Key risks: Past performance is not a guide to future performance. Investment in the Fund carries the risk of potential total loss of capital. The portfolio is invested in smaller companies and companies traded on the Alternative Investment Market. These stocks may be less liquid and the price swings greater than those in, for example, larger companies. Discrete data is not available for five full 12 month periods due to the launch date of the portfolio. Investment decisions should not be based on short-term performance.
