## Aims

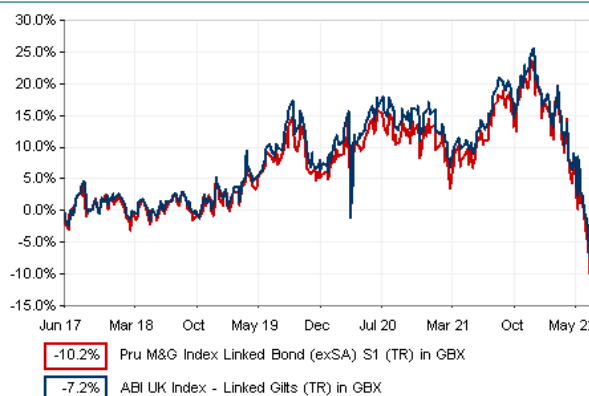

Objective: The investment strategy of the fund is to purchase units in the M&G Index-Linked Bond Fund - the underlying fund.

Underlying Fund Objective: The fund aims to provide a higher total return (the combination of capital growth and income), net of the Ongoing Charge Figure, than that of the FTSE UK Index-linked Gilts All Stocks Index over any five-year period. At least 70% of the fund is invested, directly or indirectly, in inflation-linked debt securities issued or guaranteed by the UK government, and denominated in sterling. The fund's indirect exposure to inflation-linked debt securities is achieved by investing through a combination of instruments. These include the combination of government bonds or corporate bonds with credit derivatives, such as credit default swaps.

Other investments may include: • debt securities issued or guaranteed by governments and their agencies, public authorities, quasi-sovereigns and supranational bodies, or corporate debt instruments, denominated in any currency; and • other transferable securities, cash, and near cash, directly or via collective investment schemes (including funds managed by M&G).

Derivatives may be used for investment purposes, efficient portfolio management and hedging.

## Important Information

- Because of changes in exchange rates the value of your investment, as well as any money you take from it, can go down as well as up.
- Some funds may invest in 'underlying' funds or other investment vehicles. The performance of our fund, compared to what it's invested in won't be exactly the same. That can be due to additional charges, cash management (needed to help people to enter and leave our fund when they want), tax and the timing of investments (this is known as a fund's dealing cycle, it varies between managers and can be several days).
- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of product charges, or any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with net income reinvested. The value of your client's investment can go down as well as up and the amount your client gets back may be less than they put in.
