

## Key Information Document

### Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

### Product

#### Series 7 db Physical Palladium ETC Securities due 2060 issued under a Secured ETC Precious Metal Linked Securities Programme (ETC Securities)

DB ETC plc, (ISIN:GB00B5VYZ75) [www.etc.deutscheam.com](http://www.etc.deutscheam.com)

Call +44 (20) 754 57700 for more information. Competent Authority: Financial Conduct Authority. Release Date: 31/12/2017

**You are about to purchase a product that is not simple and may be difficult to understand.**

### What is this product?

**Type:** Exchange Traded Commodities – Asset Backed Notes

**Objectives:** The ETC securities provide you with exposure to palladium without requiring you to possess palladium in the physical form. Each ETC security relates to a specific amount of palladium, known as the metal entitlement per ETC security. The issuer (**we**) will hold a sufficient amount of palladium to cover the metal entitlement for the ETC security. On redemption, the metal agent (JPMorgan Chase Bank N.A.) will sell the palladium and proceeds will be used to pay amounts due to you. The metal entitlement is reduced on a daily basis to reflect the base fee. The level of the fees is specified on [www.etc.deutscheam.com](http://www.etc.deutscheam.com). The ETC securities are non-interest bearing and are not principal protected and you may lose some or all of your investment. Subject to any amounts paid to you due to early redemption, no amounts are payable under the ETC security prior to the maturity date. On redemption, the ETC security will become payable at an amount equal to the higher of (i) 10 percent of the issue price of the ETC security; and (ii) the weighted average prices at which the palladium can be sold by the metal agent over a specified period prior to the redemption date multiplied by the metal entitlement on such redemption date. You may choose to sell your ETC securities prior to their maturity in accordance with your investment objectives. You should be aware that the ETC securities entitle you to receive a payment calculated by reference to the value of palladium and currency movements which may fluctuate over time. The value per ETC security and the secondary market price of the ETC securities can go down as well as up throughout the term of the ETC securities.

**Intended Retail Investor:** The ETC securities are intended for retail investors who (i) wish to gain exposure to palladium without having to take physical delivery of palladium; and (ii) are willing to hold a long term investment and can afford to risk losing their investment.

**Insurance Benefits:** Not applicable – the ETC securities do not offer insurance benefits.

**Product term:** This series of ETC securities has a scheduled maturity date of 14 July 2060. The scheduled maturity date may be postponed by up to ten business days. If this is the case we will provide you with notice of this and how many days such postponement will be. The ETC securities may be redeemed prior to the scheduled maturity date, if: (1) we redeem all of the ETC securities in the series following sixty days calendar written notice to you; (2) the programme counterparty exercises its right to terminate the balancing agreement; (3) an event of default occurs; or (4) an early redemption event occurs. A detailed description of early redemption events can be found in the prospectus in the Master Terms and Conditions of the ETC Securities.

### What are the risks & what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

**The risk indicator assumes you keep the product for 7 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell or end your product easily or you may have to sell or end at a price that significantly impacts on how much you get back.**

We have classified this product as 5 out of 7, which is a medium-high risk class. The principal of this product is not guaranteed.

#### **You may lose some or all of your investment.**

The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the risk indicator shown.

The ETC security value depends on the commodity price reacting to economic factors or falling for long periods. This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

## What are the risks & what could I get in return? (continued)

### Performance Scenarios

Investment = \$10,000.00

Scenarios	1 Year	4 Years	7 Years*
<b>Stressed Scenario</b>			
<b>What you might get back after costs</b>	<b>\$3,028.57</b>	<b>\$1,876.91</b>	<b>\$949.73</b>
Average return each year %	-69.71	-34.18	-28.56
<b>Unfavourable Scenario</b>			
<b>What you might get back after costs</b>	<b>\$7,637.56</b>	<b>\$6,552.27</b>	<b>\$6,313.16</b>
Average return each year %	-23.62	-10.03	-6.36
<b>Moderate Scenario</b>			
<b>What you might get back after costs</b>	<b>\$10,600.81</b>	<b>\$12,620.45</b>	<b>\$15,024.86</b>
Average return each year %	6.01	5.99	5.99
<b>Favourable Scenario</b>			
<b>What you might get back after costs</b>	<b>\$14,703.32</b>	<b>\$24,291.22</b>	<b>\$35,732.66</b>
Average return each year %	47.03	24.84	19.95

\*recommended holding period

This table shows the money you could get back over the next 7 years, under different scenarios, assuming that you invest \$10,000.00.

This table illustrates how your investment could perform. You can compare them with other products.

The table gives a range of possible outcomes and is not an exact indication of what you might get back.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you will get will vary depending on how the market performs and how long you keep the product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

Buying this product means that you think the underlying price will increase.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor.

The figures do not take into account your personal tax situation, which may also affect how much you get back.

## What happens if DB ETC plc is unable to pay out?

If we fail to make a payment when due, the trustee (Deutsche Trustee Company Limited) can enforce the security over the palladium deposited with the custodian. Once the trustee has enforced the security it can then sell the palladium and use of the proceeds of this sale to pay amount owed to you under the ETC securities. The proceeds of such sale may not be enough to cover all amounts owed to you under the ETC securities.

## What are the costs?

This table shows the impact the different types of costs have on the investment return you might get back at the recommended holding period and what the different cost categories mean.

### Costs Over Time

Investment Scenarios \$10,000.00	If you cash in after 1 Year		If you cash in after 4 Years		If you cash in after 7 Years*	
	\$	%	\$	%	\$	%
<b>Total cost</b>	<b>48.39</b>	<b>-</b>	<b>211.64</b>	<b>-</b>	<b>406.00</b>	<b>-</b>
	%		%		%	
<b>Impact on return (RIY) per year</b>	<b>0.46</b>		<b>0.46</b>		<b>0.46</b>
