Number of holdings	265
Launch date	20/05/2002

Fund Charges

Annual Management Charge (AMC)	1.30%
Further Costs	0.02%
Yearly Total	1.32%

Aims

Objective: The investment strategy of the fund is to purchase units in the M&G (ACS) BlackRock Optimised US Equity Fund – the underlying fund.

Underlying Fund Objective: The Sub-Fund aims to reflect the risk and return characteristics of the S&P 500 Index gross of the Ongoing Charges Figure. The Sub-Investment Manager uses a structured and systematic, bottom-up stock selection process to build a portfolio with similar risk-return characteristics as the Index in order to meet the Sub-Fund's investment objective; in addition the Sub-Investment Manager aims to maximise the Sub-Fund's ESG characteristics by overweighting its investments in securities which score well against the Sub-Investment Manager's ESG research framework, and underweighting the securities which score less well. .

Important Information

- Because of changes in exchange rates the value of your investment, as well as any money you take from it, can go down as well as up.
- Some funds may invest in 'underlying' funds or other investment vehicles. The performance of our fund, compared to what it's invested in won't be exactly the same. That can be due to additional charges, cash management (needed to help people to enter and leave our fund when they want), tax and the timing of investments (this is known as a fund's dealing cycle, it varies between managers and can be several days).
- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of product charges, or any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with net income reinvested. The value of your client's investment can go down as well as up and the amount your client gets back may be less than they put in.
