

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

HSBC ETFs PLC - HSBC FTSE 250 UCITS ETF

Class GBP IE00B64PTF05

A sub-fund of **HSBC ETFs PLC** (the "UCITS").

Objectives and investment policy

- ▶ HSBC ETFs PLC - HSBC FTSE 250 UCITS ETF (the "fund") aims to track as closely as possible the returns of the FTSE 250 Gross (the "Index").
- ▶ The fund will invest in or gain exposure to shares of companies which make up the Index.
- ▶ The Index is made up of the 250 largest companies after the 100 largest stock market listed companies in the United Kingdom, as defined by the Index Provider.
- ▶ The fund will use a full replication strategy. This means that the fund will normally invest in, or gain exposure to, all of the shares of the Index. It also means that the fund will generally invest in shares in the same proportions as their weighting in the Index.
- ▶ The fund may gain exposure to the shares in the index using other investments such as derivatives or other funds.
- ▶ The fund may invest up to 10% of its assets in other funds, including HSBC funds.
- ▶ The fund may use derivatives for efficient portfolio management purposes.
- ▶ Authorised Participants only may deal in the fund's shares directly with the UCITS.
- ▶ The fund's shares are listed on one or more stock exchange(s). You may sell your investment daily during business hours, through your financial adviser, stockbroker, share dealing service or third party administrator, on such stock exchange(s).
- ▶ Income is distributed.
- ▶ Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 3 years.

More about this rating

The rating is based on price volatility over the last five years, and is an indicator of absolute risk. Historical data may not be a reliable indication for the future. The value of an investment, and any income from it, may fall as well as rise, and you may not get back the amount you originally invested. The rating is not guaranteed to remain unchanged and the categorisation may shift over time. The lowest rating does not mean a risk-free investment.

Why is this fund in category 6?

Equity prices tend to fluctuate more than other asset classes as investors directly participate in underlying companies and their earnings.

Material risks not adequately captured by the risk rating above

- ▶ **Equity risk** Equity investments offer share participation in underlying corporate entities. The value of these shares can fall or rise in line with corporate results, market cycles, and company specific information.
- ▶ **Exchange rate risk** Investing in assets denominated in a currency other than that of the investor's own currency perspective exposes the value of the investment to exchange rate fluctuations.
- ▶ **Derivative risk** The value of derivative contracts is dependent upon the performance of an underlying asset. A small movement in the value of the underlying can cause a large movement in the value of the derivative. Unlike exchange traded derivatives, over-the-counter (OTC) derivatives have credit risk associated with the counterparty or institution facilitating the trade.
- ▶ **Operational risk** The main risks are related to systems and process failures. Investment processes are overseen by independent risk functions which are subject to independent audit and supervised by regulators.

Charges for this fund

The charges you pay are used to pay the running costs of the fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	3.00%
Charges taken from the fund over a year	
Ongoing charge	0.35%
Charges taken from the fund under certain specific conditions	
Performance fee	None

No entry or exit charge is payable where shares are purchased/sold on a stock exchange. Investors need only pay any relevant broker and stock exchange fees and commissions.

The Entry and Exit charges shown are the maximum that may be charged to Authorised Participants. Investors buying and selling shares on stock exchanges can obtain the actual charges from their financial adviser, stock broker, share dealing service or third party administrator.

The ongoing charges figure is based on last year's expenses for the year ending 31/12/2014. This figure excludes transaction costs. Charges may vary from year to year.

The fund sets a maximum amount that can be charged. Where charges exceed the maximum amount, the Investment Manager will absorb all costs above the maximum.

Further information on Charges can be found in the "Fees and Expenses" section of the prospectus and the fund supplement.

Past performance

Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up. The past performance of this share class is calculated in GBP.

Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges, but not entry and exit charges.

The fund was launched on 07/04/2010.

The investment benchmark for the fund is the FTSE 250 Gross.
