Fund Charges

| | |
|--------------------------------|--------|
| Annual Management Charge (AMC) | 0.875% |
| Further Costs | 0.000% |
| Yearly Total | 0.875% |

Aims

Objective: The investment strategy of the fund is to purchase units in M&G Smaller Companies Fund - the underlying fund.

Underlying Fund Objective: The fund aims to deliver a higher total return (the combination of capital growth and income) than the Numis Smaller Companies Index (excluding Investment Companies), net of the Ongoing Charge Figure, over any five year period. At least 80% of the fund is invested in the UK smaller companies. These are UK listed companies which, at the initial time of purchases, are: - in the bottom 10% (by market capitalisation) of the FTSE All-Share Index, or - in the Numis Smaller Companies Index (excluding Investment Companies), or - listed on the Alternative Investment Market. The fund may also invest in collective investment schemes and other transferrable securities. Cash and near cash may be held for ancillary purposes and derivatives, including warrants, may be used for efficient portfolio management and hedging purposes.

FE Crown

Important Information

- Some funds may invest in 'underlying' funds or other investment vehicles. The performance of our fund, compared to what it's invested in won't be exactly the same. That can be due to additional charges, cash management (needed to help people to enter and leave our fund when they want), tax and the timing of investments (this is known as a fund's dealing cycle, it varies between managers and can be several days).
- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of product charges, or any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with gross income reinvested. The value of your client's investment can go down as well as up and the amount your client gets back may be less than they put in.
