

Fund aim

The investment objective is to track the total return (after charges) of the FTSE® 100 Share Index. The investment policy is to hold all the stocks and in the same proportion as in the FTSE® 100 Share Index, except where prevented by the FSA Regulations. The Fund may invest in any of the following financial instruments in order to achieve its investment objective: transferable securities, money market instruments, units in collective investment schemes, deposits and derivatives and forward transactions. *

Fund manager report

The UK equity market rebounded strongly in July, recording its best monthly gain in just under a year and outperforming the majority of its global and European peers in both sterling and local currency terms, as fears of a global recession receded. The FTSE All-Share index returned 6.9 per cent, helped further by a wave of stronger than expected corporate results. Sector-wise financials fared extremely well as the result of recent European bank stress tests revealed that only seven of the 91 banks assessed failed to demonstrate their ability to survive future economic shocks. The oil & gas sector was another strong performer as oil prices rose sharply and as BP shares surged after the company made substantial progress in dealing with an oil leak in the Gulf of Mexico. Healthcare shares by contrast declined. We continue to expect UK equities to generate a reasonable return for investors, particularly in relation to cash, where returns are likely to remain close to zero for longer than previously anticipated.
