DECEMBER 2019 FACTSHEET

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Dec-2019. All other data as at 10-Jan-2020.

For Investors in the UK. Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The Fund aims to achieve positive absolute returns on your investment (i.e. an increase in the overall value of the Fund) over a period of 12 months regardless of market conditions. As such, the Fund will not be managed against any United Kingdom (UK) equity index. The Fund will be managed with the aim of delivering absolute (more than zero) returns on a 12 month basis in any market conditions. However, an absolute return is not guaranteed over a 12 month or any period and the Fund may experience periods of negative return. The Fund's capital is at risk. The Fund aims to gain investment exposure to equity securities (e.g. shares) and equity-related securities of, or giving exposure to, companies incorporated or listed in the UK.

RATINGS

Key Risks: The value of your investment and the income from it will vary and your initial investment amount is not guaranteed. The value of this Fund does not typically move in line with general market trends and is not expected to reap the full benefits of a rising stock market. Investment strategies employed by the manager may affect the risk profile of the fund, as both positive and negative share movements affect the overall value of the Fund.

(Continued on page 2)

Key Risks Continued: The Fund utilises derivatives as part of its investment strategy. Compared to a fund which only invests in traditional instruments such as stocks and bonds, derivatives are potentially subject to a higher level of risk and volatility.

GLOSSARY

Market Capitalisation: is the total value of the shares issued by a company which trades on the stock exchange.

Ongoing Charge: is a figure representing all annual charges and other payments taken from the fund.

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.

Price to Earnings (TTM) Ratio: represents the ratio of the market price per share of a company to the company's earnings per share for a twelve-month period (usually the last 12 months or trailing twelve months (TTM)).

Quartile Rank: categorises a fund into four equal bands based on their performance over a specified period within the relevant Morningstar's sector. The top or first quartile contains the top 25% of funds, through to the bottom or 4th quartile which contains the bottom 25% of funds.

SRRI: is a value based on the volatility of the fund, which gives an indication of the overall risk and reward profile of the Fund.

A short position is the sale of a borrowed security, commodity or currency with the expectation that the asset will fall in value. Whereas a Long position is the buying of a security such as a stock, commodity or currency, with the expectation that the asset will rise in value. A fund has a net long exposure if the percentage amount invested in long positions exceeds the percentage amount invested in short positions, and has a net short position if short positions exceed long positions.

Performance Fee: is charged on any returns that, subject to a High Water Mark, the Fund achieves above its performance fee benchmark. Please refer to the Prospectus for further information.
