## Corporate Bond Fund Share Class A

August 2010

### Fund aim

The investment objective is to achieve long term total return above that available on UK Government securities. The investment policy is to hold diversified investment in Sterling denominated debt securities issued by governments, supranational institutions and corporates. The Fund may invest in any of the following financial instruments in order to achieve its investment objective: transferable securities, money market instruments, units in collective investment schemes, deposits and derivatives and forward transactions.

### Fund manager

**Christopher Higham**

Manager of this fund since July 2009

### Fund manager report

Corporate bonds performed strongly on the back of investors' increased willingness to buy risky assets. European bank stress test results, which were announced towards the end of the month, were generally well received. Only seven banks were deemed to have failed the test, but none of these were a surprise and the amount of additional capital deemed necessary to make them secure was relatively small. Bonds issued by financial companies such as banks and insurers were the strongest gainers on the back of these results. As investors resumed their hunt for assets with high yields, lower-rated sectors performed best. The recent strength of corporate earnings means the outlook is positive.

Any opinions expressed are those of Aviva Investors. They should not be viewed as indicating any guarantee of return from an investment managed by Aviva Investors nor as advice of any nature.

### Fund information (31/07/2010)

<b>Fund size</b>	£1606.6m
<b>Fund launch date</b>	06/07/1995
<b>Initial charge</b>	4.00%
<b>Annual charge</b>	1.00% Class A
<b>Benchmark</b>	Iboxx Sterling Non-Gilt Overall
<b>IMA sector</b>	£ Corporate Bond
<b>Distribution yield</b>	4.9% (31/07/2010)

The Distribution Yield reflects the amount that is expected to be distributed over the next year as a percentage of the share price of the fund on the date shown. It is based on the fund on that day. This does not include Initial charges and investors may be subject to further tax on their distributions. The Distribution Yield is also the Underlying Yield for this fund.

### Risk summary

Further information about the risks that apply when investing can be found in the Simplified Prospectus. This is available free of charge on request. The value of the fund and any income from it is not guaranteed and may fall as well as rise. You may get back less than you originally invested. Credit and fixed interest securities are the debts of governments or companies generally issued in the form of bonds. These securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of the security may fall, and vice versa. The value of these securities will fall if the issuer is unable to repay their debt or has their credit rating reduced. Generally, the higher perceived credit risk of the issuer, the higher the rate of interest.
