OBJECTIVES AND INVESTMENT POLICY

The Fund aims to grow your investment and provide a level of income.

The Fund typically invests up to 90% in commercial property in the UK and can invest up to 30% in property related shares. From time to time a level of cash is held in the Fund to enable property transactions and help meet withdrawal requests.

The Fund may also invest in shares, bonds, gilts, and other funds and can also invest in other investments allowed under UK Fund rules.

The Investment Adviser actively makes the investment selection decisions for the Fund.

You can buy and sell shares on any business day in London.

For full investment objectives and policy details please refer to the Prospectus.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

This is an income share class and any distributions from the Fund will be paid to you.

RISK AND REWARD PROFILE

- The value of investments and the income from them will change over time.
- Inflation will reduce the buying power of your money over time.
- You may not get back the original amount you invested.
- Investment performance is not guaranteed.
- Past performance is no guide to future performance.
- **Illiquid securities risk:** Certain assets held in the Fund could, by nature, be hard to value or to sell at a desired time or at a price considered to be fair (especially in large quantities), and as a result their prices could be very volatile.
- **Liquidity risk:** In unusual market conditions, the Fund could have difficulty selling securities, which could cause it to suffer losses, defer redemption payments or suspend dealing in Shares.
- **Pricing basis risk:** If we change the pricing basis of the Fund, this may protect investors from the effect of trading costs, but could, based on historical data, decrease the value of the Fund by as much as 6% or more.
- **Real estate investments risk:** Values of these investments, and any earnings the Fund receives from them, could fluctuate more than with bonds or shares, and can be hurt by many factors, such as changing demographics, high tax rates or non-payments of rent. Since real estate valuations are somewhat subjective, an asset may prove to be worth less than it was valued at.
