Investment objectives and policies

The investment objective is to replicate the upward and downward movement of the DJ Russia GDR index denominated in USD (Bloomberg code: DJRUSGD), increased by possible dividends paid by the stocks making up the index ("the Benchmark Index"), representative of Russian capitalisations among 85% of the GDR listed on the London Stock Exchange.

The anticipated ex-post tracking error under normal market conditions is 0.75%.

The Fund aims to achieve its objective through indirect replication, namely by entering into one or more over-the counter swap agreements (financial futures).

The net asset value is also indicated on the Reuters and Bloomberg pages of the Fund and may also be stated on the websites of stock markets where the Fund is listed.

As such, this risk estimation cannot be a reliable indicator of future risk, and it could change over time. The lowest category does not mean a risk-free investment. The Fund has been classified in category 7. The Fund has been classified as category 7 given its exposure to the Benchmark Index. Category 7 indicates that it is possible to suffer a very large or even complete capital loss, suddenly under normal market conditions, as the value of your investment could fluctuate very strongly and quickly both upward and downward each day.

These futures may be affected by various types of risks such as amendments to the law and/or regulations, including tax regulations.
