused by some disappointment in the market with regard to the latest

results. The company remains a resilient business which is benefiting from the global growth in outsourcing of catering services in both the public and private sectors. Similarly, Bunzl was acquired after a decline in its share price presented a good opportunity to invest in a high-quality business at attractive levels.

The recent improvement in macroeconomic data has led some market participants to subscribe to the view that the economy is emerging strongly from recession. We, however, are not convinced. We question the strength and sustainability of the recovery that is being anticipated by the market. Businesses and households are still in the process of tempering their former exuberance and rebuilding their balance-sheets. While this process of deleveraging continues, which could take years to run its course, the economy is likely to face substantial challenges, such as rising unemployment and a subdued housing market, which will pose obstacles to a solid and sustained recovery. Notwithstanding our sombre outlook for the UK economy, we believe that there are selected areas of opportunity in the stockmarket. We have identified several sectors where investment opportunities appear to us to be interesting, particularly in an environment where economic growth is lacklustre. The areas we are referring to are typically defensive sectors and display such characteristics as strong balance-sheets, visible cash-generation, robust business models and, most importantly, growing dividend streams. Examples include utilities, telecommunications and pharmaceuticals.

from 31 May

Income shares were redesignated income shares (No Trail) on 31 May 2007. On the same date, accumulation shares (No Trail) were issued at 381.08p and accumulation shares and income shares were issued at 100p.

to 30 September

UK Strategic Income Fund

Investment report for the period

Total expense ratio (TER)	01.4.09 to 30.9.09	01.4.08 to 31.3.09
Total expenses as % of average net assets Accumulation shares and income shares Accumulation shares (No Trail) and income shares (No Trail)	1.72% 1.22%	1.73% 1.23%
Total expenses (£'000)	321	362
Average net assets for the period (£'000)	46,758	28,926

The total expense ratio (TER) represents the annual operating expenses of the fund expressed as a percentage of average net assets for the period - it does not include initial charges or transaction expenses. The TER includes the annual management charge and also the following charges which are deducted directly from the Fund: Registration Fee, Depositary Fee, Custody Fee, Audit Fee, FSA Fee, Price Publication Fee and Report production, less: VAT recoverable where applicable. The TER is expressed as an annual percentage rate.

Portfolio turnover rate (PTR)	01.4.09 to 30.9.09	01.4.08 to 31.3.09
Total purchases (£'000) Total sales (£'000)	26,841 3,712	19,632 11,548
Portfolio turnover rate as % of average net assets	6.84%	55.10%

Portfolio Turnover Rate (PTR) gives an indication of how frequently investments within the funds are purchased and sold. The PTR is calculated by taking (a) the sum of investments purchased and sold, less (b) the sum of the fund's share capital issued and cancelled, and is expressed as a percentage of the average net asset value.

Net Assets at 30 September 2009		62,775		25,598

The adoption of the SORP issued in November 2008 has resulted in presentation changes to the Statement of Total Return, whereby, Other gains/(losses) and security charges are now classified as Net capital gains/(losses) during the period. The effect of this is to remove £3,000 (2008 - Nil) from "Other gains/(losses)" and reduce "Expenses" by £2,000 (2008 - £1,000), with corresponding change in "Net capital gains/(losses) during the period".

UK Strategic Income Fund Unaudited financial statements

Distribution table

Distribution table

for the period 1 April 2009 to 30 September 2009

Distribution payable 30 November 2009	Net income p	Equalisation p	Net distribution payable 30.11.09 p	Net distribution paid 30.11.08 p
Accumulation shares				
Group 1	1.9226	-	1.9226	1.7780
Group 2	0.9385	0.9841	1.9226	1.7780
Accumulation shares (No Trail)				
Group 1	7.3956	_	7.3956	6.8073
Group 2	7.3956	-	7.3956	6.8073
Income shares				
Group 1	1.7960	-	1.7960	1.7318
Group 2	0.6602	1.1358	1.7960	1.7318
Income shares (No Trail)				
Group 1	6.9104	_	6.9104	6.6316
Group 2	2.6118	4.2986	6.9104	6.6316

Group 1 shares: purchased prior to 1 April 2009 Group 2 shares: purchased on or after 1 April 2009

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of income included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of income shares for capital gains purposes.
