**Aims**

Objective: The investment strategy of the fund is to purchase units in the Janus Henderson China Opportunities Fund - the underlying fund.

Underlying Fund Objective: The fund aims to provide a return, from a combination of capital growth and income over the long term. To outperform the MSCI Zhong Hua Index by 2.5% per annum, before the deduction of charges, over any 5 year period. The fund invests at least 80% of its assets in a concentrated portfolio of shares (equities) and derivatives (complex financial instruments) of companies, of any size, in any industry, in China or Hong Kong. Companies will have their registered office in or do most of their business (directly or through subsidiaries) in this region. The fund may invest up to 50% of its assets in China A Shares. The portfolio may be concentrated in terms of its number of holdings and/or the size of its largest holdings. The fund may also invest in other assets including companies outside this region, depository receipts or other similar investments, Collective Investment Schemes (including those managed by Janus Henderson) and cash and money market instruments.

The investment manager strategy seeks to identify companies that can generate unexpected earnings growth, at both an industry and stock level, not yet recognised by the broader market. The investment manager may use derivatives (complex financial instruments) to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the MSCI Zhong Hua Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target. The investment manager has discretion to choose investments for the fund with weightings different to the index or not in the index.

**Important Information**

- Because of changes in exchange rates the value of your investment, as well as any money you take from it, can go down as well as up.
- Some funds may invest in 'underlying' funds or other investment vehicles. The performance of our fund, compared to what it's invested in won't be exactly the same. That can be due to additional charges, cash management (needed to help people to enter and leave our fund when they want), tax and the timing of investments (this is known as a fund's dealing cycle, it varies between managers and can be several days).
- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of product charges, or any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with net income reinvested. The value of your client's investment can go down as well as up and the amount your client gets back may be less than they put in.
