7IM AAP MODERATELY CAUTIOUS FUND, CLASS C (ACCUMULATION)

A sub-fund of 7IM Investment Funds. This sub-fund is managed by Seven Investment Management LLP.

(ISIN: GB00B2PB2168)

OBJECTIVES AND INVESTMENT POLICY

Objective

The fund aims to provide a return consisting mainly of income but with some capital appreciation by actively managing the fund's investments across predominately passive strategies in a diverse range of asset classes and sectors. There is no guarantee that a positive return will be delivered.

Investment Policy

The fund invests in income-generating assets and may also include assets with scope for capital growth in real terms. The fund may use different asset classes, with a substantial proportion in fixed interest, or instruments that track the returns of fixed interest.

Essential features of the fund:

- The AAP in the fund's name means Asset Allocated Passives and refers to the investment strategy described in the Objective above.
- The fund has the discretion to invest in a range of investments as described above.

- The fund has no specific target market, asset class or geographic sector.
- You can buy and sell shares in the fund on each UK business day.
- Income from the fund will be added to the value of your investment.
- Derivatives are used for investment purposes and manage the risk profile of the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

RISK AND REWARD PROFILE

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of the fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 4 because its volatility has been measured as average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

- Counterparty and Derivatives Risk: As the fund may enter into derivative agreements, there is a risk that other parties may fail to meet their obligations leading to delays in receiving amounts due or less than is due. The use of derivatives may, through gearing, have a larger impact, positive or negative, than if only the underlying investments were held.
- Credit and Currency Risk: Fixed interest securities are affected by trends in interest rates and inflation. If interest rates go up the value of capital may fall and vice versa. Inflation will also decrease the real value of capital. The value of a fixed interest security is also affected by its credit rating. As the fund invests in overseas securities, exchange rate movements may increase or decrease the fund's value.
- Emerging Market Risk: Emerging markets may be less liquid and transparent, more volatile and subject to less oversight. There is a greater risk that other parties may default, causing loss to the fund.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in the 'Practical Information' overleaf.
