Prudential Risk Rating

Lower to Medium Risk

These funds may invest in corporate bonds or multi-asset strategies with a higher weighting in corporate bonds (and other comparable strategies).

These risk ratings have been developed by Prudential to help provide an indication of a fund's potential level of risk and reward based on the type of assets which may be held by the fund. Other companies may use different descriptions and as such these risk ratings should not be considered as generic across the fund management industry.

We regularly review our fund risk ratings, so they may change in the future. If, in our view, there is a material change in the fund's level of risk, for example due to a significant change to the assets held by the fund or in the way the fund is managed, we will provide information on the new risk rating. We recommend that you make sure you understand the risk rating of any fund before you invest.

Fund Managers

Manager of the underlying fund for:

BLACKROCK

Name:

BlackRock Team Managed 25 years, 2 months

Important Information

- Because of changes in exchange rates the value of your investment, as well as any money you take from it, can go down as well as up.
- Some funds may invest in 'underlying' funds or other investment vehicles. The performance of our fund, compared to what it's invested in won't be exactly the same. That can be due to additional charges, cash management (needed to help people to enter and leave our fund when they want), tax and the timing of investments (this is known as a fund's dealing cycle, it varies between managers and can be several days).
- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with gross income reinvested. The value of your client's investment can go down as well as up and the amount your client gets back may be less than they put in.
- This factsheet is intended for the advisers of occupational pension schemes using Prudential group pension contracts and Prudential grouped personal pensions and Stakeholder pension contracts. Its purpose is to provide an insight into how investment markets and funds have performed over the period and is provided for information only. You should refer to your client's scheme documentation (e.g. Fund Guide) for fund availability, investment strategy, any scheme information and charges. Every care has been taken in populating this output, however it must be appreciated that neither Broadridge, Prudential nor their sources guarantee the accuracy, adequacy or completeness of this information or make any warranties regarding results from its usage.

Important Information

• Because of changes in exchange rates the value of your investment, as well as any money you take from it, can go down as well as up.

- The Industry Classification Benchmark is a product of FTSE International Limited and has been licensed for use.
- 'Prudential' is a trading name of Prudential Pensions Limited. Prudential Pensions Limited is registered in England and Wales. Registered office at 10 Fenchurch Avenue, London EC3M 5AG. Registered number 992726. Authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

Commentary

Performance as at Q4 2024 - Over the month, yields across both US and UK government bonds ticked back up as markets priced out expectations of policy rate cuts for 2025. While the Federal Reserve cut their policy rate in December, as expected, they also indicated a slowing of cuts in 2025 as inflation remained stubborn. Similarly, inflation in the UK showed a renewed stickiness in the November print, leading the market to go from pricing three cuts for 2025 at the end of November, to pricing a little under two and a half cuts by the end of December. The effects of this change in sentiment across both the UK and US markets has been to increase government bond yields, with UK yields reaching their 2024 peak.
