

Fund aim

The investment objective is to provide long term capital appreciation and income. The investment policy is to hold diversified investment within the UK equity market. Individual security selections will be based on price and long term total return prospects. The Fund may invest in any of the following financial instruments in order to achieve its investment objective: transferable securities, money market instruments, units in collective investment schemes, deposits and derivatives and forward transactions.

Fund manager report

The UK equity market rebounded strongly in July, recording its best monthly gain in just under a year and outperforming the majority of its global and European peers in both sterling and local currency terms, as fears of a global recession receded. The FTSE All-Share index returned 6.9 per cent, helped further by a wave of stronger than expected corporate results. Sector-wise financials fared extremely well as the result of recent European bank stress tests revealed that only seven of the 91 banks assessed failed to demonstrate their ability to survive future economic shocks. The oil & gas sector was another strong performer as oil prices rose sharply and as BP shares surged after the company made substantial progress in dealing with an oil leak in the Gulf of Mexico. Healthcare shares by contrast declined. We continue to expect UK equities to generate a reasonable return for investors, particularly in relation to cash, where returns are likely to remain close to zero for longer than previously anticipated.

Any opinions expressed are those of Aviva Investors. They should not be viewed as indicating any guarantee of return from an investment managed by Aviva Investors nor as advice of any nature.

Fund information (31/07/2010)

Fund size	£60.5m
Fund launch date	01/09/1968
Initial charge	5.00%
Annual charge	1.50% Class 1
