### Threadneedle European Select Fund Z Accumulation GBP

ISIN: GB00B8BC5H23  
 Share Class Price: 2.2303  
 Historic Yield: 1.1%  
 Ongoing Charges: 0.83% (as at 07/03/19)  
 ISA: Yes  
 Performance Fee: No

The ongoing charges figure (OCF) is usually based on the last year's expenses and may vary from year to year. It includes charges such as the fund's annual management charge, registration fee, custody fees and distribution cost but excludes the costs of buying or selling assets for the fund (unless these assets are shares of another fund). For a more detailed breakdown please visit [www.columbiathreadneedle.com/fees](http://www.columbiathreadneedle.com/fees). In some cases, the ongoing charges figure may be based on an estimate of future charges, either because the share/unit class is relatively new and has an insufficient track record to be calculated exactly, or if historic figures are unlikely to accurately reflect future ongoing costs.

Please see table of Share Classes available.

### Risks

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund has a concentrated portfolio (holds a limited number of investments and/or has a restricted investment universe) and if one or more of these investments declines or is otherwise affected, it may have a pronounced effect on the Fund's value.
- The Fund may invest in derivatives with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.

### Opportunities

- Provides exposure to a diverse range of countries and sectors.
- Access to a focused portfolio of typically investing in between 45 to 65 European companies.
- Has the flexibility to pursue investment opportunities wherever they exist in the European market.
- Investments in the fund are not restricted by index, company size, stock, sector or investment style.
- Managed by a multi-disciplinary team that has experience of a broad range of market conditions.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time, and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table shows the Fund's ranking on the Risk and Reward Indicator. The lowest category does not mean a risk-free investment.

### Fund Objective & Policy

The Fund aims to increase the value of your investment over the long term. It looks to outperform the FTSE World Europe ex UK Index over rolling 3-year periods, after the deduction of charges.

The Fund is actively managed, and invests at least 75% of its assets in a concentrated portfolio of shares of companies domiciled in Continental Europe, or which have significant Continental European business operations.

The Fund selects companies in which the fund manager has a high conviction that the current share price does not reflect the prospects for that business. These companies may be chosen from any industry or economic sector, with significant sector and share weightings taken at the fund manager's discretion. There is no restriction on company size, however, investment tends to focus on larger companies, such as those included in the FTSE World Europe ex UK Index.

The FTSE World Europe ex UK Index is regarded as providing an appropriate representation of the share performance of large and medium-sized companies across Europe (excluding the UK), currently with approximately 500 companies included. It provides a suitable target benchmark against which Fund performance will be measured and evaluated over time.

The Fund typically invests in fewer than 50 companies, which may include shares of some companies not within the Index. The Fund may also invest in other assets such as cash and deposits, and hold other funds (including funds managed by Columbia Threadneedle companies) when deemed appropriate.

The Share Class currency, unless indicated as a Hedged Share Class, is a translated price using exchange rates at the official valuation point of the fund. This is intended as a way to access a Share Class in your chosen currency and does not reduce your overall exposure to foreign currency. The fund currency indicates the highest currency exposure of the fund unless the currency breakdown is detailed in the Weightings % table on page 2.

\*Past performance is not a guide to future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested. Index returns assume reinvestment of dividends and capital gains and unlike fund returns do not reflect fees or expenses. The index is unmanaged and cannot be invested directly. All returns assume income is reinvested for a local taxpayer, bid to bid performance (which means performance does not include the effect of any initial charges). Past performance before launch date includes data for another share / unit class or fund with similar characteristics (for details see Fund Changes, page 1). The Investment Association (IA) is the trade body representing the UK investment management industry.
