IGV Accumulation Shares Class X (the "Share Class") ISIN: GB00B9NWG297

Authorised Corporate Director (the "ACD"): GAM Unit Trust Management Company

Objectives and Investment Policy

- The investment objective of the Fund is to realise capital growth through investing principally in shares in companies located internationally. The Fund aims to be diversified by country, currency, industry and theme.
- The Fund will usually hold shares in between 60 and 80 companies from around the world.
- The business of these companies will be in a variety of industries which the managers think are likely to perform well over a period of time - typically three to five years.
- The income from the Fund is reinvested in the Fund.
- You can buy or sell your shares in the Fund on any working day.
- When you sell your shares, you will receive payment three working days later.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund's position on the risk scale is 5. Changes in the value of the Fund over the past 5 years are used to measure risk. Large changes in value equal high risk. The larger the changes, the higher the number on the risk scale. The lower the changes, the lower the number on the risk scale.

- Where the Fund holds shares in unquoted companies, in smaller stock markets, or holds specialised investments such as 'derivatives' the risk is likely to be greater and this will be reflected in a higher ranking on the risk scale.
- The Fund may hold shares in companies in less well developed countries. Share prices in these companies tend to be more unpredictable than those in more developed countries. As a result, the value of your investment could either go up significantly or fall sharply.
- The Fund does not make any promises. The return of your money is not guaranteed.
