Launch date	09/04/2003

Fund Charges

Annual Management Charge (AMC)	1.30%
Further Costs	0.00%
Yearly Total	1.30%

Aims

Objective: The investment strategy of the fund is to purchase units in the M&G Episode Allocation Fund - the underlying fund.

Underlying Fund Objective: The fund aims to deliver a total return (the combination of capital growth and income) of at least 5% per annum above the Sterling Overnight Index Average (SONIA), before any charges are taken, over any five year period. There is no guarantee that the fund will achieve a positive return over five years, or any other period, and investors may not get back the original amount they invested. It is a multi-asset fund that invests across a range of asset classes, including equities, fixed income securities, convertibles, cash and near cash. Exposure to these assets may be gained either directly or indirectly via collective investment schemes or derivatives. The fund may also invest indirectly via collective investment schemes or derivatives in other asset classes such as property and gold. The currency exposure of the fund will be actively managed, seeking to enhance returns, with a minimum of 30% of the fund exposed to sterling and a minimum of 60% in developed market currencies (including sterling). Derivatives may be used for investment purposes, efficient portfolio management and hedging.

Important Information

- Because of changes in exchange rates the value of your investment, as well as any money you take from it, can go down as well as up.
- Some funds may invest in 'underlying' funds or other investment vehicles. The performance of our fund, compared to what it's invested in won't be exactly the same. That can be due to additional charges, cash management (needed to help FE flow in and out of the fund and leave our fund when they want), tax and the timing of investments (this is known as a fund's dealing cycle, it varies between managers and can be several days).
- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of product charges, or any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in the fund's currency of denomination with gross income reinvested. The value of your client's investment can go down as well as up and the amount your client gets back may be less than they put in.
