Ardevora Global Long-only Equity Fund (the "Fund"), Class C Shares, a sub-fund of Treligga PLC (the "Company") (ISIN: IE00BBGT3P34)

The Fund is managed by Link Fund Manager Solutions (Ireland) Limited.

Objectives and investment policy

Objective

The Fund aims to achieve long-term capital growth.

Investment policy

The Fund is actively managed and will mainly invest globally in shares and share-related assets (global depositary receipts and American depositary receipts).

Essential features of the Fund:

- The Investment Manager has discretion over the assets held within the Fund. The Fund is managed in reference to a benchmark MSCI ACWI (Net) Index, as it aims to outperform the benchmark and such performance is compared to the benchmark in marketing materials. Investments for the portfolio are not specifically selected from the constituents of the benchmark, hence the Fund's investment policy is in no way constrained and the degree of deviation from the benchmark may be significant.
- The Fund will invest on a global basis and investments in emerging markets are not expected to exceed 35% of the net asset value of the Fund.
- In the event that the Investment Manager believes that significant market falls could occur, the Fund may sell investments and hold a high proportion of cash or holdings similar to cash.
- Any income arising from the Fund will be re-invested and increase the share price of the Fund
- The minimum recommended holding period for the Fund is five years.
- You may purchase/redeem shares in the Fund on any day that is a business day both in Dublin and London.

Risk and reward profile

The following risks may not be fully captured by the risk score

- The risk and reward score is based on the Fund's historical data. It may not be a reliable indication of the future risk profile.
- The risk score of 6 is based on historical volatility which has been high. This indicates that the value of the Fund can change over short time periods and so should be considered as high risk.
- The risk and reward score is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund could hold significant cash or near cash weightings. If investment markets generally rose during this period, against the Investment Manager's expectation, then the Fund's performance would be reduced.
- There is a risk that any company providing services such as safekeeping of assets may become insolvent which could cause losses to the Fund.
- The Fund is exposed to currencies other than the base currency and is subject to currency fluctuations which could result in losses to the Fund.
- Investments in emerging markets may expose the Fund to more social, political, regulatory and currency risks than investments in developed markets.
- The Fund may be subject to sustainability risk, meaning an environmental, social or governance ("ESG") event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment.
