Key Risks: The value of your investment and the income from it will vary and your initial investment amount is not guaranteed. Mining shares typically experience above average volatility when compared to other investments. Trends which occur within the general equity market may not be mirrored within mining securities. Overseas investments will be affected by movements in currency exchange rates. The Fund invests in a limited number of market sectors. Compared to investments which spread investment risk through investing in a variety of sectors, share price movements may have a greater effect on the overall value of this fund.
